NON FORMAL EDUCATION

SEMESTER 1

TABLE OF CONTENTS

1. Religious Education
2. Sociology-Anthropology of Education
3. Leadership and Social Organization
4. Identification of Learning Needs and Resources
5. Public Health Education
6. Basic Theory of Non Formal Education
7. Life-Long Education
8. Educational Psychology
9. Educational Science

Module number 1000002001	Module name Religious Education		
Type of course Core module		Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Lecturing Course, Group Discussion, Case Study		Prerequisites for attendance None	Language Bahasa Indonesia English for International Class
Type of examination (Final Grade Composition) Exam paper (40%) Assignment/ portofolio (10%) Participation (50%) Duration of Examination: Exam paper (200 minutes)			SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Dr. Ali Yusuf, S.Ag., M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Drs. H. M. Husni Abdullah, M.Pd.I.			
Syllabus The Religious course aims to form the student's personality (kaffah) by making Islamic teachings the basis for thinking, behaving, and behaving in scientific and professional development. A complete personality can only be realized if every student is instilled in faith and piety to Allah SWT. Faith and piety will only materialize if supported by the development of its elements: insight/knowledge about Islam, religious attitudes, skills in carrying out Islamic teachings, commitment to Islam, self-confidence as a Muslim, and skills in carrying out religious teachings. In the psycho-social constellation, both as individuals, family members, community members, and Indonesian citizens. This course upholds the values of divinity, humanity, unity, deliberation, and justice within the framework of Pancasila and the Unitary State of the Republic of Indonesia. This lecture also integrates Anti-Corruption Education material and religious moderation. Lectures include case study analysis, presentations and discussions, project assignments/problem-solving, and reflection.			

Course Material

1. Utilization of Learning Resources and ICT Media
2. Theoretical Concepts of Islamic Knowledge
3. Good Muslim Personality
4. Decision-Making Based on Islamic Teachings
5. Responsible Attitude and Behavior
6. Understanding the Fundamentals of Islamic Beliefs
7. Mastery of Islamic Practices and Rituals
8. Awareness of Social Responsibilities in Islam
9. Development of Spirituality and Inner Peace
10. Building Strong Family Relationships Based on Islamic Values
11. Enhancing Community Engagement and Cooperation
12. Promoting Justice and Equality in Society
13. Applying Ethical Standards in Everyday Life
14. Contributing to National and Global Welfare as a Muslim Citizen

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 4

Continuous self-development and collaboration.

PLO 10

Able to communicate both in writing and orally under academic values, norms and ethics

CLO :

CLO 1

Organize their self In a psycho-social and religion constellation, both as a person, family member, community member, and as an Indonesian citizen (A4). Utilizing learning resources and ICT-assisted learning media to explore data/information in the context of learning Islamic Religious Education including insight/knowledge of Islam, religious attitudes, skills in carrying out Islamic teachings, commitment to Islam, confidence as a Muslim, and skills in carrying out religious teachings.

CLO 2

Accept theoretical concepts about Islamic knowledge according to reference sources (A1)

CLO 3

Having character, mindset, attitude, and action pattern that reflects a good Muslim personality who has the ability to carry out religious teachings (A5)

CLO 4

Responding cases based on theoretical concepts of Islamic teachings to contribute in analyzing cases and solving problems (A2).

CLO 5

Having character (responsible attitude and behavior) that reflects a good Muslim and be part of a good citizen in the life of the community, nation and state (A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502184	Module name Sociology-Anthropology of Education	
Type of course Core module	Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Case Study.	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Class Participation (50%) Examination (50%) Duration of Examination : Exam paper (200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours))
Module coordinator Dr. Sjafiatul Mardiyah, S.Sos., M.A.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Dr. Rofik Jalal Rosyanafi, M.Pd. Dr. Widodo, M.Pd.		
Syllabus Studies the relationship between education and social and cultural aspects of society. This course examines how the education system is influenced by the social structure, culture, values, and norms that exist in society. By understanding this, students are expected to be able to see the role of education in shaping and changing behavior patterns, as well as understand the socio-cultural dynamics that influence the learning process. Through this course, students are expected to have a critical perspective on the relationship between education and various social and cultural aspects and be able to apply it in the context of education in society. Students are given the opportunity to observe the community directly related to community behavior so that it affects their educational culture, then study it in the discussion room. This course assignment is in the form of mini research and is displayed in a presentation. Lectures are conducted using the lecture method, group assignments, and case studies, while assessment is carried out from the aspects of participation and examinations.		

Course Material

1. Understanding the Basic Concepts of Sociology and Anthropology in Education
2. Analyzing the Relationship Between Society and Education
3. Exploring Social Structures and Their Impact on Education
4. Investigating Cultural Influences on Educational Systems
5. Examining the Role of Education in Social Change
6. Understanding the Concept of Socialization and Education
7. Identifying Social Problems and Their Impact on Education
8. Studying the Influence of Family and Community on Education
9. Understanding the Role of Power, Politics, and Education
10. Exploring Educational Inequality and Social Stratification
11. Understanding the Impact of Globalization on Education
12. Developing Critical Thinking in Sociology and Anthropology of Education
13. Applying Sociological and Anthropological Perspectives to Educational Practices
14. Mastering Techniques for Community Empowerment in Education Programs

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs.

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Understand and interpret the scope of the sociology-anthropology of education (C1).

CLO 2

Students are able to evaluate the scope of the sociology-anthropology of education (C5).

CLO 3

Analyze the main content and concept the scope of the sociology- anthropology of education (C4).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Core readings:

Module number 8620502223	Module name Leadership & Social Organization	
Type of course Core module	Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Case Study, Collaborative Learning	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation assessment (50%) Test/exam paper (50%) Duration of Examination : Exam paper (200 Minutes), Performance		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Widya Nusantara, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Dr. Widodo, M.Pd. Monica Widyaswari, M.Pd. Drs. Heru Siswanto, M.Si.		
Syllabus This course contains studies on Leadership and Social Organizations which include: background on leadership and social organizations, as well as skills in managing Non-formal Education programs to solve problems that occur in society. To achieve this, several theories and their applications include: leadership theory, and social organization theory, as well as the main relationship between leadership and social organization studies and non-formal education. This course provides an understanding of the background of leadership and social organization, to provide students with understanding abilities, and skills in managing out-of-school education programs as well as in solving problems that occur in the implementation of out-of-school education. To achieve that direction, several theories and their applications include leadership theory, social organization theory, and the relationship between leadership and social organization studies with out-of-school education. The indicator of the success of this course is if students can implement theory into the practice of Non-Formal Education		

Course Material

1. Introduction to Non-formal Education
2. Leadership Theories in Non-formal Education
3. Social Organization in Non-formal Education
4. National Culture and Education
5. Ethics in Non-formal Education
6. Problem Solving in Non-formal Education
7. Community Development Theories
8. Andragogy in Non-formal Education
9. Innovative Approaches in Lifelong Learning
10. Collaboration in Educational Programs
11. Social Entrepreneurship in Education
12. Character Development in Education
13. Information Technology (IT) in Non-formal Education
14. Monitoring and Evaluation of Non-formal Education Programs

Learning goals and qualifications in this module students learn to:**PLO :****PLO 1**

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 4

Continuous self-development and collaboration.

PLO 8

Able to design and implement Andragogy-based learning in Non-Formal Education and Community Education.

CLO :**CLO 1**

Understand and master theories and concepts about Leadership and Social Organization in Non-formal Education programs in a complete and contextual manner as the actualization of innovative, creative and quality lifelong learning principles (C1).

CLO 2

Analyse and make appropriate decisions in the context of problem solving through scientific development of Non-formal Education based on the results of information and data analysis (C4).

CLO 3

Mastering and able to evaluate the concepts and procedures of community development through a non-formal education approach that is critical, creative, cooperative, communicative, literate in information technology (IT), and has integrity and character (C5).

CLO 4

Create Non-formal Education programs that are based on devotion, independence and social entrepreneurship (C6).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*:

understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Type of course Core modul	Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Collaborative Learning, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Exam Paper (50%) Duration of Examination : Exam paper (300 Minutes)		SKS (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes /60 minutes = 136 hours/Semester (39.97 contact hours in class+47,96 hours of structured assignment+47,96 hours of self-study (together 135,89 hours) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class+47,96 hours of structured assignment+47,96 hours of self-study (together 135,89 hours)
Module coordinator Prof. Dr. I Ketut Atmaja Johny Artha, M.Kes		Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)
Additional teacher involved: Widya Nusantara, M.Pd		
Syllabus This course provides an understanding of the concepts, techniques, and methods of identifying learning needs and resources for individuals, institutions, and communities, as well as their utilization for planning non-formal education programs in the community. Lectures are conducted by providing explanations, discussions, assignments and practicums. the success indicators of this course are that students can identify and map community learning needs according to the potential of the community, then students can develop appropriate non-formal education programs. Identification of community learning needs is a process to reveal and understand what is needed by the community in terms of knowledge, skills, or information so that they can develop and adapt to their social, economic, and cultural environment. The steps in identifying community learning needs are Direct Observation, Surveys and Interviews, Focus Group Discussions, Social and Economic Data Analysis, Involving Local Stakeholders, Skill Gap Analysis, Community Participation, and Identification of Access and Barriers. Students are trained to carry out these stages to make it easier for them to develop community programs that suit their needs. The learning assessment method is done by participatory as well as test.		

Course Material

1. Community Empowerment Techniques
2. Planning Non-formal Education Programs
3. Application of Non-formal Education in Community Development
4. Andragogy-based Learning Principles
5. Designing Andragogy-based Learning Programs
6. Learning Needs Assessment in Non-formal Education
7. Identifying Resources for Non-formal Education
8. Data Analysis for Decision Making in Non-formal Education
9. Problem Solving in Non-formal Education
10. Community Development Models in Non-formal Education
11. Collaborative Approaches in Community Empowerment
12. Communication Skills for Community Development
13. Integration of Information Technology in Non-formal Education
14. Monitoring and Evaluation of Non-formal Education Programs

Learning goals and qualifications in this module students learn to:**PLO :****PLO 2**

Master community empowerment techniques to plan and apply Non-formal Education and Community Education programs

PLO 4

Able to design and implement Andragogy-based learning in Non-formal Education and Community Education

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs.

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs.

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education.

CLO :**CLO 1**

Mastering the theories and concepts regarding identifying Learning Needs and Resources in Non-formal Education programs completely and contextually as actualizing innovative, creative, and quality lifelong learning principles (C1).

CLO 2

Analyze theory and develop the Non-formal Education knowledge based on the results of information and data analysis (C4).

CLO 3

Evaluate the community development through a non-formal education approach that is critical, creative, collaborative, communicative, literate in information technology (IT), and has integrity and character (C5).

CLO 4

Able to Create Non-formal Education programs based on devotion, independence, and social entrepreneurship (C6).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502122	Module name Public Health Education		
Type of course Core module		Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Case Study.		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Class participation (50%) Examination (50%) Duration of Examination : Exam Paper (200 Minutes)			SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours))
Module coordinator Prof. Dr. I Ketut Atmaja Johny Artha, M.Kes			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: - Drs. Heru Siswanto, M.Si. - Dr. Shobri Firman Susanto, S.Pd., M.Pd.			
Syllabus This course discusses concepts, knowledge, and healthy attitudes/behavior to students about planning, and selecting strategies for health education efforts in the community. Health improvement efforts include promotive, preventive, curative, and rehabilitative efforts. In general, what is studied is the Definition and Concept of Public Health, Epidemiology, Environmental Health, Reproductive Health, Health Promotion, Health Management, Health Policy, Biostatistics, Community Nutrition, Mental Health in Society. Promotive efforts by conducting public health education so that changes in healthy behavior occur. This course aims to equip students with basic knowledge and practical skills in designing, implementing, and evaluating health programs aimed at improving the quality of life of the community. The success indicator of this course is if students can use effective communication to the community concerning delivering information related to health and education. Learning is carried out using lecture methods, and case studies, as well as individual and group assignments. Meanwhile, assessment is carried out with the participation of students as well as midterm and final exams.			

Course Material

1. Introduction to Public Health Education
2. Concepts and Objectives of Public Health Education
3. Community Empowerment in Public Health Education
4. Non-formal Education in Public Health
5. Planning Non-formal Public Health Education Programs
6. Designing Andragogy-based Learning for Public Health Education
7. Public Health Theories and Models
8. Public Health Issues and Challenges in Non-formal Education
9. Public Health Businesses and Their Role in Community Education
10. Implementing Public Health Education Programs in Communities
11. Positive Attitudes and Cooperation in Public Health Education
12. Collaboration with Health Organizations in Community Education
13. Effective Communication in Public Health Education (Oral and Written)
14. Ethical and Academic Standards in Public Health Education Communication

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Master community empowerment techniques to plan and apply non-formal and community education programs.

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms and ethics.

CLO :

CLO 1

Able to identify, define, and Implement the concepts and objectives of public health education (C3)

CLO 2

Analyze the cases about public health and discuss the problems solving (C4)

CLO 3

Able to implement positive character based on public health policy (A5)

CLO 4

Demonstrate a positive attitude and cooperation to realize non-formal education programs in the field of public health (A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620504231	Module name Basic Theory of Non Formal Education		
Type of course Core module		Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Case Study		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Class Participation (50%) Examination (50%) Durration of Examination: Exam Paper (300 Minutes)			SKS (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes /60 minutes = 136 hours/Semester (39.97 contact hours in class+47,96 hours of structured assignment+47,96 hours of self-study (together 135,89 hours) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class+47,96 hours of structured assignment+47,96 hours of self-study (together 135,89 hours)
Module coordinator Dr. Widodo, M.Pd.			Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)
Additional teacher involved: - Dr. Shobri Firman Susanto, M.Pd. - Dr. Wiwin Yulianingsih, M.Pd. - Dr. Rofik Jalal Rosyanafi, M.Pd.			
Syllabus This course provides an understanding of the basic concepts of Non-Formal Education, history, thoughts on PNF and informal figures, principles, characteristics of NFE, NFE linkages with the national education system to create a society fond of learning through explanations, discussions, and presentations. in this course it is discussed about non-formal education as education that is carried out regularly, consciously carried out, but not too strictly following fixed rules, as in formal education in schools. Because non-formal education is generally carried out not in the physical environment of schools, non-formal education is identified with out-of-school education. Therefore, non-formal education programs must be made in such a way as to be flexible but straightforward, but still attract the interest of education consumers. The indicator of the success of this course is if students can implement theory into the practice of Non-Formal Education. The learning methods carried out in addition to case studies are lectures, and group discussions. While learning assessment is carried out by tests (midterm and final exams) and student participation activities			

Course Material

1. Introduction to Non-formal Education
2. Curriculum Development in Non-formal Education
3. Fundamental Concepts of Non-formal Education
4. Resilience in Non-formal Education Programs
5. Collaborative and Adaptive Approaches in Education
6. Innovative Strategies in Non-formal Education
7. Inclusive Practices in Non-formal Education
8. Lifelong Learning Principles in Non-formal Education
9. Entrepreneurial Skills in Non-formal Education
10. Critical Thinking and Creative Problem Solving in Education
11. Effective Communication in Non-formal Education
12. Ethics and Professional Norms in Education
13. Analyzing Community Needs for Non-formal Education
14. Integrating Information Technology in Non-formal Education Programs

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Mastering the concept of Non-formal Education as a basis for curriculum development (C2).

CLO 2

Analyze theories of Non-Formal Education critically, creatively, innovatively, analytically, have a high work ethic, work together, build relationships and communicate effectively in the field of Non-formal Education (C4).

CLO 3

Internalize academic values, norms and ethics, and demonstrate an independent and responsible attitude towards work in their field of expertise (A5).

CLO 4

Organize the theories, concepts, principles of analyzing community needs as adults, as well as mastering information technology in implementing Non-formal Education programs (A4).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Additional teacher involved: - Desika Putri Mardiani, M.Pd. - Dr. Rofik Jalal Rosyanafi, M.Pd. - Tri 'Ulya Qodriyati, M.Pd.		
Syllabus This course studies the contribution of educational psychology to the world of basic education that connects various insights from learning theories found by foreign and domestic figures. This course discusses the meaning, scope, and contribution of educational psychology, learner development, and learning theories both discovered by foreign and domestic figures, aspects of personality that influence learning, learning difficulties, learning counseling guidance, and classroom management for effective learning. Lectures are carried out using direct learning, both online and offline, independent assignments, and group discussions. Course Material <ol style="list-style-type: none"> 1. Introduction to Non-formal Education and Community Education 2. Basic Concepts of Non-formal Education 3. The Role of Educational Psychology in Non-formal Education 4. Understanding Learner Development in Non-formal Education 5. Learning Theories and Their Application in Non-formal Education 6. Personality and Its Impact on Learning 7. Classroom Management in Non-formal Education 8. Decision-making in Educational Psychology for Non-formal Education 9. Identifying and Solving Learning Difficulties in Non-formal Education 		

10. Responsibilities in Managing Individual and Group Learning Performance
11. Active Involvement and Role Fulfillment in the Learning Process
12. Utilizing Learning Resources for Non-formal Education
13. ICT-Assisted Learning Media for Non-formal Education
14. Critical, Logical, and Creative Thinking in Education Practice

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Mastering the basic concepts of Non-formal Education to manage Non-formal Education and Community Education programs.

