5. To conduct an autonomous, accountable, and transparent high educational governance for a sustainable quality assurance and improvement.

The Vision and Mission of Faculty

Vision of Faculty of Economics and Business

“To become a reputable Faculty of Economics and Business in Southeast Asia in the fields of Economics, Economics Education and Business in 2023”

Mission of Faculty of Economics and Business

1. To improve the quality of the undergraduate, master, doctoral and professional education programs on economics education, economics and business. To improve the quality of reputable research on economics education, economics and business that contributes to the development of science and technology.
2. To improve the quality of reputable community service on economics education, economics and business.
3. To improve Good Faculty Governance in the organizations management and collaboration networks with domestic and foreign stakeholders.
4. To increase the competitiveness of students and graduates with an entrepreneurial-leadership spirit.

Goal of Faculty of Economics and Business

1. The realization of intermediate expert education programs (diploma), undergraduate, master and doctoral degrees as well as professions in the fields of Education and Economics and education.
2. The realization of an increase in the quantity and quality of economic scientific and educational research activities.
3. The realization of an increase in the quantity and quality of community service activities in education and economic science studies.
4. The realization of an increased academic climate that is conducive to the development of talents and interests as well as student reasoning.
5. The realization of a Good Faculty of Economics to ensure customer satisfaction.

The Vision, Mission and Goals of Department of Economics

Vision of Department of Economics

"To become a reputable study program in applied economics-based economics in Southeast Asia in 2025"

Scientific Vision

Organizing learning in the fields of development planning economics, public economics, monetary economics and banking with a reputation in Southeast Asia

Mission of Department of Economics

1. Organizing education in economics based on development planning economics, public economics, monetary economics and banking
2. Conducting research in the field of economics based on development planning economics, public economics, monetary economics and banking
3. Organizing community service based on development planning economics, public economy, monetary economics and banking
4. Establishing cooperation with stakeholders at home and abroad
5. Organizing study program governance according to the principles of good university governance

Goals of Department of Economics

1. It produces excellent undergraduate graduates in the field of Economics consisting of development planning economics, public economics, monetary economics and banking
1. The production of research in the field of Economics with the peculiarity of economic analysis to be used as input material for government policies;
2. The result of community service in the field of Economics to contribute to the development of resources

3. The establishment of cooperation and partnerships in the fields of education, research, and community service with *stakeholders* (related parties) at the national and international levels
4. The implementation of organizational performance is in accordance with the vision and mission of the Study Program with the principles of openness, accountability, and sustainability

B. PROGRAMME EDUCATIONAL OBJECTIVE (PEO)

Graduates of the Bachelor of Economics Study Program are prepared to achieve the educational program objectives, namely to become economic practitioners and entrepreneurs who have the following competencies:

1. PEO-1 (C3): Able to solve problems in the fields of development planning, monetary economics, public economics, and entrepreneurship in professional practice.
2. PEO-2 (P5&P4): Able to carry out formal and informal education and adapt to the dynamic globalization.
3. PEO-3 (A4): Able to be responsible and uphold professional ethics

Table 1. Correlation of PEO and INQF

	Capable of apply science, technology, and art within his/her expertise and adaptable to various situations faced during solving a problem	Mastering in-depth general and specific theoretical concepts of certain knowledge and capable of formulating problem-solving procedure	Capable of taking strategic decision based on information and data analysis as well as providing direction in choosing several alternative solutions	Responsible for his/her own jobs and can be assigned to take responsibility of the attainment of organization's performances
PEO-1	Strong	Strong	Strong	Not Strong
PEO-2	Strong	Strong	Strong	Not Strong
PEO-3	Not Strong	Strong	Strong	Strong

Graduate Profile

Table 2. Graduate Profile

No.	Profile	Description
PL-1	Economic practitioners in the field of development planning, monetary, and public economics	Economic practitioners in the field of development planning in government, monetary, and banking sector in both State-Owned Enterprises (BUMN) and Private-Owned Enterprises (BUMS) that are able to uphold professional values, norms and ethics
PL-2	<i>Entrepreneur</i>	Entrepreneurs who are able to analyse potential in economic empowerment strategies

C. PROGRAMME LEARNING OUTCOMES (PLO)

The issuance of the Minister of Education and Culture Regulation No. 3 of 2020 concerning National Higher Education Standards (SN-Dikti) encouraged the S1 Economics Study Programme to review the curriculum. However, the curriculum developed is still guided by the Indonesian National Qualifications Framework (Presidential Regulation No. 8 of 2012) which regulates the equivalence and level of education programmes. The standards for the implementation of study programmes are regulated in more detail according to their level in SN-Dikti. graduate learning outcomes are formulated with reference to KKNI and SN-Dikti qualifications. The determination of graduate learning outcomes refers to the University's vision and mission which is then derived to the university's SLOs. The learning outcomes of study programme graduates include the University's SLOs. the following are the learning outcomes of economics study programmed graduates:

Tabel 3. Programme Learning Outcomes Economics Study Programme

PLO	CODE
Able to demonstrate religious values, nationality and national culture, and academic ethics in carrying out their duties	PLO -1

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.	PLO-2
Develop logical, critical, systematic, and creative thinking in performing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.	PLO-3
Continuous self-development and collaboration	PLO-4
Able to analyse economic theoretical concepts comprehensively	PLO-5
Capable of analysing strategies for empowering economic potential	PLO -6
Able to communicate effectively both orally and in writing in the field of economics	PLO-7
Capable of applying information technology in problem-solving	PLO-8
Capable of making decisions based on the analysis of information and data in the fields of development planning, monetary economics, and public economics	PLO-9

These goals strongly support the Indonesian National Qualification Framework (INQF) for undergraduate education and are consistent with the institution's mission.

Tabel 4. Correlation Matrix between Program Educational Objective (PEO) and Program Learning Outcome (PLO)

	PEO-1	PEO-2	PEO-3

economic education both quantitatively and qualitatively									
Able to master data analysis techniques					v			v	
Able to master the concept of entrepreneurship		v							
Carrying out lifelong learning		v		v					
Able to communicate with colleagues who work in the field and with the wider community, about matters related to the economy, also in foreign languages and interculturally							v		
Aware of social and ethical responsibilities in action and familiar with the principles of professional ethics			v						

D. PROGRAMME STRUCTURE

The curriculum for the Bachelor of Economics Study Program at Surabaya State University is primarily guided by the KKNI, SN-Dikti, and Strategic Plan for Higher

Education. The undergraduate program in Economics, Surabaya State University has a degree of Bachelor of Science (B.Sc.) or Bachelor of Economics (S.E)

The target for graduates of the Bachelor of Economics Study Program is described in the graduate profile. To meet the target, the Bachelor of Economics Study Program curriculum contains graduate competencies according to developments in the times that are experiencing social, cultural, world of work and national and global information technology changes.

Stakeholder needs assessment activities are carried out in two activities, namely Curriculum Sanctioning Activities and Public Testing Activities which are carried out at least once every 5 years, unless there are changes to new curriculum regulations that require changes even though the existing curriculum is less than 5 years.

The following are several legal bases that need to be referred to in the preparation and implementation of the curriculum:

1. Indonesian National Qualification Framework (KKNI: National Qualification Framework Indonesia) and National Standards for Higher Education.
2. 21st century skills needed, namely critical thinking and problem solving, creative and innovative, communication, and collaboration.
3. The ASEAN Economic Community since 2015
4. The importance of literacy, according to the Law of the Ministry of Education (Permendikbud No. 23 of 2015) concerning the improvements of manners
5. The development of global community dynamics that needs to be anticipated for its development to prepare reliable Indonesian human resources, such as the challenges of the ASEAN Free Trade Area (AFTA), the World Trade Organization (WTO), and the Asia Pacific Economic Cooperation (APEC).

The curriculum is delivered in 4 years through 4 main structures: basic, intermediate and advanced courses, and a final project. In this structure, the learning process is designed in a course flow. Basic courses are the foundation of this program, intermediate and advanced courses as pillars and the final project as a roof that covers all knowledge in the field of economics. This is explained in the following image