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

CLO :

CLO 1

Mastering the basic concepts of educational psychology, learner development, learning theory, and aspects of personality that affect learning, and non-formal classroom management aspects of personality that affect learning, and non-formal classroom management (C2).

CLO 2

Able to assess the concepts and theories within the scope of educational psychology that are relevant to solving cases of learning or learning difficulties in the scope of non-formal education (A3).

CLO 3

Responsible for individual and group learning performance, by showing active involvement in carrying out the tasks and roles assigned both individually and in groups during the learning process (A5).

CLO 4

Ready in Utilizing learning resources and ICT-assisted learning media to support learning implementation (P2).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502239	Module name Educational Sciences	
Type of course Core module	Semester / Rotation 1 st / Odd Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Examination (50%) Duration of Examination: Exam paper (200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours))
Module coordinator Dr. Heryanto Susilo, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: - Rivo Nugroho, S.Pd., M.Pd. - Dr. Shobri Firman Susanto, S.Pd., M.Pd. - Monica Widayawari, M.Pd.		
Syllabus The Educational Sciences course discusses the basic concepts of education, human nature and its development, the foundation of education, education as a system, the national education system, teachers as a profession, educational problems, educational innovations in Indonesia, and character education at formal and non-formal education. This course is designed to provide a theoretical and practical foundation for students who want to understand how the education system works and how to apply educational principles in various contexts. It also discusses the Definition of Education, the Philosophy of Education, the Psychology of Education, the Sociology of Education, Curriculum and Teaching, Education Management, and the Development of Education in Indonesia. The grading based on attendance, participation, and written exams.		
Course Material <ol style="list-style-type: none"> 1. Introduction to Non-formal Education and Its Role 2. Basic Concepts of Non-formal Education 3. Theoretical Foundations of Educational Psychology 4. Problem-Solving in Education: Theoretical and Practical Approaches 5. Application of Science and Technology in Education 6. Critical and Logical Thinking in Education 7. Systematic Problem-Solving Methods in Education 8. Creative Thinking in Educational Practices 		

9. Planning Non-formal Education Programs
10. Implementing and Evaluating Non-formal Education Programs
11. Making Informed Decisions in Education Based on Data Analysis
12. Collaborative Decision-Making in Education
13. Self-learning and Performance Responsibility in Education
14. Ethical Standards and Professionalism in Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Applying educational expertise and utilizing science and technology in solving problems related to education theoretically and practically and adapting to the situations faced (P2)

CLO 2

Analyze the theoretical concepts about education in depth and be able to formulate procedural problem-solving (C4).

CLO 3

Able to assess and organize the right decisions based on information and data analysis and be able to guide in choosing various alternative solutions independently and in groups. (A3, A4)

CLO 4

Able to implement the characteristic of self-learning performance, agreement with group colleagues in understanding basic educational concepts theoretically and practically, and properly applying relevant educational theories in their field of study. Theoretical and practical and able to adapt to the situations faced (C3, A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 1000002018	Module name Pancasila Education		
Type of course Core module		Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing Courses, Cooperative Learning, Case Study		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Exam/Tes (40%) Assignment (10%) Durration of Examination : Exam Paper (200 Minutes)			SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Muh. Ali Masnun, S.H., M.H.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Drs. Sumarno, M.Hum.			
Syllabus Pancasila Education course is a compulsory course that aims to equip students with an in-depth understanding of the values of Pancasila as the foundation of the Indonesian state and moral guidance in the life of society, nation, and state. In this course, it will be discussed about the concept and nature of Pancasila as the basis and ideology of the state and the nation's outlook on life. Students are able to master the basic concepts of Pancasila and are able to apply its values in personal, social, and professional contexts. Increase awareness and responsibility as a good citizen under the values of Pancasila. This course also examines Pancasila historically, juridically, and philosophically as its actualization in national and state life; Pancasila as the foundation in political ethics and the development paradigm and its implementation in the life of society, nation and state through assessment, presentation of concepts, discussions, case studies, and giving assignments both individually and in groups.			

Course Material

1. Introduction to Pancasila Education
2. The Urgency of Pancasila in National Education
3. Pancasila in the Context of National History
4. Pancasila as the Foundation of the State
5. Pancasila as a State Ideology
6. Philosophical Concepts of Pancasila
7. Pancasila as an Ethical System
8. Pancasila as the Basis for Science Development
9. Pancasila and the Development Paradigm
10. Pancasila as the National Character and Way of Life
11. The Norms of Divinity, Humanity, Unity, and Integrity in Pancasila
12. Pancasila's Role in Shaping National Identity
13. Pancasila as a Source of Ethical Standards
14. The Application of Pancasila Principles in Daily Life and Professional Ethics

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 6

Able to communicate both written and verbally by academic values, norms, and ethics.

PLO 8

Able to demonstrate a responsible and collaborative attitude by professional norms and ethics.

CLO :

CLO 1

Understand the concept of the urgency of Pancasila education, Pancasila in its studies history of the nation, Pancasila as the basis of the state, state ideology, philosophical system, ethics system, foundation for the development of science, paradigm for the development and actualization of Pancasila values by applying the principles of divine norms, humanity, unity and oneness (C2)

CLO 2

Describing Pancasila in National History (C2)

CLO 3

Analyzing Pancasila as a Philosophical system (C4)

CLO 4

Analyzing Pancasila as the basis of the state (C4)

CLO 5

Analyzing Pancasila as a way of life and national character (C4)

CLO 6

Analyzing Pancasila as an Ideology (C4)

CLO 7

Analyzing Pancasila as a Source of Ethics (C4)

CLO 8

Analyzing Pancasila as the Basis for the Development of Science (C4)

CLO 8

Analyzing Pancasila as a Development Paradigm (C4)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 1000002003	Module name Bahasa Indonesia	
Type of course Core module	Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Cooperative Learning, Case Study.	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Assignment (10%) Exam (40%) Durration of Examination : Exam paper (200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours))
Module coordinator Dr. Diding Wahyudin Rohaedi, M.Hum.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Prima Vidya Asteria, M.A.		
Syllabus The Indonesian language course discusses (1) the history, position, and function of the Indonesian language; (2) critical reading; (3) the characteristics of scientific Indonesian; (4) improved spelling; (5) scientific work; (6) writing proposals; (7) articles and papers; (8) editing; (9) quotations and reference lists, and (10) presentations. This course aims to improve students' ability to speak good and correct Indonesian, both orally and in writing, in accordance with linguistic rules and formal situations. Some of the main objectives of this course include: Understanding of Grammar, Scientific Writing Skills, Development of Speaking Skills, Use of Indonesian in Professional Contexts, Literacy and Literary Appreciation. Through this course, students are expected to be able to develop Indonesian language skills that support academic, professional, and effective communication needs. Learning activities are conducted through lectures, collaborative learning, and case studies. The assessment techniques of this courses are by participation and test.		

Course Material

1. History, Position, and Function of the Indonesian Language
2. Critical Reading Techniques and Their Functions
3. Scientific Indonesian Language: Characteristics and Usage
4. Spelling, Word Choice, and Sentence Construction in Scientific Writing
5. Understanding Paragraph Structure in Scientific Indonesian
6. Ethical Considerations in Scientific Work
7. Plagiarism in Academic Writing and How to Avoid It
8. Writing Proposals, Reports, and Articles in the Indonesian Language
9. Referencing and Citation Techniques in Academic Writing
10. Academic Writing Style and Formatting
11. Editing Scientific Writing for Clarity and Precision
12. Producing Popular Scientific Works
13. Creating Official Scientific Documents
14. Presentation Techniques for Scientific Work

Learning goals and qualifications in this module students learn to:

PLO :

PLO 6

Able to communicate both written and verbally by academic values, norms, and ethics

PLO 7

Using technology and information to solve problems according to their expertise

PLO 8

Able to demonstrate a responsible and collaborative attitude by professional norms and ethics.

CLO :

CLO 1

Analyzing the History, Position and Function of the Indonesian Language in the Form of Works (C4)

CLO 2

Analyze critical reading and explain the functions and techniques of critical reading product form (C4)

CLO 3

Analyzing the Characteristics of Scientific Indonesian (C4)

CLO 4

Evaluate spelling, word choice, sentences, and paragraphs in scientific use Indonesian (C4)

CLO 5

Analyzing ethics and plagiarism in scientific work in the form of products (C5)

CLO 6

Evaluate the writing of proposals, reports and articles (C4)

CLO 7

Analyzing academic skills: references and citations (C4)

CLO 8

Evaluating scientific writing (C5)

CLO 9

Creating popular and official scientific works (C6)

CLO 10

Able to apply presentation techniques by guided responses (P3)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502224	Module name Learning Strategies and Methods of NFE	
Type of course Core module	Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Discussion, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Exam (50%) Duration of Examination: Exam paper (200 Minutes) Performance		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator: Dr. Wiwin Yulianingsih, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Desika Putri Mardiani, M.Pd		
Syllabus This course provides an understanding and ability of the basic concepts and programs of non-formal and informal education, strategies and methods in learning non-formal and informal education, criteria in the implementation of strategies in non-formal and informal education programs, as well as various approaches in various programs organized by the government and the community through explanations, discussions, presentations and assignments. The indicators of success in this course are that students are able to understand the basic concepts and programs of non-formal and informal education as well as strategies and methods in learning non-formal and informal education. This course aims to equip students with knowledge and skills regarding learning strategies and methods applied in the context of non-formal education. Non-formal education includes educational programs outside the formal school system, such as community education, job training, courses, and adult education. At the end of the lecture, students are expected to be able to design, implement, and evaluate learning programs in the non-formal education sector by paying attention to the needs and characteristics of diverse learners		

Course Material

1. Introduction to Non-formal Education
2. Characteristics of Non-formal Education
3. Comparing Formal, Informal, and Non-formal Education
4. Understanding the Role of Non-formal Education in Society
5. Needs Analysis in Non-formal Education
6. Identifying Learner Characteristics in Non-formal Education
7. Dynamics and Challenges in Non-formal Education
8. Designing Effective Learning Strategies in Non-formal Education
9. Aligning Learning Objectives with Learner Needs in Non-formal Education
10. Adapting Learning Strategies to Different Educational Environments
11. Collaborative Approaches in Non-formal Education Programs
12. Innovative Practices in Non-formal Education
13. Lifelong Learning in Non-formal Education
14. Professional Norms and Ethics in Non-formal Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 10

Able to communicate both in writing and orally under academic values, norms and ethics.

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO:

CLO 1

Understand what is meant by non-formal education characteristics, as well as differences and similarities in formal and informal education. (C2)

CLO 2

Analyzing the needs of students in non-formal education environments, as well as understand the dynamics and challenges that exist in this educational environment. (C4)

CLO 3

Organize the learning strategies that suit the characteristics of students, learning objectives, and environment in non-formal education (A4)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502242	Module name NFE Comparison	
Type of course Core module	Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation Activities (50%) Test Exam (50%) Duration of Examination: Exam paper (200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Prof.Dr. I Ketut Atmaja Johny Artha, M.Kes.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Drs. Heru Siswanto, M.Si.		
Syllabus Students understand the comparison of types of NFE programs in various countries and the development of NFE programs in various countries. They are able to be responsible for the results of their work by comparing NFE programs in various countries in order to play a role as PNF program managers and empower the community. Comparative of Nonformal Education is one of the studies in the field of education that discusses and analyzes various systems, models, and approaches to Non Formal Education implemented in various countries. The aim is to understand the differences and similarities between non-formal or informal education systems and to study the factors that influence the successful implementation of out-of-school education programs in various social, cultural, economic and political contexts. This course aims to provide a broader insight into the important role of out-of-school education as an alternative to formal education, as well as a means of community empowerment in various contexts.		

Course Material

1. Introduction to Basic Concepts of Education
2. Overview of Non-formal Education: Definitions and Key Characteristics
3. Historical and Cultural Contexts of Non-formal Education in Indonesia
4. Types and Models of Non-formal Education Programs in Indonesia
5. Global Perspectives on Non-formal Education: Implementation in Various Countries
6. Comparative Analysis of Non-formal Education Practices Across the World
7. Ethical Considerations in Non-formal Education
8. Role of Religious, National, and Cultural Values in Non-formal Education
9. Developing Logical, Critical, and Systematic Thinking in Educational Practices
10. Planning, Implementing, and Evaluating Non-formal Education Programs
11. Utilizing Technology and Information for Effective Non-formal Education Programs
12. Problem-solving Approaches in Non-formal Education Using Technology
13. Professional Norms and Ethics in Non-formal Education
14. Student Responsibility in Decision-making and Academic Engagement

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious, national and cultural values, as well as academic ethics in carrying out their duties

PLO 3

Develop logical, critical, systematic and creative thinking in carrying out specific work in their field of expertise and in accordance with work competency standards in the relevant field

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 11

Able to utilize technology and information in solving problems in accordance with their field of expertise

PLO 12

Able to demonstrate a responsible attitude and collaborate in accordance with professional norms and ethics

CLO:

CLO 1

Understand the basic concepts of education (C2)

CLO 2

Organizing the function and the implementation of non formal dan informal education between Indonesia and the other countries (A4)

CLO 3

Analyzing the implementation of informal non-formal education in several countries in the world (C4)

CLO 4

Evaluate the resume of discussion about non formal and informal education implementation (C5)

CLO 5

Create the planning of non formal education programs in the future related to the result of the discussions ((C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a

particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502236	Module name Social Psychology	
Type of course Core module	Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Cooperative Learning, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Exam (50%) Duration of Examination: Exam Paper (200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Prof. Dr. Hj. Gunarti Dwi Lestari, M.Si., M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: - Monica Widyaswari, M.Pd. - Dr. Wiwin Yulianingsih, M.Pd. - Desika Putri Mardiani, M.Pd		
Syllabus This course provides an understanding of the concepts, meanings, approaches, methods, historical background of social psychology, personality, social behavior, patterns of application of social psychology theories and group dynamics through explanations, discussions, presentations and assignments. This course combines psychological theories with empirical studies to understand various social phenomena that occur in everyday life. In class, students discuss the results of their learning about social psychology through reading literature from books and media on the internet. The assessment of this course is taken from their active participation during lectures and quizzes, midterm and final exams. The success indicator of this course is if students are able to apply theories in learning social psychology to examples of social phenomena in society, then study them in discussions.		

Course Material

1. Introduction to Social Psychology and Its Application
2. Attribution Theory: Understanding How People Explain Behavior
3. Cognitive Dissonance Theory and Its Impact on Behavior
4. Social Identity Theory and Group Dynamics
5. Basic Concepts of Social Psychology: Social Perception, Attitudes, and Social Influence
6. Group Dynamics and Its Role in Social Behavior
7. Social Perception and Its Impact on Interpersonal Relations
8. Attitudes: Formation, Change, and Impact on Behavior
9. Social Influence: Conformity, Compliance, and Obedience
10. Culture and Its Influence on Individual and Group Behavior
11. Social Norms and Their Effect on Social Behavior
12. Conformity: Causes and Consequences in Social Contexts
13. Empowering the Community through Social Entrepreneurship in NFE
14. Ethical and Collaborative Attitudes in Community Empowerment and Non-formal Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs.

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 9

Able to empower the community and apply social entrepreneurship to the management of NFE institutions

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Understand major theories in social psychology, such as attribution theory, cognitive dissonance theory, and social identity theory (C2)

CLO 2

Analyze basic concepts such as social perception, attitudes, social influence, and group dynamics (C4)

CLO 3

Evaluate factors such as culture, social norms, and influencing conformity individual and group behavior in society (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502235	Module name Critical Education Theory	
Type of course Core module	Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Cooperative Learning, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Exam (50%) Participation (50%) Duration of examination: Exam Paper (200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Monica Widyaswari, M.Pd		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: - Dr. Rivo Nugroho, M.Pd. - Dr. Shobri Firman S, M.Pd.		
Syllabus The critical education theory course leads students to have an understanding and skills in analyzing the basics of community development through educational studies in the context of social reality. To ensure this understanding, it is necessary to provide material in the form of: the concept of philosophy and ideology of education, the politics of education played by the state, the concept of critical education, the concept of education about problems and critical education, educational methodology, training management, training media processing, educational visualization, and comparison of critical education with other educational concepts. This course provides an understanding of, social concepts, social facts, social theories and their development, critical theory and its originators, critical education, as well as derivative theories that developed in the modern era, the skills to analyze the basics of community development through educational studies in the context of social reality, through explanation, discussion and presentation through explanation, discussion and presentation. Indicators of success in this course if students are able to implement theory into the practice of Non Formal Education		

Course Material

1. Introduction to Critical Education: Concepts and Frameworks
2. Defining Social Concepts and Social Facts in Education
3. Social Theories and Their Role in Education
4. The Development of Social Theories Over Time
5. Understanding Critical Theory and Its Application in Education
6. Key Originators of Critical Theory and Their Contributions
7. Critical Pedagogy: Foundations and Key Ideas
8. The Role of Critical Education in Modern Society
9. Derivative Theories of Critical Education in the Modern Era
10. Linking Critical Theory to Non-formal Education and Andragogy
11. Community Empowerment and the Role of Critical Education
12. Adapting Critical Education to Lifelong Learning and Entrepreneurial Goals
13. Innovative Approaches to Education through Critical and Social Theories
14. Educators and Managers as Agents of Change in the Field of Training

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs.

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

CLO :

CLO 1

Understand the concept of critical education (C2)

CLO 2

Applying social concepts and social facts (C3)

CLO 3

Analyzing the concept of social theory and its development (C4)

CLO 4

Evaluate the concept of critical theory and its originators (C5)

CLO 5

Organize the concept of critical education and its derivative theories that have developed in the modern era in order to be able to act as educators and managers of the training field (A4)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502049	Module name Philosophy of NFE		
Type of course Core module		Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Cooperative Learning		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (50%) Exam Paper (50%) Duration of Examination: Exam paper (200 Minutes) Performance			SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self- study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self- study (together 90.61 hours)
Module coordinator Dr. Heryanto Susilo, S.Pd., M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Dr. Rofik Jalal Rosyanafi, M.Pd.			
Syllabus The Philosophy of Non-Formal Education (NFE) course provides an in-depth understanding of the philosophical foundations of non-formal education, including values, principles, and its role in individual empowerment and social transformation. Students will explore philosophical concepts such as epistemology, ontology, and axiology, and their relevance in non-formal education. This course also discusses the relationship between non-formal education and formal and informal systems, and its contribution to inclusive and sustainable community development. With a critical approach, students are expected to be able to design and evaluate non-formal education programs that have a positive impact.			
Course Material 1. Introduction to Religious Values in Education 2. The Role of Nationalism and National Culture in Education 3. Academic Ethics in the Context of Non-formal Education 4. Religious Values and Their Application in Non-formal Education Programs 5. The Relationship Between Nationalism and Education in the Non-formal Sector 6. Critical Thinking and Its Importance in Education Philosophy 7. Logical Thinking Skills in Analyzing Educational Philosophy 8. Philosophical Foundations of Non-formal Education 9. Basic Concepts of Non-formal Education: History, Scope, and Purpose 10. Designing Effective Non-formal Education Programs Based on Core Concepts 11. Evaluating Philosophical Principles in Non-formal Education			

- 12. Social and Cultural Contexts in Non-formal Education Implementation
- 13. Critical Attitudes Towards Non-formal Education Practices
- 14. Professional Responsibility in Implementing Sustainable Non-formal Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO 5

Mastering the basic concepts of Non-Formal Education to manage non-formal education programs

CLO :

CLO 1

Applying relevant religious values, nationalism and academic ethics in the implementation of non-formal education (C3)

CLO 2

Readiness to act the logical, critical and systematic thinking in analyzing the philosophy of non-formal education (P2)

CLO 3

Analyze the basic concepts of non-formal education as a basis for designing effective non-formal education programs (C4)

CLO 4

Evaluate the philosophical principles underlying the implementation of non-formal education in a social and cultural context (C5)

CLO 5

Having characters of a critical attitude and professional responsibility in utilizing philosophical values to support the sustainability of non-formal education (A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*:

understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502233	Module name Theories of Learning and Theaching in NFE	
Type of course Core module	Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Cooperative Learning, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Exam (50%) Participation (50%) Duration of Examination: Exampaper(200 Minutes)		SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Drs. Heru Siswanto, M.Si		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Widya Nusantara, M.Pd		
Syllabus This lecture generally aims to provide an understanding and ability of learning and learning theories, managing learning in the teaching-learning process to the maximum, starting with a discussion of the nature and understanding of learning in the teaching-learning process, discussion of learning theory begins with a discussion of learning theories, which prioritizes behavioristic learning theory and constructivistic learning theory and discussion of learning principles and their implications in PNF learning. Learning is carried out by lecturing in class discussing the results of reading literature, presenting the results of discussions and giving assignments. The indicator of the success of this learning is that students are able to understand the theories of learning that are integrated into the learning process of non-formal education and are able to map learning theories that are suitable for non-formal education programs.		

Course Material

1. Introduction to Community Empowerment in Non-formal Education
2. Understanding the Scope of Non-formal Education Programs
3. Techniques for Empowering Communities through Non-formal Education
4. The Process of Planning, Implementing, and Evaluating Non-formal Education Programs
5. Fundamentals of Andragogy and Its Application in Non-formal Education
6. Designing Andragogy-based Learning for Adult Learners
7. Theories of Learning: Definitions and Scope
8. The Evolution of Learning Theory Over Time
9. Behaviorism: Key Concepts and Educational Applications
10. Humanism: Theories and Practices in Education
11. Constructivism: Principles and Educational Strategies
12. Cognitive Learning Theory: Understanding the Role of Mental Processes
13. The Impact of Learning Theories on Non-formal Education Programs
14. Integrating Behaviorism, Humanism, Constructivism, and Cognitive Theory in Non-formal Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs.

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

CLO :

CLO 1

Analyzing the meaning and scope of learning theory (C4)

CLO 2

Analyzing the development of learning theories over time (C4)

CLO 3

Evaluate Behaviorism, Humanism, and Constructionist theories, and also cognitive (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502117	Module name Inclusive Education		
Type of course Core module		Semester / Rotation 2nd / Even Semester	Student capacity:
Teaching methods Lecturing, Group Discussion, Cooperative Learning		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation Activities (50%) Test Exam (50%) Duration of Examniation: Exam paper (200 Minutes)			SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self- study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self- study (together 90.61 hours)
Module coordinator Dr. Asri Wijastuti, M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Prof. Dr. Sujarwanto, M.Pd. Danis Ade Dwirisananda, S.Pd., M.Hum. Muhammad Nurul Ashar , S.Pd., M.Ed.			
Syllabus This course will examine in depth: The basic concept of inclusive education; Philosophy, basic principles and regulations; Diversity PDBK (characteristics) (law no 8 physical, mental and intellectual disabilities); Policy for implementing inclusive education in Indonesia (regulations, guidelines); The concept and implementation of inclusive education in Indonesia (which includes the Student Admission System, Identification and Assessment, Curriculum adaptation, Preparation of learning tools, Implementation of learning, Assessment); Management of inclusive education (8 principles basic education); Support System for Providing Inclusive Education; Accessibility and Assistive technology. Implementation discussion Inclusive education is intended for all students at all levels, types and units of education through the GDPK social paradigm approach by incorporating the noble values of Indonesian educational culture			

Course Material

1. Introduction to Religious Values, Nationalism, and National Culture in Education
2. Understanding the Role of Academic Ethics in Education
3. Developing Resilience, Collaboration, and Adaptive Learning in Educational Environments
4. Characteristics of Innovative and Entrepreneurial Mindsets in Education
5. Empowering Communities Through Non-formal Education (NFE) and Social Entrepreneurship
6. Ethics and Professionalism in Non-formal Education and Community Empowerment
7. Science and Technology in Inclusive Education: Tools for Information Acquisition
8. The Concept and Importance of Inclusive Education
9. Procedures for Implementing Inclusive Education in Schools
10. Identifying and Addressing Challenges in Implementing Inclusive Education Programs
11. Analyzing Assessment Data to Develop Solutions for Students with Special Needs
12. Making Educated Decisions for Students with Special Needs Based on Data Analysis
13. Alternative Solutions for Learning Challenges: Practical Applications
14. Responsibility in Managing and Evaluating the Effectiveness of Learning Programs

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character

PLO 9

Able to empower the community and apply social entrepreneurship to the management of NFE unit/institutions

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Analyzing science and technology as a tool for obtaining inclusive related information education and communicating it (C4)

CLO 2

Evaluate the concept of inclusive education, as well as its implementation and completion procedural problems (C5)

CLO 3

Evaluate understanding of students with special needs based on analysis information and assessment data to provide alternative solutions to learning problems in schools (C5)

CLO 4

Creating responsibility for the learning performance carried out (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502238	Module name NFE Profession		
Type of course Core module		Semester / Rotation 2nd / Even Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Cooperative Learning, Case Study		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation Activities (50%) Test Exam (50%) Duration of Examination: Exam paper (200 Minutes)			SKS (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self- study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self- study (together 90.61 hours)
Module coordinator Dr. Heryanto Susilo, M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Desika Putri Mardiani, M. Pd.			
Syllabus This course provides an understanding and ability of the concept of profession, types of NFE professions, the relationship between NFE and NFE professions, NFE professional ethics, and policies related to PNF professions through explanation, discussion, and presentation. The non-formal education profession discusses the potential job opportunities of non-formal education graduates and directs students to have the competencies needed in the future. It is expected that students build their personality branding well. The indicator of the success of this course is if students have a comprehensive understanding of the professions based on non-formal education, students are able to examine professional opportunities that can be developed in an ever-changing era. A course designed to equip students with professional knowledge, skills and attitudes in the context of non-formal education. Non-formal education includes education outside the formal channels (school or university) that is more flexible and diverse, such as courses, job training, community education, and community learning activities. The purpose of this course is to prepare students to work professionally in non formal education institutions, both in the public and private sectors, and to be able to make a significant contribution to human resource development.			

Course Material

1. Introduction to Non-Formal Education (NFE): Definition and Scope
2. Religious Values, Nationalism, and National Culture in Non-Formal Education
3. Academic Ethics in Non-Formal Education: Responsibilities and Standards
4. Developing Critical, Logical, Systematic, and Creative Thinking in NFE
5. The Role of Non-Formal Education in Society and its Impact on Lifelong Learning
6. Out-of-School Education: Theories and Concepts
7. Community Development and Empowerment Through Non-Formal Education
8. Approaches to Community Development: Critical, Collaborative, and Communicative Methods
9. Utilizing Information Technology (IT) in Community Empowerment and Non-Formal Education
10. Integrity and Positive Character in Non-Formal Education Settings
11. Promoting Positive Attitudes Towards Learning in Non-Formal Education Environments
12. Managing Non-Formal Education Programs: Planning, Implementation, and Evaluation
13. Independent Management of NFE Programs with a Focus on Entrepreneurship
14. Developing Entrepreneurial Skills and Applying Them in Non-Formal Education Programs

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs

CLO :

CLO 1

Understand and master theories and concepts about the out-of-school education profession completely and contextually (C2)

CLO 2

Applying community development concepts and procedures through an out-of-school education approach that is critical, cooperative, communicative and able to utilize IT as well as having integrity and positive character (C3)

CLO 3

Characterize positive attitudes towards learning (A5)

CLO 4

Creating a Non formal education program independently and in the field of entrepreneurship (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 1000002033	Module name Civics Education		
Type of course Core module		Semester / Rotation 3 rd / Odd Semester	Student capacity: 37 Students
Teaching methods Lecturing, Case Study, Collaborative Learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Exam Paper (40%) Assignment/Portfolio (10%) Participation (50%) Durration of Examination: Exam Paper (200 Minutes)			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90, 6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)
Module coordinator Mi'rojul Huda, S.IP., M.IP.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -			
Syllabus One of the manifestations of love for the homeland and nation can be implemented through enthusiastic learning about Pancasila and applying its values into daily life. Through Citizenship Education, it is hoped that a stronger sense of unity, love of the homeland and nation will be created by the younger generation and will continue to be ingrained into the next generation. This educational program contains discussions about nationality and citizenship related to the state, democracy, human rights and civil society in its implementation of democratic education. The close relationship between love of the homeland and nation accompanied by the spirit of defending the country can be realized by equipping students with material: Citizenship Education in developing graduate and professional abilities, the 1945 Constitution and statutory provisions under the Constitution, Obligations and Rights of Citizens, Indonesian Democracy is based on Pancasila and the 1945 Constitution, Fair law enforcement, Indonesian insight as a collective conception and view of Indonesian nationality, State defense and national resilience for Indonesia in building national commitment. This course is an introduction to the nature of Civics which is continued by discussing national identity; national integration; constitution; obligations and rights of the state and citizens; law enforcement and human rights (HAM); democracy; insight into the archipelago; national resilience; gender; and anticorruption education (PAK). Lectures are carried out with a case study analysis			

system, PBL, presentations and discussions, project-based learning (PjBL) assignments and reflections.

Course Material

1. Citizenship Education
2. Identitas Nasional
3. National Integration
4. Constitution
5. Obligations and Rights
6. Law enforcement and Human Rights
7. Democracy
8. Archipelago Insight
9. National Resilience
10. Gender
11. Anti-Corruption Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

CLO :

CLO 1

Analyzing learning resources and ICT-assisted learning media to extract data/information to identify and solve problems related to nationality and citizenship (C4)

CLO 2

Analyzing the concept of citizenship theory in the context of nation and state (C4)

CLO 3

Evaluate thought patterns, attitudes and action patterns that reflect self-confidence and grow pride as an Indonesian citizen and as an Indonesian nation and a feeling of love for the Indonesian nation homeland in the context of Pancasila values and morals, the 1945 Constitution The Unitary State of the Republic of Indonesia, the values and commitment of Bhinneka Tunggal Ika and the Unitary State Republic of Indonesia (C5)

CLO 4

Create decisions based on theoretical concepts of Citizenship Education to solve relevant problems that exist in society, nation and state (C6)

CLO 5

Characterize responsible attitudes and behavior that reflect being a good citizen in life society, nation and state (A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus This course discusses the conceptual study of non-formal education learning models which include understanding, characteristics, syntax and steps in implementing them. In addition, skills are needed in compiling reports on the results of the study and also developing non-formal education learning models. With the existence of various non-formal education institutions, it is necessary to test existing learning models, then it is hoped that new learning models will be found to further enrich the variety of nonformal education learning. The teaching materials presented are approaches and types of non-formal learning development, methods and models of collecting and analyzing program assessment data, developing non-formal program model prototypes, developing non-formal program model prototypes, compiling reports on the results of assessment and development of non-formal learning models. assessment and development of non-formal learning models. To guide lecture activities, learning methods are used in the form of discussions, mini practicum, questions and answers, and presentations. answer, and presentation. This course also provides an understanding of the history and concept of community education, the purpose and content of community education, the nature of community education in the national education system, the field of community education, as well as SPEM and 10 benchmarks of community			

education through explanation, discussion and presentation

Course Material

1. Community Education in the National Education System
2. Development of Community Education
3. Community Education Issues and Programs
4. Informal Education
5. Learning from Experience
6. Thinking and Implementation of Life Long Education
7. Community Learning Center
8. Community Education Programs

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 11

Able to utilize technology and information in problemsolving efforts according to their field of expertise.