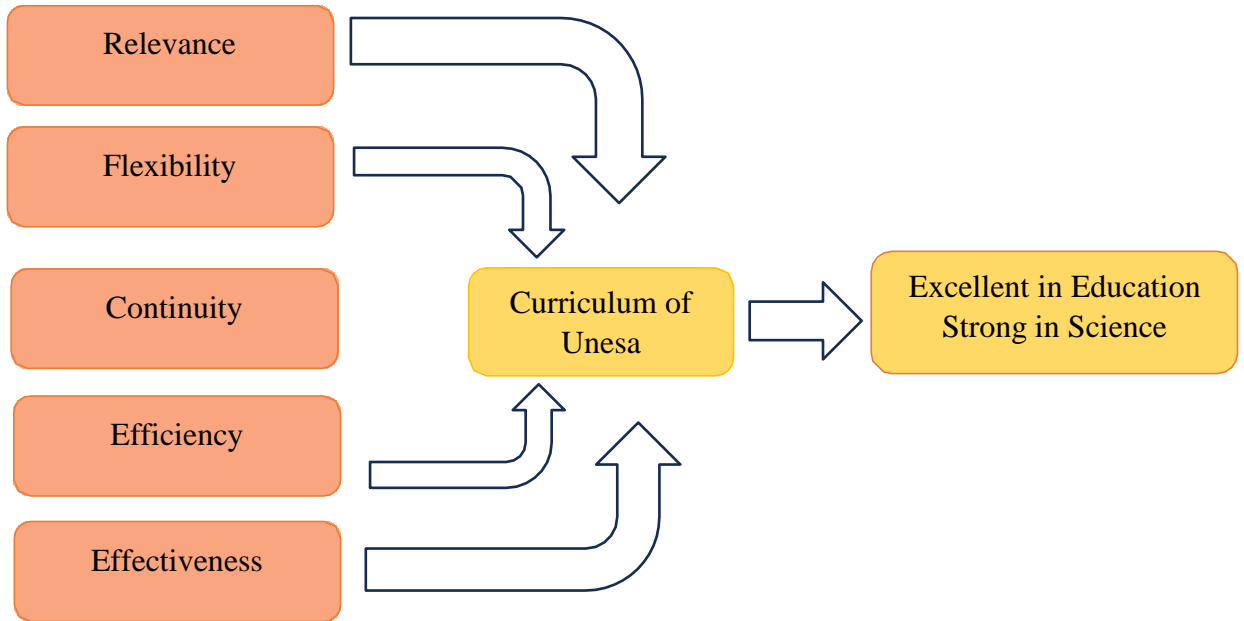

Figure 1. Principles of curriculum development

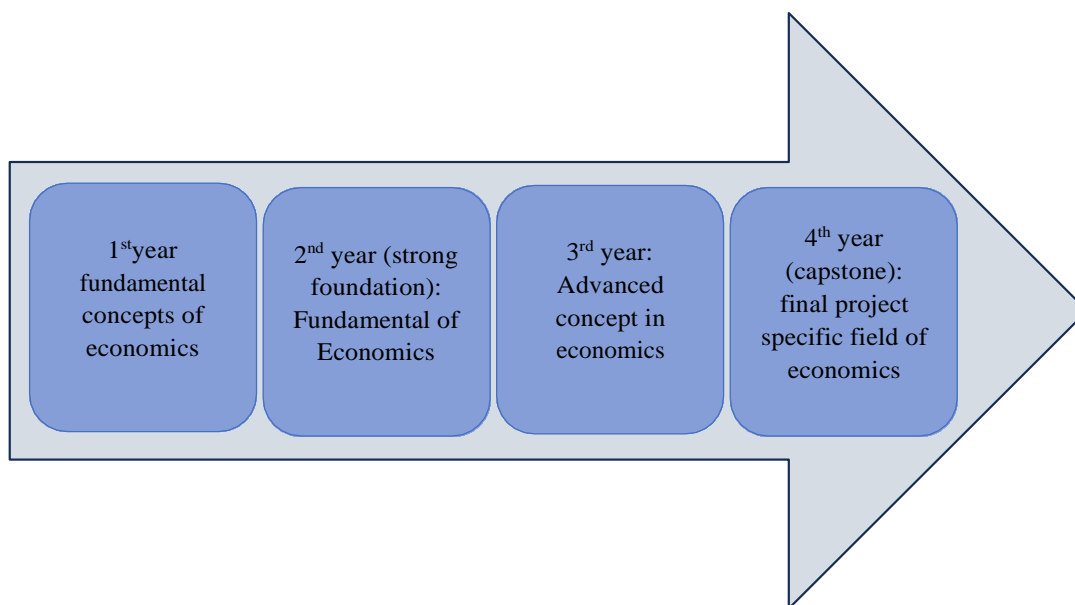

Figure 2. Model of curriculum structure of undergraduate program in Economics

To complete the learning program, students should take 144 credit units (CU) comprising 124 CU as a compulsory courses and 20 CU as an elective course.

Tabel 6. Compulsory and elective courses for undergraduate programs at Bachelor of Economics, Surabaya State University

CU compulsory courses	CU	Note
CU of compulsory courses	133	There are 133 credit units of the compulsory courses provided
CU of elective courses	12	There are 36 credit units of the compulsory courses provided
Total	145

The curriculum structure for the Bachelor of Economics study program is designed for 7 semesters to make it easier for students to gain acceleration in their undergraduate studies. In the general first year, students are required to take courses to provide a good foundation, namely economics and other basic sciences. Students are given introductory courses, namely introduction to macroeconomics, introduction to microeconomics, economic mathematics, macroeconomic theory, microeconomic theory and economic statistics. Meanwhile, in developing interpersonal skills, there are 10 supporting courses with a total of 21 credits given to students, such as Pancasila education, Indonesian, English, introduction to business, introduction to accounting, religion, citizenship education, philosophy of science, basic natural sciences, and literacy. digital. In semester 3, students begin studying basic skills courses and courses on strengthening professional skills. Students are then encouraged to apply their knowledge in life in society and in the world of work by taking part in KKN and internships in the world of industry and business. This will provide students with the opportunity to sharpen their knowledge according to their specific interests. In

addition, internships in companies as practice-based learning are also well integrated into the program structure