CLO :

CLO 1

Analyzing the right decisions in order to solve problems through development non-formal education science based on the results of information and data analysis (C4)

CLO 2

Analyzing theories, concepts, principles of analysis of community needs after adulthood, and mastering information technology in implementing non-formal education programs (C4)

CLO 3

Create innovative and creative ideas in order to develop non-formal education program (C6)

CLO 4

Creating Non-formal Education programs based on piety, independence and social entrepreneurship (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502120	Module name Family Education and Parenting		
Type of course Core module		Semester / Rotation 3 rd / Odd Semester	Student capacity: 37 Students
Teaching methods Lecturing, Case Study, Problem-based Learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Exam Paper (50%) Participation (50%) Duration of Examination: Exam Paper (200 minutes)			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90, 6 hours/Semester (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class+31.98 hours of structured assignment+31.98 hours of self-study (together 90.61 hours))
Module coordinator Dr. Ali Yusuf, S.Ag., M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: <ul style="list-style-type: none">- Dr. Sjafiatul Mardiyah, S.Sos., M.A.- Widya Nusantara, S.Pd., M.Pd.			
Syllabus This course provides an understanding of education for families, the concept of parenthood education, the role of parents in community education, the nature of the family as a subsystem of national education, the family as part of the tri-center of education, and the role of family education in creating a society that likes to learn through explanation, discussion, assignment and practicum.The success indicator of this course is that students understand family education and parenthood education well. This course provides an understanding of the history and concept of community education, the purpose and content of community education, the nature of community education in the national education system, the field of community education, as well as SPEM and 10 benchmarks of community education through exposure, discussion, and presentation.			
Course Material 1. Family as an Element in Social Structure 2. Family Origin and Family Functions 3. Differences Between Non Formal and Informal Education Thought			

4. Education in the Family and Social Problems
5. Morals for Children
6. Socialization in the Family
7. Family and Society
8. Solving Social Problems In the Family
9. Preparing Family Casework

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Evaluating education program for families, parent education concept, the role of parents in public education, the nature of the family as a national subsystem education, the family as part of the tricerter of education, and the role of family education in creating community who like to learn in order to carry out their role as educators and managers of PNF (C5)

CLO 2

Creating a passionate community learning in order to carry out its role as an educator and NFE manager (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Type of course Core module		Semester / Rotation 3 rd / Odd Semester	Student capacity: 37 Students
Teaching methods Lecturing, Cooperative Learning, Case Study		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Exam Paper (50%) Participation (50%), 300 minutes Duration of Examination: Exam Paper (300 Minutes)			CU (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes / 60 minutes = 136 hours/Semester (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class + 47.96 hours of structured assignment+ 47.96 hours of self-study (together 135.89 hours)
Module coordinator Prof. Dr. I Ketut Atmaja JA. M. Kes.			Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)
Additional teacher involved: <ul style="list-style-type: none">- Dr. Widodo, M.Pd.- Dr. Heryanto Susilo, S.Pd., M.Pd.			
Syllabus This course provides an understanding and ability of the concept, nature and purpose of andragogy, assumptions and principles of adult learning, adult learning theories, organizing adult learning programs, approaches, methods, techniques and media as well as adult learning units through explanations, discussions, case studies and presentations. the indicators of the success of this course are that students have a good understanding of adult education and realize that adult education is part of lifelong learning. Students are directed to understand the learning characteristics of adults who have had many previous learning experiences, so they prefer if the learning process that is carried out is to prioritize appreciation of their achievements and self esteem. The learning methods in andragogy courses use lectures, case studies and cooperative learning. While the assessment in learning uses tests or midterm exams and final exams with the weight of each assessment is 50%.			
Course Material <ol style="list-style-type: none">1. Adult Education2. Pedagogy and Andragogy3. Implementation of Adult Education4. Needs and Participatory Learning5. Organizing Adult Education6. Learning Event Unit7. Community Learning Center			

8. Community Education Programs

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 10

Able to communicate both in writing and orally under academic values, norms and ethics

CLO :

CLO 1

Analyze the concept, essence and goals of andragogy, assumptions and principles of adult learning, adult learning theory (C4)

CLO 2

Creating programs, approaches, methods and community learning media adults and adult learning program units in order to act as educators and managers of non-formal and informal education (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus Understanding of development concepts and theories, community development methods, community development techniques, the relationship between community development methods and techniques, review of several community development methods and techniques. Understanding the conditions and problems of community life in Indonesia as a foundation and examining theories and approaches as well as methods and techniques of community development. Indicators of the success of this course are that students can understand the concepts and theories of community development methods, can study the relationship between community development methods and techniques and can review community development methods and techniques. The community development course aims to equip students to have a basic pattern in developing a diversity of empowerment originating from community potential. The complexity of events that occur in social life requires the younger generation to have the creativity to generate enthusiasm in developing human resources and the potential of the local area to realize community independence. To achieve this goal, the lecture material that will be discussed is: Basic concepts of development, community empowerment and community self-reliance in the context of community development, Community Empowerment through PNPM, Community Self-Reliance Agency, Principles and Capital of Community Development, Analysis of community development needs in the context of conventional development and community-based development, Participation, Group dynamics, Factors supporting community development, Analysis of Community Development Program Implementation. The learning methods used are lectures, discussions, presentations, case studies and assignments			

Course Material

1. Implementating Non Formal Education and Community Development
2. Analytical techniques
3. Developing Non Formal Education and Community Development
4. Development of Design and Analysis Tools
5. Concepts Community Development
6. Procedures for applying analytical techniques
7. Non Formal Education and Community Development Programs
8. Processing and analyzing data form analysis results

Learning goals and qualifications in this module students learn to:

PLO :

PLO 7

Able to utilize technology and information in solving problems according to their field of expertise

PLO 8

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics

PLO 9

Able to empower the community and apply social entrepreneurship to the management of NFE unitinstitutions

CLO:

CLO 1

Analyze the basic theory of the concept of community development approaches and paradigm (C4)

CLO 2

Evaluate information critically and objectively in relation to implementation of community development (C5)

CLO 3

Creating community development programs (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620503240	Module name Theory & Practice of Early Childhood		
Type of course Core module	Semester / Rotation 3 rd / Odd Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Case Study, Problem-based Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Exam Paper (50%) Participation (50%) Duration of Examination: Exam Paper (300 minutes)		CU (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes / 60 minutes = 136 hours/Semester (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours)	
Module coordinator Prof. Dra. Hj. Gunarti Dwi Lestari, M.,Si. M.Pd.		Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)	
Additional teacher involved: - Dr. Ali Yusuf, S.Ag., M.Pd.			
Syllabus This course provides an understanding of the nature of early childhood education, aims, functions and principles of early childhood education, approaches to early childhood education, character thinking, AUD development theory, play theory, multiple intelligences, early childhood education curriculum, PAUD learning models, Steam and Loose Parts, early childhood education implementation models. , as well as best practices for implementing early childhood education in Indonesia. Lectures are carried out by presenting theory in class and also by observing quality early childhood education institutions, to see directly the management of education and the implementation of theory from this course. Indicators of success in this course are if students can properly understand the material presented in class, are able to explain theory and apply it to the assignments given, and students are able to answer questions correctly regarding material regarding the theory and practice of early childhood education.			
Course Material 1. Nature of AUD, Purpose, Function, and Principles of ECD 2. Approaches in ECD 3. ECD Leaders' thoughts on ECD science 4. ECD Development Theory 5. Play Theory 6. Multiple Intelligences 7. Basic Concepts of early childhood education			

8. PAUD Curriculum
9. Preschool Learning Model
10. PAUD Implementation

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 11

Able to utilize technology and information in problemsolving efforts according to their field of expertise

PLO 12

Able to demonstrate a responsible and collaborative attitude under professional norms and ethics.

CLO :

CLO 1

Understand the theory and practice of Early Childhood Education (PAUD) completely and contextually, so that they are able to act as innovative, creative and quality PAUD managers (C2)

CLO 2

Analyzing the concepts and procedures for developing Early Childhood Education (PAUD) critical, creative, collaborative, communicative and information technology (IT) literate. information technology (IT) literacy (C4)

CLO 3

Evaluating Early Childhood Education programs that are based on devotion, independence, and social entrepreneurship (C5)

CLO 4

Creating the right decisions in the context of problem solving through non-formal education development knowledge based on the results of information and data analysis (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620503191	Module name Statistic		
Type of course Core module	Semester / Rotation 3 rd / Odd Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Practice-based Learning, Demonstration, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Exam Paper (50%) Participation (50%) Duration of Examination: Exam paper (300 minutes)		CU (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes / 60 minutes = 136 hours/Semester (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours)) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours))	
Module coordinator Dr. Sjafiatul Mardiyah, S.Sos., M.A.		Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)	
Additional teacher involved: - Monica Widyaswari, M.Pd.			
Syllabus This course is designed to help students master and analyze the substance of content and processes in statistics and apply and present data from statistical tests oriented toward active, innovative, creative, effective, and adaptive learning of science and technology in the context of solving problems. The material provided includes basic concepts of statistics, sampling and population, variables, and measurement scales (ordinal, nominal, interval, ratio); presentation of statistical data; data reliability and validity; parametric statistics and nonparametric statistics; descriptive statistics: frequency distribution, graphical presentation, central tendency, variability, normal distribution; inferential statistics: probability, sampling distribution, recommendations, z test, t-test, chi-square test; statistical test data using Microsoft Excel and SPSS. This course aims to provide an understanding and ability of descriptive statistical theory, measurement scale, central tendency, statistical test requirements, parametric and non-parametric statistics and statistical analysis using SPSS. lectures are conducted by providing material, introduction to statistical applications in the form of SPSS and then practice calculating using the SPSS application. the success indicators are that students are able to map research using statistical calculations, students are able to apply statistics to research, and students can use the SPSS application properly.			
Course Material 1. Quantitative research			

2. Data Measurement Scales
3. Diagram
4. Mean, Median, Modus and Data Presentation Techniques
5. Probability and its distribution, curves and standard normal distribution
6. Test parametric statistical requirements
7. Test of the difference between two means (t-test), Student's t-distribution table
8. Kruskal Wallis Test
9. Wilcoxon and Mann-Whitney tests
10. The Use of ICT in Analyzing statistic

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms and ethics

PLO 11

Able to utilise technology and information in problem solving efforts according to their field of expertise

CLO :

CLO 1

Analyze research concepts and procedures so that you are able to design and implement them research in the field of Non-formal Education critically, creatively, collaboratively, communicatively, literate in information technology (IT), and have integrity and character (C4)

CLO 2

Evaluate skills to carry out the steps to conduct research in a research design (C5)

CLO 3

Characterize positive attitudes to participate in learning well (A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502234	Module name Physical & Fitness Education		
Type of course Core module		Semester / Rotation 3 rd / Odd Semester	Student capacity: 37 Students
Teaching methods Performance Assessment, Practice based learning, Project Based learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Assignment / Portfolio (10%) Performance (40%) Product/Project (50%) Duration of Examination : Exam Paper (200 minutes), Performance, Product			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours))
Module coordinator Fajar Eka Samudra, S.Or., M.Kes.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: - Dr. Kunjung Ashadi, S.Pd., M.Fis., AIFO.			
Syllabus Physical education is a course that provides understanding and mastery of the nature, function and objectives of physical education. Provides introduction to and experience in carrying out various sports and game activities to be used to increase the level of physical activity in accordance with recommendations from various research and WHO. Apart from that, students gain experience in developing physical education programs for themselves in an effort to improve and maintain physical fitness. Students have experience in measuring physical fitness levels using various measurement methods. Students have understanding and experience in determining indicators and measuring ideal body shape based on various methods. As an additional competency, students learn about sports management and competition systems			
Course Material 1. Implementation of Physical Education 2. The meaning of physical freshness, physical freshness components, exercise programs 3. Physical fitness test 4. Recreational sports by doing traditional games 5. Sports and aerobic gymnastics			

6. Sports Concept

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned.

PLO 8

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics

CLO :

CLO 1

Applying knowledge about fitness (C3)

CLO 2

Analyzing physical skills (C4)

CLO 3

Having character of positive mental and emotional health (A5)

CLO 4

Creating an attitude of discipline and responsibility (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

MODUL OF HANDBOOK

FOR ACQUIN

UNDERGRADUATE PROGRAM OF
NON FORMAL EDUCATION

SEMESTER 4

TABLE OF CONTENTS

1. Teaching Skills and Microteaching
2. NFE Management
3. Theory and Practice of Community Empowerment
4. Education and Training Management
5. Development of NFE Curriculum
6. Development of Media and Teaching Materials
7. Evaluation of Non-Formal Education Programs
8. Research Methodology
9. Entrepreneurship

Module number 8620502227	Module name Teaching Skills And Microteaching		
Type of course Core module		Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students
Teaching methods Lecturing, Project-based Learning, Practice-based Learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Performance (50%) Product/Project (50%), Duration of Examination: Performance Product			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours))
Module coordinator Dr. Rivo Nugroho, S.Pd., M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: <ul style="list-style-type: none">- Drs. Heru Siswanto, M.Si.- Dr. Wiwin Yulianingsih, S.Pd., M.Pd.- Dr. Mustakim, S.Pd., M.Pd.- Tri 'Ulya Qodriyati, M.Pd.			
Syllabus The field experience program is a course that equips students to design, implement and evaluate learning through lectures. Simulation and microteaching. Understanding and ability about the meaning and objectives of teaching practice 1, preparing students as learning managers, learning tutors, planning in implementing educational activities outside of school. Lectures are carried out by giving students the freedom to choose the type of non-formal education program, but are limited to 4 types of programs, after which students are grouped into each type of non-formal education program and carry out teaching practice. Students are asked to complete the learning tools before carrying out microteaching practices. learning is carried out using a simulation method, participants who do not appear to teach act as students, and those who appear act as non-formal education educators			
Course Material 12. Basics of Teaching 13. Learning guide 14. Basic Learning 15. Types of basic teaching skills			

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate religious values, nationalism and national culture, as well as academic ethics in carrying out their duties

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

CLO :

CLO 1

Understand appropriate learning tools, strategy, and model (C2)

CLO 2

Applying the role as an educator in the field of non-formal education (C3)

CLO 3

Evaluating the implementation of learning activities and implement competence as a professional educator (C4, C5)

CLO 4

Creating comprehensive teaching techniques in non-formal education fields (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620504089	Module name NFE Management		
Type of course Core module		Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students
Teaching methods Lecturing, Case study , Cooperative Learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Exam Paper (20%) Assignment (10%) Participation (50%) Performance (20%) Duration of Examination: Exam paper (200 minutes) Performance			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)
Module coordinator Dr. Rofik Jalal Rosyanafi, M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: - Dr. Ali Yusuf, S.Ag., M.Pd. - Dr. Widodo, M.Pd.			
Syllabus This course provides understanding and abilities about theories, concepts, meanings, history, figures and their thoughts, management functions, as well as their implementation in Non-Formal and Informal Education programs through explanations, discussions and presentations. Lectures are carried out with material presentations, discussions and assignments. The indicator for this course is the student's ability to carry out management stages starting from planning, implementation, monitoring, to evaluation in its implementation in non-formal education programs. The Non-formal Education Management (NFE) course discusses management concepts, principles and practices applied in non-formal education, such as course institutions, community learning activity centers (PKBM), and skills training programs outside formal education (schools and universities).			
Course Material 1. Management Development 2. Administration Management 3. PNF management function 4. Manage Non Formal Education 5. Planning 6. Organizing Concept 7. Meaning of assessment			

8. Meaning of coaching, scope, approach, monitoring and reporting procedures

Learning goals and qualifications in this module students learn to:

PLO :

PLO 5

Mastering the basic concepts of Non-Formal Education to manage non-formal education and community education programs.

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

CLO :

CLO 1

Understand and be able to apply principles, concepts, meanings and thoughts of management figures (C2)

CLO 2

Implementing management using information and communication technology field of training and community empowerment (C3)

CLO 3

Analyzing as an educator and manager in the fields of training, community empowerment, and non-formal and informal education (C4)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620503199	Module name Community Empowerment Theory and Practice		
Type of course Core module	Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Survey, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Exam Paper (20%) Participation (50%) Portofolio (20%) Performance (10%) Duration of Examination: Exam paper (200 minutes) Performance		CU (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes / 60 minutes = 136 hours/Semester (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours)	
Module coordinator Dr. Heryanto Susilo, S.Pd., M.Pd.		Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)	
Additional teacher involved: <ul style="list-style-type: none">- Dr. Sjafiatul Mardiyah, S.Sos., M.A.- Desika Putri Mardiani, M.Pd.- Prof. Dr. I Ketut Atmaja Johny Artha, M.Kes.			
Syllabus This course aims to prepare students to contribute to improving the quality of community life in accordance with the scope of the non-formal education field in community empowerment efforts. Empowerment efforts are carried out by developing relationships and social relations in society, understanding and analyzing the potential that can be developed, identifying community changes and their relationship to the importance of empowerment efforts, empowerment strategies, conceptual foundations, stages, and practices of empowerment in participatory community groups. To realize this, the following lecture materials are given: Approaches in Community Development, Social Welfare Development, Community Development, Community Development, Ecology and Social Justice A vision for Community Development, Non-formal Education as a strategy in community empowerment practices, community-based development planning and evaluation, community-based resource management, program planning, empowerment models, social assistance, participatory approaches and techniques. The learning strategies in lectures are discussion, question and answer, lecture, practice, and mini research.			
Course Material <ul style="list-style-type: none">1. Community Empowerment2. Meaning, Goals and benefits of empowerment3. Community development and empowerment4. Community assistance			

5. Mentoring strategies, methods and techniques
6. Material regarding community empowerment evaluation

Learning goals and qualifications in this module students learn to:

PLO :

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education and community education programs

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 9

Able to empower the community and apply social entrepreneurship in the management of Non Formal Education unit institutions

CLO :

CLO 1

Apply the principles of independence, cooperation, honesty and self-confidence in learning both in groups and individually (C3)

CLO 2

Analyzing basic theories regarding the concept of community development approaches and paradigm (C4)

CLO 3

Evaluate information processing skills critically and objectively in relation to implementation community development (C5)

CLO 4

Creating skills in managing community development programs (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus The aim of training courses in general is to provide students with the skills and knowledge needed to become more competent in a particular field. This course provides understanding and abilities about theories, concepts, meanings, history, figures and their thoughts, management functions, as well as their implementation in Non-Formal and Informal Education programs through explanations, discussions and presentations. Beside that, this course aim to Develop Practical Skills, Increasing Professional Competence, Linking Theory with Practice. Indicators of the success of this course are students being able to understand basic concepts and know about their implementation in non-formal and informal education programs. By taking training courses, students are expected to be better prepared to face challenges in the profession they will undertake.			
Course Material 1. Management and Training Concepts			

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and under the work competency standards of the field concerned

PLO 4

Continuous self-development and collaboration

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs.

CLO :

CLO 1

Applying principles, concepts, meaning, thinking management figures, management functions using information and communication technology in the fields of training, community empowerment, to be able to act as educators and managers in the fields of training, community empowerment and non-formal and informal education (C3)

Classification of cognitive skills following Bloom (1956):

Module number 8620502139	Module name Development of NFE Curriculum		
Type of course Core module	Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Project-based Learning, Practice Based Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Participation (50%) Product (50%) Duration of Examination: Exam paper (200 minutes) Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)	
Module coordinator Prof. Dr. Yatim Riyanto, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)	
Additional teacher involved: - Dr. Rivo Nugroho, M.Pd. - Dr. Ali Yusuf, S.Ag., M.Pd. - Dr. Shobri Firman Susanto, S.Pd., M.Pd.			
Syllabus This course provides an understanding of the basic philosophy of curriculum, understanding of curriculum, curriculum components, curriculum planning and design, the role of teachers (tutors) in curriculum development, curriculum concept models, non-formal education curriculum development models and curriculum evaluation through explanations, discussions, presentations and assignments. The assessment indicators for this course are students being able to understand the basic philosophy of the curriculum, understanding the curriculum, curriculum components, curriculum planning and design, the role of the teacher (tutor) in curriculum development. focuses on understanding, analysis, and skills in developing a curriculum that suits the needs of nonformal education. This course covers the basic theory of curriculum development, curriculum approaches and models, as well as curriculum application in non-formal education contexts such as community education, skills courses, job training, or community empowerment programs. This course provides students with insight into being able to design a curriculum that is responsive to social and economic needs, and can be applied in various non-formal education settings such as Course and Training Institutions (LKP), Community Learning Activity Centers (PKBM), and similar institutions.			
Course Material 1. Understanding Curriculum and Curriculum Development Objectives 2. Philosophical and Psychological Foundations of curriculum development 3. Socio-Cultural Founfations 4. Curriculum concept models			

5. Curriculum evaluation concept
6. Nature of Equal Education
7. Curriculum in Education
8. Nature of Course and Training
9. Characteristics of PAUD

Learning goals and qualifications in this module students learn to:

PLO :

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education and community education programs.

PLO 7

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 9

Able to utilize technology and information in problem solving efforts according to their field of expertise

CLO:

CLO 1

Understand curriculum concepts and theories, foundations of curriculum development, curriculum concept models, curriculum analysis, curriculum design, curriculum development, curriculum evaluation, Ktsp, K-13, Equal Education Curriculum Development, SKKNI, PAUD Curriculum, Equality Curriculum (C2)

CLO 2

Creating and developing a non-formal education curriculum (C6)

CLO 3

Actively evaluate during the lecture process (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620503143	Module name Development of NFE Media and Teaching Materials		
Type of course Core module	Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Project-based Learning, Cooperative Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Performance (50%) Product (50%) Duration of Examination: Exam Paper (200 minutes) Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)	
Module coordinator Prof. Dr. Gunarti Dwi Lestari, M.Si., M.Pd		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)	
Additional teacher involved: - Widya Nusantara, S.Pd., M.Pd.			
Syllabus This course aims to provide a comprehensive understanding of the function and role of learning media in the successful implementation of non-formal learning. The aim of the Learning Media and Teaching Materials Development course is to provide students with understanding and skills in designing, developing and implementing effective media and teaching materials in the learning process. Learning media is a good learning tool to create an effective and appropriate learning atmosphere. The development of learning media to support non-formal learning can be studied through discussions regarding the role and function of educational game tools (APE), stages of learning media development, types, requirements and principles for making APE, culture-based APE, used materials and natural ingredients. APE's position and position as a distributor and demonstration of knowledge transfer makes it an important role in the learning process. Thus, lectures are carried out using the lecture method, practice of making APE, presentations, and discussions and questions and answers. The indicator of achievement in this course is that students are able to identify the need for early childhood learning media that is adapted to the child's age and also the developmental needs they are going through, then students are able to create learning media to support the growth and development of students.			
Course Material 1. Media and the use of media in the learning process 2. Basic functions of PLS Learning Media			

3. Types of media based on student characteristics
4. Problems of media mastery in the PLS Program
5. Media production planning
6. Media development
7. Simulation media
8. Print media
9. Three-dimensional media
10. Look and Listen media
11. Evaluation of the use of learning media
12. Instructional Media

Learning goals and qualifications in this module students learn to:

PLO :

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education and community education programs.

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 11

Able to utilize technology and information in problem solving efforts according to their field of expertise

CLO :

CLO 1

Understand theoretically the concepts and requirements for making APE (C2)

CLO 2

Applying concepts and principles of learning media development by utilizing the surrounding environment (C3)

CLO 3

Analyzing learning media to support various learning processes appropriate type of non-formal education program (C4)

CLO 4

having Characteristic of the attitude of responsibility, dare to convey logical ideas in every matter implementation of learning (A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502248	Module name Evaluation Non-Formal education		
Type of course Core module	Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Practice Based Learning, Case Study	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Performance (50%) Product (50%) Duration of Examination: Exam paper (200 minutes) Performance		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)	
Module coordinator Dr. Widodo, M.Pd		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)	
Additional teacher involved: <ul style="list-style-type: none">- Monica Widyaswari, M.Pd.- Dr. Heryanto Susilo, S.Pd., M.Pd.			
Syllabus This course examines the concept of evaluation, evaluation objectives, evaluation criteria, evaluation approaches, and elements being evaluated, evaluation models, contain evaluation models that can be developed. Evaluation methods, containing evaluation methods in NFE, the relationship between evaluation methods and evaluation elements, and the use of evaluation methods. Evaluation techniques and data, reviewing evaluation techniques and evaluation data. Data processing in program evaluation, contains data processing and analysis, use of statistics in evaluation, and operational variables. Technical instructions for preparing evaluation reports, and discussing how to systematically evaluate evaluation reports. Assessment indicators in this course, students can understand the concept of evaluation, evaluation objectives, evaluation criteria, evaluation approaches, and elements being evaluated, evaluation models, contain evaluation models that can be developed . An indicator of the success of this course is if students are able to apply management knowledge, especially the program evaluation section.			
Course Material <ol style="list-style-type: none">1. Program Evaluation concept2. Implementing evaluation of non formal education programs3. Retrieval of PNF Program Evaluation data4. Analysis of PNF Program Evaluation data5. PNF Program evaluation variables6. Systematic PNF Program evaluation reports			

Learning goals and qualifications in this module students learn to:

PLO :

PLO 5

Mastering the basic concepts of Non-Formal Education to manage non-formal education programs

PLO 6

Mastering community empowerment techniques to plan and apply to non-formal education programs

PLO 7

Able to utilise technology and information in problem solving efforts according to their field of expertise

PLO 11

Able to utilize technology and information in problemsolving efforts according to their field of Expertise

CLO :

CLO 1

Understand the basic concepts of Non-Formal Education to manage non-formal education and community education program (C2)

CLO 2

Applying community empowerment techniques to plan and implement non-formal education and community education programs (C3)

CLO 3

Analyzing the process of planning, implementing and evaluating non-formal education and community education program (C4)

CLO 4

Evaluate technology and information in solving problems according to their field expertise (C4)

CLO 5

Creating concepts, meaning, goals, SPEM and its benefits evaluation in accordance with the PNF program and providing the ability to carry out techniques, approaches, methods in conducting PNF evaluations in order to act as education and PNF managers as well as community empowerment (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620503098	Module name Research Methodology		
Type of course Core module	Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Practice-based Learning, Project-based Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Exam Paper (10%) Participation (20%) Portofolio (20%) Product (50%) Duration of Examination: Exam Paper (200 minutes) Product		CU (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes / 60 minutes = 136 hours/Semester (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours)) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours))	
Module coordinator Prof. Dr. Yatim Riyanto, M.Pd		Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)	
Additional teacher involved: - Monica Widyaswari, M.Pd. - Dr. Sjafiatul Mardliyah, S.Sos., M.A.			
Syllabus This course discusses; (1) basic concepts of research methodology (paradigms, concepts, prepositions, theories, methodologies, approaches, research designs and procedures, identification and formulation of research problems, research variables, theoretical studies, frameworks of thought, research hypotheses, research questions, research populations, samples and sampling techniques, research subjects and settings, research instruments, data collection techniques, data analysis techniques), (2) Types of research relevant in PLB (Experiment, SSR, Expost Facto, PTK, Phenomenology), (3) Preparation and dissemination of pre thesis proposals along with research instruments, (4) thesis preparation and scientific article writing techniques in journals, (5) Technical submitting articles to international journals. The indicators of this course are that students are able to understand the theory and have competence in the application of methods in carrying out research, data collection techniques, data processing techniques, data analysis techniques, and conclusions.			
Course Material 1. Learning contracts 2. Research Methods 3. Educational problems in Indonesia 4. Educational research 5. Problems, research variables, theoretical basis, framework and hypothesis submission 6. Qualitative research 7. Data collection procedures			

8. Data analysis procedures
9. Designing research methods

Learning goals and qualifications in this module students learn to:

PLO :

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms and ethics

PLO 11

Able to utilise technology and information in problem solving efforts according to their field of expertise

PLO 12

Able to show a responsible and collaborative attitude in accordance with professional norms and ethics

CLO :

CLO 1

Analyze research concepts and procedures so that you are able to design and implement them research in the field of Non-formal Education critically, creatively, cooperatively, communicatively, literate in information technology (IT), and has an integrative nature and character (C4)

CLO 2

Having a readiness to use skills of research method regarding the importance of mastering the latest education Research methodology (P2)

CLO 3

Implementing a positive attitude to participate in learning well (C3)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620503217	Module name Entrepreneurship		
Type of course Core module	Semester / Rotation 4 th / Even Semester	Student capacity: 37 Students	
Teaching methods Lecturing, Project-based Learning, Collaborative Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Participation (20%) Product (50%) Performance (30%) Duration of Examination: Exam Paper (200 minutes) Performance Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90,67 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours))	
Module coordinator Widya Nusantara, S.Pd., M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)	
Additional teacher involved: - Dr. Widodo, M.Pd.			
Syllabus This course provides an understanding of the concepts and nature of entrepreneurship, social entrepreneurship, developing entrepreneurial motivation, identifying business opportunities, creating business opportunities, and the ability to practice social entrepreneurship in relation to community empowerment through explanation, discussion and practicum. Indicators of the success of this course if students are able to implement theory into the practice of Non Formal Education, Students are able to apply the creation of entrepreneurial opportunities and are able to develop them. The practice of entrepreneurship lectures is carried out by pouring student ideas into the form of providing goods and services in accordance with student goals and is expected to be a solution to community needs.			
Course Material 1. Entrepreneurship 2. Business opportunities 3. Competencies that an entrepreneur must have 4. Implement an entrepreneurial proposal (business plan) 5. Entrepreneurship for beginners 6. Practice of social entrepreneurship			

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 4

Continuous self-development and collaboration.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 9

Able to empower the community and apply social entrepreneurship to the management of PNF unit institutions

CLO :

CLO 1

Apply knowledge and understanding of basic entrepreneurship concepts (C3)

CLO 2

Analyze knowledge and understanding of basic concepts of entrepreneurship and business alternative (C4)

CLO 3

Evaluate knowledge and understanding of the personal characteristics of a leader in their field entrepreneurship, ideas/forms of business in the field of physical education (C5)

CLO 4

Creating ideas/forms of business in the fields of physical education, sports education and recreational sports (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Additional teacher involved: -			
Syllabus The MBKM (Merdeka Belajar Kampus Merdeka) BKP Program Planning course is a course designed to equip students with skills in planning and managing activity programs related to independent and collaborative learning. This course aims to develop students' abilities in compiling programs that are oriented towards real results, connecting theory with practice, and encouraging active participation in the world of work, industry, and social projects. Through this course, students are taught to understand various important aspects of program planning, including identifying needs, managing resources, determining specific and measurable goals, and evaluating program success. During this course, students will gain direct experience in compiling and presenting programs that are relevant to their fields of study or interests in a series of BKP (Learning Activity Forms) activities offered by MBKM. They will be encouraged to work collaboratively, use innovative approaches, and apply project management methods in every stage of planning. The MBKM BKP Planning Program also emphasizes the importance of collaboration with external partners such as industry, non-profit organizations, or government to increase the relevance and impact of the designed program. This course forms a strong foundation for students in designing programs that support continuous learning and active contribution to community development.			
Course Material 1. Preparing the Implementation of Merdeka Belajar 2. Merdeka Belajar Kampus Merdeka Guidelines			

3. The Strategy of MBKM
4. Proceedings of the 4th International Conference on Sustainable Innovation 2020 – Social, Humanity, and Education
5. UMI's Adaptive Public Relations and Publicity Framework
6. Regulation and Implementation of Merdeka Belajar – Kampus Merdeka
7. Developing Autonomous Learning through MBKM Programs
8. Innovation and Transformation in Higher Education: MBKM Policies. Springer
9. The Role of Universities in Implementing MBKM

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 2

Mastering the process of planning, implementing and evaluating non-formal education programs

CLO :

CLO 1

Analyzing the needs and potential of the BKP (Form of Learning Activities) program by applying program planning principles systematically and based on evidence (C4)

CLO 2

Implement relevant independent and collaborative learning programs MBKM by considering resources, external partners and stakeholders involved (C3)

CLO 3

Evaluate project management techniques in implementing and monitoring the MBKM BKP program to ensure program implementation goes according to plan (C5)

KLO 4

Evaluate the effectiveness and impact of designed programs, and deliver them recommendations for improvements for future programs (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number	Module name Analysis of Program Needs BKP MBKM		
Type of course Core module		Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students
Teaching methods Project-Based Learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Participation (20%) Performance (30%) Product (50%) Duration of Examination: Product			CU (+Workload in hrs) 4 Credits x 16 meetings x 170 minutes / 60 minutes = 181 hours/Semester (53.29 contact hours in class + 63.95 hours of structured assignment + 63.95 hours of self-study (together 211.19 hours)) ECTS (+Workload in hrs) 4 Credits x 1.59 = 6,36 ECTS (53.29 contact hours in class + 63.95 hours of structured assignment + 63.95 hours of self-study (together 211.19 hours))
Module coordinator Dr. Rofik Jalal Rosyanafi, M.Pd.			Semester week hours: 16 meetings x 45.3 hours x 4 CU
Additional teacher involved: -			
Syllabus The Analysis of Program Needs BKP MBKM course aims to equip students with the ability to identify program needs that are relevant to the context of Merdeka Belajar Kampus Merdeka (MBKM). In this course, students learn to conduct an in-depth analysis of the needs of various stakeholders, including students, educational institutions, and external partners. A data-based and participatory approach is used so that students are able to design programs that are in accordance with the dynamics of the social, cultural, and work environments. Students will also learn various data collection methods, such as surveys, interviews, and observations, to obtain valid and accurate information in the program planning process. In addition, this course encourages the development of critical, creative, and systematic thinking skills in analyzing problems and opportunities in the surrounding environment. Students will be trained to use technology and information in data processing, as well as produce evidence-based recommendations for BKP MBKM program planning. This course is an important foundation in planning non-formal education programs or community development programs, so that students are able to formulate programs that are right on target, effective, and have a significant impact on the development of society and the world of work.			
Course Material 1. Preparing the Implementation of Merdeka Belajar 2. Merdeka Belajar Kampus Merdeka Guidelines			

3. The Strategy of MBKM
4. Proceedings of the 4th International Conference on Sustainable Innovation 2020 – Social, Humanity, and Education
5. UMI's Adaptive Public Relations and Publicity Framework

8. Innovation and Transformation in Higher Education: MBKM Policies. Springer
9. The Role of Universities in Implementing MBKM

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO 2

Mastering community empowerment techniques to plan and apply to non-formal education programs

CLO :

CLO 1

Analyzing the needs of the BKP MBKM program through data-based methods and a participatory approach, taking into account stakeholder needs and environmental social dynamics (C4)

CLO 2

Applying various data collection methods, such as surveys, interviews, and observation, to obtain valid and in-depth information regarding program needs (C3)

CLO 3

Evaluate evidence-based and oriented program planning recommendations towards problem solving or opportunity development in the context of BKP MBKM (C5)

CLO 4

Organize technology and information in the process of collecting, processing and analyze data to identify needs for the MBKM BKP program (A4)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus Innovation Design of Education and Training BKP MBKM course is designed to equip students with innovative skills in designing and implementing education and training programs, especially in the context of non-formal education. This course emphasizes the andragogical approach, namely adult learning, and how to integrate the latest technology and methods in designing effective learning programs that are in accordance with community needs. Students will be invited to understand the various challenges and opportunities in the world of education, as well as how to respond to change in a creative, adaptive, and entrepreneurial way. In addition, this course also encourages the development of innovative entrepreneurial characters in the management of non-formal education and training programs. Students will be trained to collaborate in teams, develop innovative solutions, and apply the principles of community empowerment through education. By understanding the process of planning, implementing, and evaluating programs, students are expected to be able to create education and training designs that are not only relevant to local needs, but also sustainable in the long term. This course provides a strong foundation for internalizing the values of professionalism, academic ethics, and collaboration in a dynamic educational environment.			
Course Material 1. Play to Learn 2. Make It Stick			

3. Design for How People Learn
4. Blended Learning: What Works in Talent Development
5. The Design Thinking Toolbox
6. The Action Mapping Approach to Training Design
7. Digital Pedagogies, Teaching Innovation and Learning Design
8. The Lean Startup
9. Iterative Project Management to Achieve Results
10. Tactics for Disruptive Thinking

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 2

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education.

CLO :

CLO 1

Analyzing innovation-based education and training models by considering andragogical approaches and adult learning needs (C4)

CLO 2

Applying technology and information in designing innovative education and training solutions that comply with professional competency standards (C3)

CLO 3

Evaluate creative and innovative entrepreneurial character in managing non-formal education programs and community empowerment through training and education (C5)

CLO 4

Creating team collaboration to design and evaluate education and training programs in accordance with academic and professional ethics (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus The Implementation of Innovation Design of Education and Training BKP MBKM course aims to equip students with the ability to design and implement innovation-based education and training programs, especially in the context of non-formal education. Students will be invited to understand and master the principles of andragogy, which focuses on adult learning, and apply learning methods that are appropriate to the needs of society and the world of work. In this process, students will also explore the use of technology and information as tools to create creative and effective solutions in the learning process, with the ultimate goal of improving students' skills sustainably. In addition, this course emphasizes the development of entrepreneurial character and collaboration in multidisciplinary teams. Students will learn to identify challenges in the world of education and training, then design innovative and sustainable solutions. This course also teaches students to conduct comprehensive evaluations of the programs they implement, based on feedback from participants and other stakeholders. With this approach, students will be able to produce education and training programs that are relevant, competitive, and have a positive impact on the wider community.			
Course Material 1. Digital Pedagogies, Teaching Innovation and Learning Design 2. Technology-Enabled Innovations in Education 3. Measuring Innovation in Education			

4. Innovating Technical and Vocational Education and Training
5. Digital Innovations to Increase Participation in Internet-restricted Learning Environments
6. Technology Navigators: An Innovative Role in Pedagogy, Design, and Instructional Support
7. Process and Dynamics of Systemic Innovation: Initiation, Implementation, Monitoring, and Scaling Up in Vocational Education and Training
8. Quantum Information Education and Research Through a Digital Approach During the COVID-19 Lockdown
9. Wearable Devices in Education: Exploring New Learning Interfaces

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 2

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education.

CLO:

CLO 1

Analyze and design innovative programs in education and training based on the needs of society and the world of work, by applying the principles of andragogy and non-formal learning (C4)

CLO 2

Evaluate technology and information effectively in the learning and training process, creating creative and innovative solutions according to the context of non-formal education (C5)

CLO 3

Creating an entrepreneurial character that is innovative and inclusive, and creative collaboratively in multidisciplinary teams to design, implement, and evaluate education and training programs (C6)

CLO 4

Evaluate the effectiveness of education and training programs that have been carried out implemented, and make continuous improvements based on feedback from participants and stakeholders (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number MBKM0015	Module name Dissemination and Reporting of Program BKP MBKM		
Type of course Core module	Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students	
Teaching methods Project-Based Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Participation (20%) Performance (30%) Product (50%) Duration of Examination: Product		CU (+Workload in hrs) 4 Credits x 16 meetings x 170 minutes / 60 minutes = 181 hours/Semester (53.29 contact hours in class + 63.95 hours of structured assignment + 63.95 hours of self-study (together 211.19 hours)) ECTS (+Workload in hrs) 4 Credits x 1.59 = 6,36 ECTS (53.29 contact hours in class + 63.95 hours of structured assignment + 63.95 hours of self-study (together 211.19 hours))	
Module coordinator Dr. Shobri Firman Susanto, S.Pd., M.Pd.		Semester week hours: 16 meetings x 45.3 hours x 4 CU	
Additional teacher involved: -			
Syllabus The Dissemination and Reporting of BKP MBKM Program course is designed to equip students with skills in compiling, disseminating, and reporting the results of the BKP MBKM program (Independent Learning Campus Independent Learning Activity Form). Students will learn the basic concepts of program reporting that are in accordance with academic and professional norms, as well as how to present information clearly and systematically to various stakeholders. In addition, this course also emphasizes the importance of academic ethics and professionalism in the process of reporting and disseminating information. Through this course, students will also be taught how to utilize information and communication technology in the process of disseminating program reports. They will develop collaborative skills and be able to work in teams to plan, manage, and evaluate the dissemination of program results effectively. The focus of this course is to ensure that students are able to present program results professionally, both orally and in writing, using analytical and data-based approaches, so that program results can be optimally utilized by all stakeholders.			
Course Material 1. Understanding the scope of undergraduate research 2. Program Evaluation Toolkit 3. Sustainability Reporting in Higher Education Institutions: Evidence from a Global Perspective 4. Public dissemination of research in higher education: Challenges and strategies			

5. Assessing societal impact of research: Policies and best practices. Routledge.
6. The co-production of knowledge: Creating societal impact through academic research.
7. The SAGE Handbook of Qualitative Research
8. Valorizing academic research: From impact to application. Academic Press.
9. The Path Toward a Sustainable Green University: Case Studies in Higher Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to communicate both in writing and orally in accordance with academic values, norms, and ethics.

PLO 2

Able to utilize technology and information in problem-solving efforts according to their field of expertise.

CLO :

CLO 1

Analyze techniques for preparing MBKM BKP program reports in accordance with academic norms, values and ethics (C4)

CLO 2

Evaluate technology and information media in socializing the results of the MBKM BKP program to various stakeholders (C5)

CLO 3

Analyzing data from the implementation of the MBKM BKP program logically, critically and systematically (C4)

CLO 4

Creating professional collaboration within the team to plan, implement and evaluate outreach information and reporting on the MBKM BKP program (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number MBKM0013	Module name Program Evaluation of BKP MBKM		
Type of course Core module	Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students	
Teaching methods Project-Based Learning	Prerequisites for attendance None	Language Bahasa Indonesia / English for international class	
Type of examination (Final Grade Composition) Participation (20%) Performance (30%) Product/Project (50%) Duration of Examination: Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours))	
Module coordinator Monica Widyaswari, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)	
Additional teacher involved: -			
Syllabus The Program Evaluation of BKP MBKM course is designed to provide an in-depth understanding of the importance of evaluation in the context of non-formal education. In this course, students will learn various relevant evaluation methods and techniques, as well as how to design an effective evaluation program in accordance with applicable competency standards. Students will also be equipped with knowledge about planning, implementing, and analyzing evaluation data to assess the success of the education program being run, and how the evaluation results can be used for continuous improvement. In addition to technical aspects, this course also emphasizes effective communication skills, both verbally and in writing, so that students are able to convey evaluation results clearly and in accordance with academic norms. Students will learn about community empowerment and the application of social entrepreneurship in the context of program evaluation, so that they can identify innovative solutions to improve the effectiveness of nonformal education programs. Thus, this course aims to prepare students to become competent professionals who are responsive to the needs of the community in the field of education.			
Course Material 1. Implementation of the Merdeka Belajar-Kampus Merdeka (MBKM) 2. Impact on the hard and soft skills of teacher education students 3. Adaptation of Merdeka Belajar Kampus Merdeka Curriculum 4. The Urgency of Merdeka Belajar			

5. Evaluation of Distance Education Systems for English Language Teaching
6. Curriculum, Motivation, and Creativity on Student Entrepreneurial Interests
7. Independent Learning and Its Interpretations in Higher Education
8. Social and Emotional Competence of Teachers and Student Outcomes in MBKM Programs.
9. Entrepreneurship Education

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 2

Able to communicate both in writing and orally in accordance with academic values, norms and ethics.

CLO :

CLO 1

Creating and designing non-formal education evaluation programs that are in accordance with competency standards and established learning objectives (C6)

CLO 2

Evaluation of a non-formal education program using relevant methods and techniques, as well as collecting and analyzing data to determine the effectiveness of the program (C5)

CLO 3

Analyze programs effectively, both verbally and in writing, taking into account academic values, norms and ethics (C4)

CLO 4

Analyzing community empowerment techniques in context evaluate non-formal education programs, and develop social entrepreneurship-based solutions to increase program success (C4)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus Social and Emotional Learning (SEL) is a course that focuses on developing students' social and emotional abilities, which include five core competencies: self-awareness, self-management, social awareness, relational skills, and responsible decision-making. This course emphasizes the importance of integrating social and emotional learning into the educational environment to support students' holistic development. Through SEL, students are invited to understand the dynamics of emotions, manage stress, empathize with others, and build healthy and productive relationships. It is one of elective courses based on recognition part. In addition, in this course, students will learn theories and strategies that can be applied in educational contexts and everyday life to strengthen interpersonal skills. Learning is carried out through interactive approaches such as discussions, simulations, and group projects. This course aims to equip students with skills that not only improve personal emotional intelligence but also help create a positive and inclusive school climate			
Course Material 10. The impact of enhancing students' social and emotional learning 11. The connection between social-emotional learning and academic success 12. The scientific base linking social and emotional learning to school success 13. Social and emotional learning 14. Effective social and emotional learning programs			

- 15. Mental health promotion and problem prevention in schools
- 16. The district leadership challenge
- 17. Emotional intelligence in the classroom

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 12

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics.

CLO :

CLO 1

Analyze the principles and importance of social and emotional learning (SEL) in personal development and interpersonal relationships (C4)

CLO 2

Evaluate strategies to increase emotional regulation and resilience in self and others in various social contexts (C5)

CLO 3

Evaluate the impact of social and emotional learning programs on individual and community well-being (C5)

CLO 4

Create effective communication and conflict resolution skills to foster positive relationships and collaboration in various groups (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus Event Management is a course that studies the planning, implementation, and evaluation of an event. In this course, students will be equipped with the skills to organize various types of events, from small to large scale, both in the fields of business, culture, sports, to social activities. The main focus of this course is to ensure that all elements of the event, such as budget, logistics, promotion, to risk management, run smoothly and in accordance with the goals that have been set. In addition to theory, students will also be given the opportunity to practice directly in designing and running events, so that they are able to hone their coordination, problem solving, and leadership skills. This course is very important for students who want to enter the creative industry or have a career in event management, because it provides a comprehensive understanding of how to organize a successful event and provides valuable experience to participants.			
Course Material 1. The Business of Event Planning 2. Events Management 3. Event Studies 4. Special Events 5. Conference Tourism and Its Impact on the Destination 6. Strategic Sports Event Management			

7. Risk Management for Meetings and Events

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 11

Able to utilize technology and information in problemsolving efforts according to their field of expertise.

CLO :

CLO 1

Analyzing event needs and goals (C4)

CLO 2

Evaluate the event planning process (C5)

CLO 3

Apply event promotion and marketing techniques (C3)

CLO 4

Evaluating post-event (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus The Creative and Critical Thinking course is designed to develop students' ability to think creatively and critically. In this course, students are taught various techniques and strategies to generate innovative ideas and evaluate arguments objectively. Learning involves group discussions, case studies, and challenging problemsolving exercises, which allow students to practice and apply thinking skills in various contexts. In addition, students are also introduced to various theories and concepts that underlie the creative and critical thinking process, which are useful for improving analytical and decision-making skills. In this course, students are encouraged to explore different ways of thinking, identify assumptions, and question commonly accepted viewpoints. Through projects and presentations, students can demonstrate their ability to apply critical thinking in real situations, while developing confidence in conveying their ideas. With mastery of these skills, students are expected to be able to adapt quickly in a dynamic and complex environment, and become more independent and innovative thinkers in facing challenges in the professional world.			
Course Material 1. Creativity and divergent thinking 2. Creativity in engineering 3. Theories of creativity			

4. Enhancing creativity
5. Out of our minds
6. Teaching for creativity
7. Creativity
8. A sociocultural theory of creativity
9. Critical thinking in psychology and everyday life
10. Critical thinking in the information age

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

CLO :

CLO 1

Analyze complex problems using critical thinking skills to develop effectively solution (C4)

CLO 2

Apply creative thinking techniques to generate innovative ideas and approaches in various contexts (C3)

CLO 3

Evaluate the validity and reliability of information from various sources to support decision making process (C5)

CLO 4

Create effective collaboration with peers to foster a culture of creativity and critical inquiry in problem-solving scenarios (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number	Module name Inclusive Leadership		
Type of course Elective module		Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students
Teaching methods Problem-based learning, Practice-based learning and simulation		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Participation (50%) Performance (50%) Duration of Examination: Performance			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours))
Module coordinator Dr. Widodo, M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -			
Syllabus The Inclusive Leadership course discusses the concept and practice of inclusive leadership, aiming to build a work environment that supports diversity and participation of all individuals. In this course, students will learn leadership theories that encourage the involvement and recognition of various perspectives, experiences, and backgrounds. By understanding the principles of inclusivity, students are expected to be able to apply effective strategies in leading diverse teams, as well as creating a just and open organizational culture. In addition, this course also emphasizes the importance of communication skills and empathy in leadership. Students will be invited to explore real cases that illustrate the challenges and opportunities in inclusive leadership. Through discussions, case studies, and group projects, students will practice applying techniques to embrace differences, facilitate productive collaboration, and encourage innovation in teams. Thus, this course not only provides theoretical insights, but also practical skills that can be applied in an increasingly complex and diverse world of work.			
Course Material 1. Inclusive leadership 2. The six signature traits of inclusive leadership 3. Inclusive workplaces 4. Diversity at work 5. Inclusive management			

6. Diversity and inclusion in the global workplace
7. Leadership diversity and inclusion in organizations
8. Human resource management
9. Building inclusive organizations
10. The inclusive leader

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 12

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics.

CLO :

CLO 1

Analyze the principles and practices of inclusive leadership (C4)

CLO 2

Analyze the impact of diverse perspectives in the decision-making process (C4)

CLO 3

Implement collaborative strategies to foster an inclusive environment within the team (C3)

CLO 4

Evaluate the role of emotional intelligence in inclusive leadership (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Additional teacher involved: -			
Syllabus The Empathy and Emotional Intelligence course aims to equip students with a deep understanding of the importance of empathy and emotional intelligence in interpersonal and professional contexts. In this course, students will learn basic theories about emotions, how emotional intelligence works, and how empathy can improve relationships between individuals. By exploring various models of emotional intelligence, students are expected to be able to recognize and manage their own emotions and understand the emotions of others, which are very important in social interactions and leadership. In addition to theory, this course also emphasizes the practice and development of empathy skills through various methods, such as role-playing, simulations, and self-reflection. Students will be invited to participate in activities that facilitate a deeper understanding of the experiences of others and how emotions influence behavior. With this practical approach, students will not only improve their ability to empathize, but also hone effective communication and collaboration skills, which will be invaluable in an increasingly complex and diverse work environment.			
Course Material 1. Emotional intelligence 2. The developing mind 3. The developing mind 4. The trauma-sensitive classroom 5. Emotional aqility			

6. The empathy effect
7. Altered traits
8. The mindfulness-based emotional balance workbook

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient collaborative adaptive innovative inclusive lifelong learning and entrepreneurial character.

PLO 12

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics.

CLO :

CLO 1

Analyze emotional responses in yourself and others, demonstrate a deeper understanding of emotional awareness (C4)

CLO 2

Evaluating empathy in a variety of interpersonal and professional contexts, fostering effective communication and conflict resolution (C5)

CLO 3

Analyzes one's own emotions and recognizes emotions others, contributing to a more harmonious and productive work environment (C4)

CLO 4

Create reflective practices that increase their emotional intelligence, enabling them to make responsible and ethical decisions in leadership and teamwork (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Additional teacher involved: -			
Syllabus The Communication and Team Partnership course aims to equip students with effective communication skills and the ability to build solid partnerships in a team context. In this course, students will learn various communication techniques, including active listening, speaking clearly, and providing constructive feedback. With a focus on team dynamics, students will also explore how individual roles in a team can affect the success of collaboration and the achievement of common goals. In addition to theory, this course also emphasizes the importance of interpersonal skills and conflict management in creating a harmonious work environment. Through various learning methods such as group discussions, case studies, and collaborative projects, students will have the opportunity to apply the communication skills they have learned. This course is designed to create a learning atmosphere that supports the exchange of ideas and experiences, so that students can experience firsthand how good communication skills can strengthen partnerships in a team. Thus, students are not only ready to contribute to the team, but also become leaders who are able to manage cooperation and build productive relationships in a professional environment.			
Course Material 1. Communication Concept 2. Partnership concept			

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Interpersonal Communication Skills

PLO 2

Ability to Work in a Team

CLO :

CLO 1

Understand the basic meaning of communication (C2)

CLO 2

Analyzing problems in a educational and community environment (C4); Implementing active listening skills (C3)

CLO 3

Organize team dynamics and individual roles (A4)

CLO 4

Evaluate conflict management in teams (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number	Module name UNESA Softskills		
Type of course Elective module		Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students
Teaching methods Practice based learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Participation (50%) Performance (50%) Duration of Examination: Performance			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)
Module coordinator Desika Putri Mardiani, S.Pd., M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -			
Syllabus The UNESA Softskills course is designed to equip students with non-technical skills that are essential for success in the workplace and everyday life. In this course, students will learn various soft skills, such as effective communication, leadership, teamwork, time management, and adaptability. Through interactive learning methods, such as group discussions, simulations, and practical exercises, students will have the opportunity to develop and apply these skills in a variety of situations, both academic and professional. In addition, this course will also discuss the importance of soft skills in building positive and productive relationships in the workplace. With a focus on self-development, the UNESA Softskills course invites students to conduct personal reflection and set goals in improving their interpersonal skills. Students will be given various tools and strategies to identify strengths and areas that need improvement, so that they can be better prepared to face the challenges of an increasingly competitive workplace. Through a comprehensive approach, this course not only aims to improve students' soft skills, but also to foster a positive attitude and self-confidence needed to contribute effectively to society.			
Course Material 1. Emotional intelligence 2. The new science of everyday wonder and how it can transform your life 3. Emotional intelligence 2.0. 4. The happiness track 5. The infinite game 6. Think again: The power of knowing what you don't know			

7. Mapping meaningful connection and the language of human experience.
8. How to win friends and influence people in the digital age
9. How family and work are connected in today's world
10. Mindfulness-based cognitive therapy for emotional intelligence

Learning goals and qualifications in this module students learn to:

PLO :

PLO 2

Demonstrate resilient collaborative adaptive innovative inclusive lifelong learning and entrepreneurial character.

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms, and ethics.

CLO :

CLO 1

Collaborative Skills Development

CLO 2

Communication Mastery

CLO 3

Critical Thinking and Problem-Solving

CLO 4

Lifelong Learning and Self-Development

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number	Module name UNESA Communication Skills		
Type of course Elective module		Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students
Teaching methods Practice based learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Participation (50%) Performance (50%) Duration of Examination: Performance			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes / 60 minutes = 90, 6 hours/Semester (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours)) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3,18 ECTS (26.65 contact hours in class + 31.98 hours of structured assignment + 31.98 hours of self-study (together 90.81 hours))
Module coordinator Dr. Rivo Nugroho, S.Pd.,M.Pd.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -			
Syllabus The UNESA Communication Skills course is designed to develop students' communication skills in various contexts, both verbally and in writing. In this course, students will learn various effective communication techniques, including how to convey ideas clearly, listen actively, and provide constructive feedback. In addition to theory, this course also emphasizes practice through group discussions, presentations, and public speaking exercises. Thus, students not only learn about communication theory, but also gain practical skills that can be applied in academic and professional environments. In addition to basic communication skills, this course also emphasizes the importance of interpersonal communication and communication in a team context. Students will learn how to build positive and productive relationships with colleagues and how to manage conflicts that may arise. Through reflective activities and selfevaluation, students will have the opportunity to identify strengths and areas that need improvement in their communication skills. With a comprehensive approach, the UNESA Communication Skills course aims to prepare students to become effective and professional communicators who are ready to face challenges in the world of work.			
Course Material 1. Digital marketing 2. Writing for digital media 3. Effective communication skills 4. Creative strategy and the business of design 5. Communication in the age of virtual reality			

6. Social media communication
7. Communicating data with Tableau
8. Digital communication
9. The language of content strategy
10. Content design

Learning goals and qualifications in this module students learn to:

PLO :

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms, and ethics

PLO 11

Able to utilize technology and information in problem-solving efforts according to their field of expertise

CLO :

CLO 1

Students are able to identify, Analyze, and explain fundamental communication theories related to interpersonal and group communication processes. (C4)

CLO 2

Students are able to evaluate and develop effective speaking and listening skills in various contexts, both formal and informal (C5).

CLO 3

Students are able to apply persuasive communication and ethical negotiation techniques in professional and academic situations (C3).

CLO 4

Students are able to organize and utilize information and communication technologies to convey ideas creatively and effectively, both orally and in writing (A4).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number	Module name UNESA International Conference		
Type of course Elective module		Semester / Rotation 5 th / Odd Semester	Student capacity: 37 Students
Teaching methods Project based learning and Practice based learning		Prerequisites for attendance None	Language Bahasa Indonesia / English for international class
Type of examination (Final Grade Composition) Performance (50%) Product / Project (50%) Duration of Examination: Product Performance			CU (+Workload in hrs) 3 Credits x 16 meetings x 170 minutes / 60 minutes = 136 hours/Semester (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours) ECTS (+Workload in hrs) 3 Credits x 1.59 = 4,77 ECTS (39.97 contact hours in class + 47.96 hours of structured assignment + 47.96 hours of self-study (together 135.89 hours)
Module coordinator Dr. Shobri Firman Susanto, S.PD., M.Pd.			Semester week hours: 16 meetings (45.3 hours x 3 CU = 136 hours)
Additional teacher involved: -			
Syllabus The UNESA International Conference course is an academic program designed to provide students with hands-on experience in organizing and participating in international conferences. In this course, students will learn various important aspects related to organizing a conference, from planning, organizing, to implementing the event. Students will be involved in various activities, such as inviting speakers, preparing the agenda, and promoting the event to participants. With this practical approach, students not only gain theoretical knowledge, but also essential managerial and communication skills in an international context. In addition to the managerial aspect, this course also emphasizes the importance of intercultural collaboration in organizing a conference. Students will be taught how to interact with participants from diverse cultural backgrounds, as well as understand the challenges and opportunities that arise in a global context. Through discussions, workshops, and simulations, students will develop presentation skills and the ability to speak in public. Thus, the UNESA International Conference course not only prepares students to become competent professionals in the field of event management, but also equips them with the insights and skills needed to operate in a dynamic international environment.			
Course Material 1. Digital marketing 2. Communication in the age of virtual reality 3. Social media communication 4. Apostles of certainty			

5. Communicating data with Tableau
6. Content design
7. Writing for digital media
8. The network society
9. Digital communication
10. Creative strategy and the business of design

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms and ethics.

CLO :

CLO 1

Understanding the Concept of International Conferences (C2)

CLO 2

Organizing (Planning and Organizing) Events of informal or non formal education (A4)

CLO 3

Having readiness of Presentation and Communication Skills (P2)

CLO 4

Having a positive perception of Collaboration and Teamwork (P1); Be Able to applying the collaboration and teamwork (C3)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Additional teacher involved: -			
Syllabus The UNESA National Conference course is designed to provide students with an in-depth understanding of organizing a national-level conference, as well as practical experience in organizing and participating in the event. In this course, students will learn various managerial aspects needed to plan and implement a conference, from selecting a theme, compiling an agenda, to managing participants and speakers. Students will be invited to be actively involved in the planning process, including designing promotional materials, managing logistics, and facilitating interaction between participants. With a practice-based approach, this course aims to prepare students to play an important role in organizing quality scientific events. In addition to managerial aspects, this course also emphasizes the importance of intercultural communication and collaboration in a national context. Students will be taught effective communication skills needed to interact with speakers and participants from various backgrounds. Through discussion activities, simulations, and evaluations, students will develop their presentation and public speaking skills. Thus, the UNESA National Conference course not only prepares students to become competent professionals in the field of event management, but also equips them with essential communication skills to operate in academic and professional environments.			
Course Material 1. Memory and Forgetting 2. The Politics of Expertise 3. The Birth of Biopolitics			

4. Confidence Culture
5. Data Ethics and Challenges for AI
6. Academic Knowledge Production and the Global South
7. Responsible Data Science
8. Artificial Intelligence and Big Data in Sustainable Development.
9. Essentials of Online Teaching
10. Interdisciplinary Research

Learning goals and qualifications in this module students learn to:

PLO :

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO 10

Able to communicate both in writing and orally in accordance with academic values, norms and ethics.

CLO :

CLO 1

Understanding Conference Concepts (C2)

CLO 2

Be able to organize events of national conferences (Planning, Organizing, Monitoring, Evaluating) Events (A4)

CLO 3

Having readiness and Skill of Presentation (P2)

CLO 4

be able to apply Teamwork and Collaboration (C3)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module coordinator Dr.Widodo, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teachers involved: -		
Syllabus Student Teaching Internship - School Management is a course designed to provide prospective teacher students with direct experience in managing a school environment. This course provides students with the opportunity to participate in various aspects of school management, such as planning teaching and learning activities, managing school resources, to making strategic decisions that impact the entire education system. Students are also invited to interact with various stakeholders, from principals, senior teachers, to administrative staff, so that they understand the dynamics of school management more comprehensively. In its implementation, students are placed in partner schools to undergo field work practices. They are not only responsible for managing the classroom, but are also involved in the overall school management process, such as budgeting, managing facilities, and developing extracurricular programs. Through this program, students are expected to develop the leadership, communication, and problem-solving skills needed in the role of an education manager. This direct experience is an important foundation in preparing them for roles in education, both as teachers and as school administrators in the future.		
Course Material 1. Introduction to School Management: Fundamentals of school management. 2. Professional Ethics in Education: Ethical standards and professional communication. 3. Collaboration in the School Environment: Cooperation and conflict management techniques. 4. Management of Educational Resources: Management of budget, human resources and facilities. 5. Innovation Strategy in Education: Conceptualization and implementation of educational innovation.		

6. Leadership in Education: Types of leadership and positive school culture.
7. Education program planning: Planning steps and needs analysis.
8. School program implementation: Program implementation and monitoring.
9. Education program evaluation: Evaluation methods and data analysis.
10. Life-long Learning: Continuous professional development.
11. Resilient and Adaptive Character: Stress management and emotional intelligence.
12. Inclusivity Management: Inclusive approaches and supportive environments.
13. Entrepreneurship in Education: Entrepreneurial concepts and funding innovation.

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics.

PLO 2

Able to demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

CLO :

CLO 1

Understanding and applying the concept of school management in managing educational resources and facilities in the school environment. (C2, C3)

CLO 2

Be able to organize team and Demonstrate professional, ethical, and collaborative attitudes in interactions with school stakeholders, including teachers, principals, and administrative staff (A4)

CLO 3

Evaluate and Develop leadership and innovation skills in planning and implementing educational programs in Schools (C5)

CLO 4

Having and be able to respond to critical and systematic thinking skills in planning, implementing, and evaluating school programs to improve the effectiveness of educational management. (A2)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus Student Teaching Internship - School Management is a practical course that aims to provide students with direct experience in managing and organizing various aspects of a school. Through this program, students are expected to be able to understand and apply the principles of school management, from learning planning, human resource and facility management, to strategic decision-making that affects educational success. In undergoing this practice, students will play an active role in a real school environment, working with various parties such as principals, teachers, and administrative staff, and facing daily challenges in school management. This course also emphasizes the importance of a professional, collaborative, and innovative attitude in managing a school. Students are not only required to understand educational management theory, but also to be able to apply it effectively in a dynamic context. Thus, this course helps students develop leadership skills, decision-making, and the ability to adapt and innovate, which are essential for building a sustainable and high-quality educational environment. Through this practical experience, students are expected to be able to prepare themselves to play a role as competent and professional school managers Course Material 1. Basic Principles of School Management: Concepts of planning, resource management and strategic decision-making. 2. Regulations and Policies in School Management: Application of rules and policies related to school management. 3. Ethics and Professional Norms in Education: Ethical work standards and professional norms in interactions with school stakeholders. 4. Collaboration with School Stakeholders: Strategies for building cooperation with principals, teachers, staff and the community.		

5. School Resource Management: Effective management of finances, facilities and human resources.
6. Adaptive Leadership in Education: Adaptive leadership styles to meet educational challenges.
7. Innovation in School Management: Design and implementation of innovation-based programs to improve education quality.
8. Entrepreneurship in Education: The application of entrepreneurship to support sustainable school management.
9. School Program Evaluation: Techniques for critical and systematic evaluation of school management activities.
10. Improving School Management Effectiveness: Creative solutions to improve the efficiency and effectiveness of school management.
11. Lifelong Learning in Education: Developing the character of continuous learning for teachers and school staff.
12. Inclusiveness in School Management: Inclusive school management strategies to support diversity.
13. Sustainability in Education Management: A sustainability approach in school program planning and evaluation.

Learning goals and qualifications in this module students learn to:

PLO :

PLO 1

Demonstrate resilient, collaborative, adaptive, innovative, inclusive, lifelong learning, and entrepreneurial character.

PLO 2

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics.

CLO :

CLO 1

Students are able to analyze, identify and apply the principles of effective school management, including planning, resource management, and strategic decision-making in accordance with school needs and applicable regulations (C4).

CLO 2

Students are able to demonstrate professional, collaborative, and adaptive attitudes in interacting with stakeholders in the school, including the principal, teachers, staff, and school community, in accordance with work ethics and educational norms. (C3)

CLO 3

Students are able to create design and implement innovation and entrepreneurship-based school management programs to improve the quality of education, both at the classroom level and at the school as a whole (C6).

CLO 4

Students are able to evaluate the implementation of school management activities critically and systematically, and provide logical and creative solutions to improve the effectiveness of school management in the context of sustainable education (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 1000002051	Module name Student Teaching Internship - Curriculum Analysis	
Type of course Core module	Semester / Rotation 6th / Even Semester	Student capacity: 37
Teaching methods Work-based learning and Project-Based Learning	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) participation (50%) product/project (50%) Duration of Examination: Performance Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours)
Module coordinator Dr. Rofik Jalal Rosyanafi, M.Pd		Semester week hours: Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -		
Syllabus The PLP-Curriculum Analysis course is designed to equip students with skills in critically analyzing and evaluating educational curricula. In this course, students will learn various models and approaches in curriculum development, as well as understand the basic principles underlying the structure and implementation of curricula at various levels of education. In addition, they will explore curriculum elements such as learning objectives, content, teaching methods, and curriculum evaluation. An understanding of the social, cultural, and educational policy contexts that influence curriculum development will also be a major focus. During the course, students will be involved in activities that require them to analyze the curriculum implemented in schools or other educational institutions. They will identify the strengths and weaknesses of the existing curriculum and provide recommendations for improvement. This course not only teaches technical skills in curriculum analysis, but also instills a deep understanding of how the curriculum plays a role in shaping students' character and achieving educational goals. Course Material <ol style="list-style-type: none"> 1. Pendahuluan Model Kurikulum: Pengertian dan jenis-jenis model kurikulum. 2. Komponen Kurikulum: Analisis elemen-elemen utama dalam struktur kurikulum. 3. Perencanaan Kurikulum: Tahapan perencanaan kurikulum sesuai kebutuhan pendidikan non-formal. 4. Implementasi Kurikulum: Strategi pelaksanaan kurikulum di lingkungan pendidikan non-formal. 5. Evaluasi Kurikulum: Teknik dan metode evaluasi efektivitas kurikulum. 6. Pengembangan Inovasi Kurikulum: Inovasi dalam mendesain kurikulum baru. 7. Kurikulum Berbasis Kompetensi: Penyusunan kurikulum yang berfokus pada pencapaian 		

kompetensi kerja.

8. Kurikulum untuk Pendidikan Non-Formal: Strategi pengembangan kurikulum untuk pendidikan non-formal.
9. Pemikiran Logis dan Sistematis dalam Kurikulum: Pendekatan kritis dan kreatif dalam analisis kurikulum.
10. Kurikulum Berbasis Teknologi: Integrasi teknologi dalam pengembangan dan evaluasi kurikulum.
11. Kurikulum Berorientasi Keberlanjutan: Pengembangan kurikulum yang mendukung pendidikan berkelanjutan.
12. Studi Kasus Evaluasi Kurikulum: Analisis kasus nyata dalam evaluasi kurikulum.
13. Kepemimpinan dalam Pengembangan Kurikulum: Peran kepemimpinan dalam inovasi dan implementasi kurikulum.

Learning goals and qualifications in this module students learn to:

PLO

PLO 1

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned

PLO 2

Mastering the process of planning, implementing and evaluating non-formal education program

CLO

CLO 1

Understanding Curriculum Models (C2)

CLO 2

Be able to analyze Curriculum Component (C4)

CLO 3

Be able to evaluate Curriculum Application (C5)

CLO 4

Be able to create Innovation in Curriculum Development (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Additional teacher involved: -		
Syllabus The Student Teaching Internship - Lesson Plan Development course is designed to equip students with the knowledge and skills to create effective lesson plans that are under the curriculum and based on the needs of students. In this course, students will learn the main components of a lesson plan, including learning objectives, teaching strategies, learning media, and relevant assessment techniques. Students will also be taught how to integrate character values and 21st century skills, such as critical thinking, collaboration, and creativity, into their lesson plans. In addition, this course emphasizes the importance of reflection and evaluation in the development of ongoing lesson plans. Students will learn to assess the effectiveness of lesson plans through feedback from students and learning outcomes, and how to make adjustments to improve the quality of teaching. With a practice-based approach, this course provides an opportunity for students to develop contextual and innovative lesson plans, which are expected to be applied in real educational environments. Course Material <ol style="list-style-type: none"> 1. Components of Lesson Planning: Identify the key elements in lesson planning. 2. Curriculum Alignment: Strategies to ensure alignment of curriculum with learning needs. 3. Andragogy Concept: Principles of andragogy-based learning in non-formal education. 4. Lesson Plan Development: Techniques for developing effective lesson plans. 5. Innovative Learning Strategies: Creative approaches to increase learner engagement. 6. Technology in Non-Formal Learning: Utilizing technology to support community-based learning. 7. Project Based Learning: Design and implementation of project-based learning in non-formal 		

education.

8. Learning Evaluation: Evaluation techniques to measure the success of the learning process.
9. Reflection in Learning: The use of reflection to improve teaching effectiveness.
10. Collaborative Strategies in Andragogy: Collaborative approaches to enhance adult learning.
11. Classroom Management in Non-Formal Education: Effective classroom management techniques in non-formal contexts.
12. Sustainability in Learning Design: Learning planning that supports sustainability.
13. Case Studies in Andragogy Implementation: Real case analysis to understand the application of andragogy principles.

Learning goals and qualifications in this module students learn to:

PLO

PLO 1

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned

PLO 2

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community

CLO

CLO 1

Understanding the Lesson Planning Components (C2)

CLO 2

Be able to create Curriculum components (C6)

CLO 3

Having skill of Innovative Teaching Strategies and ready to apply it into classroom (P2)

CLO 4

Be able to Evaluate and Reflect the program of non formal education in institution (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus The Student Teaching Internship - Instructional Material Development course is designed to equip students with the knowledge and skills to design, develop, and evaluate effective and appropriate teaching materials for learning needs. Students will learn the principles of developing teaching materials that are relevant to the curriculum, target learners, and educational context. This course also covers various media and formats of teaching materials, such as print, digital, and multimedia materials, which are designed to increase student engagement and understanding. In addition, this course encourages students to develop creativity and innovation in designing teaching materials that are interesting, interactive, and support the achievement of learning objectives. Students will be trained to evaluate the effectiveness of teaching materials based on pedagogical and didactic criteria, and consider the suitability of the content to the characteristics of the students. At the end of the course, students are expected to be able to produce teaching materials that are not only informative, but also able to support meaningful and contextual learning experiences for students. Course Material <ol style="list-style-type: none"> 1. Principles of teaching material development: Theoretical foundations in the development of teaching materials. 2. Application of Andragogy in Teaching Material Development: Integration of andragogy principles in teaching material design. 3. Learning Needs Analysis: Identification of learner needs in non-formal education. 4. Development of Diverse Teaching Materials: Techniques for creating teaching materials 		

suitable for various target groups.

5. Technology in Teaching Material Development: Utilization of technology to create interactive teaching materials.
6. Non-Formal Learning Media: Design and implementation of learning media for the community.
7. Evaluation of Teaching Materials: Techniques for assessing the effectiveness of teaching materials.
8. Teaching Material Revision: Revision process to improve the quality of teaching materials.
9. Project-based Learning Design: Application of teaching materials in project-based learning.
10. Creativity in Teaching Materials: Strategies for creating innovative teaching materials.
11. Teaching Materials for Community Learning: Development of relevant teaching materials for community needs.
12. Competency Standards in Teaching Materials: Preparation of teaching materials that are in accordance with competency standards.
13. Case Study of Teaching Material Development: Analysis of real examples of teaching material development in non-formal education.

Learning goals and qualifications in this module students learn to:

PLO

PLO 1

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education.

PLO 2

Mastering the process of planning, implementing and evaluating non-formal education programs

CLO

CLO 1

Understanding Principles of Instructional Material Development (C2)

CLO 2

Create innovation of Diverse Instructional Materials (C6)

CLO 3

Application of Educational Technology (C3)

CLO 4

Be able to evaluate program through Assessment and Revision of Instructional Materials (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Core readings:

1. North, C. (2021). Learning Experience Design Essentials. Wiley. This book explores practical approaches to enhance learning design, including user experience and accessibility aspects crucial for modern instructional material development.
2. Wallace, G. (2020). The L&D Pivot Point: Performance Improvement Consulting. Performance Improvement Press. Aimed at addressing performance gaps in instructional settings, this guide is essential for designing effective instructional materials with a focus on consulting for performance improvement.
3. Quinn, C. (2021). Make It Meaningful: Taking Learning Design From Instructional to Transformational. Clark Quinn. This book emphasizes engaging learners emotionally, an important factor in creating instructional materials that foster deep learning.

4. Giacumo, L. A., Villachica, S. W., & Stepich, D. A. (2021). *Instructional Design for Organizational Justice: A Guide to Equitable Learning*. Routledge. Focused on inclusive and equitable instructional design, this book is relevant for those looking to develop instructional materials that meet diverse learner needs.
5. Jones, K. L., & Lumsden, J. N. (2020). *Needs Assessment on a Shoestring*. Routledge. Offering strategies for conducting needs assessments with limited resources, this book is useful in the early stages of instructional material development.
6. Lassooff, M. (2022). *The Ultimate Guide to Creating Online Learning Video: A Comprehensive Handbook for Instructional Designers*. SkillStudio Press. A practical guide to producing educational videos, an increasingly important medium in instructional material development.
7. Nuriddin, H. (2020). *Quality Management in Learning and Development*. Wiley. This book helps instructional designers ensure that their materials meet high-quality standards, making it a key resource for developers aiming for excellence.
8. Dirksen, J. (2021). *Talk to the Elephant: Designing Learning for Behavior Change*. Wiley. This book discusses behavior change principles in instructional design, useful for creating materials that lead to practical outcomes.
9. Reigeluth, C. M., & Lee, D. (2020). *The Learner-Centered Paradigm of Education*. IGI Global. A comprehensive exploration of learner-centered approaches, valuable for instructional material development that focuses on student autonomy and personalized learning.
10. Tomlinson, B. (2021). *Materials Development for Language Teaching*. Cambridge University Press. A foundational text for developing instructional materials, particularly in language teaching but adaptable to other fields as well.

Module number 1000002055	Module name Student Teaching Internship - Learning Assessment	
Type of course Core module	Semester / Rotation 6th / Even Semester	Student capacity: 37
Teaching methods Work-based learning and Project-Based Learning	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) participation (50%) product/project (50%) Duration of Examination: Performance Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours)
Module coordinator Monica Widyaswari, M.Pd.		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -		
Syllabus <p>The Student Teaching Internship -Learning Assessment course aims to provide an in-depth understanding of the concepts, principles, and practices of assessment in the context of education. In this course, students will learn various types of assessment, from formative to summative assessment, as well as alternative assessment techniques that can be used to measure students' understanding and skills. Through various teaching methods, including case studies and group discussions, students are invited to analyze assessment strategies that are effective and relevant to the curriculum and students' learning needs. With an interactive approach, students will be equipped with the skills to design and implement fair and valid assessment tools and understand the importance of feedback in the learning process.</p> <p>In addition, this course also emphasizes the importance of student-focused assessment, which allows educators to understand the needs, learning styles, and potential of each individual. Students will be invited to explore how assessment can be used as a tool to improve the quality of learning and motivate students. Through collaborative projects and the development of assessment tools, students are expected to be able to apply theory into practice, so that they are ready to become competent educators in evaluating and supporting student development holistically. Thus, this course plays an important role in forming educational professionals who understand and are able to manage the assessment process well</p>		
Course Material 1. Introduction to Types of Assessment: A basic understanding of the different types of assessment in education. 2. Principles of Non-Formal Assessment: Assessment approaches relevant for non-formal education. 3. Assessment Tool Development: Techniques for designing valid and reliable assessment tools.		

4. Effective Assessment Criteria: Standards for developing appropriate assessment criteria.
5. Implementation of Fair Assessment Practices: Strategies to ensure fairness in the assessment process.
6. Use of Technology in Assessment: Utilization of software and applications to support the assessment process.
7. Assessment Data Collection: Data collection techniques through qualitative and quantitative methods.
8. Assessment Data Analysis: Data analysis methods to evaluate learning outcomes.
9. Reporting of Assessment Results: Preparation of a comprehensive and informative report of assessment results.
10. Competency-Based Assessment: Assessment design that focuses on competency achievement.
11. Reflection in Assessment: Using assessment results for reflection and learning improvement.
12. Ethics in Assessment: Ethical principles in managing and using assessment results.
13. Assessment Evaluation Case Study: Analysis of real-life examples of assessment implementation in non-formal education.

Learning goals and qualifications in this module students learn to:

PLO

PLO 1

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned.

PLO 2

Mastering the process of planning, implementing, and evaluating non-formal education programs.

CLO

CLO 1

Understanding Assessment Types (C2)

CLO 2

Developing and Organizing Assessment Tools (A4)

CLO 3

Implementing Fair Assessment Practices (C3)

CLO 4

Analyzing Assessment Data (C4); Evaluating the process of learning (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus The Student Teaching Internship-Teaching Practice course is an important component in the education of prospective teachers which aims to provide direct experience in the learning process in the classroom. In this course, students will learn to develop teaching skills through direct practice in schools. This activity includes planning and implementing learning, classroom management, and evaluating student learning outcomes. Students will also be taught to apply various learning methods and strategies that are appropriate to the characteristics of students, so that they can adjust effective and interesting teaching approaches During the Student Teaching Internship-Teaching Practice course, students are expected to be able to develop professional and pedagogical competencies needed in the world of education. In addition, students will also receive feedback from supervisors and school teachers, which helps them in reflection and self-development as educators. Thus, this course not only strengthens the theory that has been learned in class but also equips students with practical experience that is crucial for their careers as teachers in the future.		
Course Material 1. Concepts of Lesson Planning: Basic principles in designing an effective learning plan. 2. Principles of Andragogy in Learning Planning: Integration of andragogy approach in designing learning for non-formal education. 3. Learning Plan Development Strategy: Techniques for developing learner needs-based learning plans. 4. Effective Teaching Implementation: Steps to implement andragogy-based learning. 5. Communication in Teaching: Effective communication techniques in accordance with academic values and norms. 6. Classroom Management in Non-Formal Education: Strategies for creating a conducive learning environment.		

7. Problem solving techniques in classroom management: Approaches to overcoming challenges in classroom management.
8. Use of Technology in Teaching: Integration of technology to support the learning process.
9. Evaluation of Learning: Methods for measuring learning success and goal achievement.
10. Reflection and Feedback in Learning: The use of reflection and feedback to improve learning effectiveness.
11. Ethics in Learning Evaluation: The application of ethical values in the evaluation process.
12. Classroom Management Case Study: Analysis of real cases in andragogy-based classroom management.
13. Teaching Competency Improvement: Strategies for continuous development of teaching skills.

Learning goals and qualifications in this module students learn to:

PLO 1

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education.

PLO 2

Able to communicate both in writing and orally in accordance with academic values, norms and ethics.

CLO

CLO 1

Understanding the learning in the field of non formal education (C2)

CLO 2

Be able to apply the Teaching Strategy Implementation (C3)

CLO 3

Be able to Organizing the management of The non formal education Class (A4)

CLO 4

Be able to evaluate the management of non formal education program (C5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus <p>This course is a course that develops individual interests, attitudes, and abilities to use digital technology and communication tools to access, manage, integrate, analyze, and evaluate information, build new knowledge, and create and communicate with others to participate effectively. The study materials in this course are (1) digital literacy in facing the challenges and opportunities of the 21st century; (2) basic principles of digital literacy development; (3) various features of digital technology and communication tools that are useful in life; (4) access and manage digital information effectively; (5) use digital technology and communication tools effectively to create and build new knowledge; and (6) use digital technology and communication tools effectively to communicate with other people and play an active role in global society.</p> <p>The purpose of the digital literacy course is to equip students with the knowledge and skills necessary to use digital technology effectively, wisely, and ethically. the specific objectives of this course are Understanding Digital Technology, Ability to Access Information, Development of Digital Communication Skills, Awareness of Digital Security and Privacy, Ethical and Responsible Use of Technology, Understanding the Social Impact of Digital Technology, and Digital Content Production Skills. By learning digital literacy, students can make the most of technology in their personal, academic and professional lives, while understanding the risks and responsibilities associated with its use.</p> Course Material <ol style="list-style-type: none"> 1. Basic Concepts of Non-Formal Education: An understanding of non-formal education in the context of society. 2. Digital Literacy in Era 21: The importance of digital literacy in facing global challenges and opportunities. 3. Digital Technology for Non-Formal Education: The use of digital technology to support non-formal 		

education programs.

4. Skills for Accessing Digital Information: Effective techniques for searching, evaluating and managing digital information.
5. Use of Digital Communication Tools: Mastery of digital communication tools to support teaching and learning.
6. Building New Knowledge with Technology: Use of technology to create and share educational content.
7. Ethics in Digital Communication: Ethical principles in the use of digital communication tools.
8. Global Collaboration through Technology: Strategies for communicating and collaborating with the global community digitally.
9. Social Media for Education: Utilization of social media in supporting non-formal education.
10. Digital Security and Privacy: Best practices for maintaining security and privacy in the digital world.
11. Addressing Disinformation: Strategies for recognizing and avoiding false information in the digital world.
12. Digital Reflection and Responsibility: Developing an attitude of wisdom and responsibility in the use of technology.
13. Digital Literacy Case Studies: Analysis of real cases of digital technology use in non-formal education.

Learning goals and qualifications in this module students learn to:

PLO

PLO 1

Mastering the basic concepts of Non-Formal Education to manage non-formal education and community education programs.

PLO 6

Able to communicate both in writing and orally, under academic values, norms, and ethics

PLO 7

Able to utilize technology and information in solving problems according to their expertise.

CLO

CLO 1

Understanding the importance of digital literacy in facing the challenges and opportunities of the 21st century (C2)

CLO 2

Have skills in using digital technology and communication tools to access and manage digital information effectively. and build new knowledge (C3).

CLO 3

Having ability in develop a wise attitude in using digital technology and communication tools to communicate with other people and play an active role in global society (A5).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Module number 8620502020	Module name English For Professional Purposes	
Type of course Core module	Semester / Rotation 6th / Even Semester	Student capacity: 37
Teaching methods Lecturing, Cooperative Learning, Project-based Learning	Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (20%) Product Assessment (50%) Performance (30%) Duration of Examination: Product		CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours)
Module coordinator Dr. Rivo Nugroho, M.Pd. Desika Putri Mardiani, M.Pd		Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: -		

Syllabus

The development of the world of work, which is increasingly complex and full of global competition, requires additional skills that are useful to support the performance of non-formal education graduates. This course aims to provide English learning experiences that can be used in the world of work and everyday environments. The distribution of material in this lecture is multipurpose, namely various professional work purposes such as English for educational purposes, business purposes and presentations. The scope of discussion is building a relationship, culture and entertainment, Preparing telephone calls, Making agreements, Presentation techniques, Image - impact and making impressions, Type of negotiation, Negotiation, Bargaining and making concessions. Lectures are carried out through lectures, group discussions, presentations and conversation practice.

This course serves to provide basic skills to students in listening, speaking, reading and writing. Training in the application of English in daily conversation and increasing vocabulary with general topics related to basic English used in daily conversation. The success indicators of this course are that students are expected to be able to use English correctly, both in oral and written form, students can make assignment projects in the form of videos and writing about conversations, interviews, descriptions, and so on

Course Material

1. Introduction to Cultural Diversity: The importance of respecting different cultures, views, religions and beliefs.
2. Ethics in Communication: Principles of communication that respect academic norms and values.
3. Use of English in Non-Formal Education: Strategies for implementing English in non-formal education programs.
4. Utilization of Technology in English Teaching: The use of technology to support English learning.
5. Improving English Speaking Skills: Exercises to improve English speaking skills.
6. Improving Writing Skills in English: Writing techniques according to the context of non-formal

education.

7. Collaborative Learning with English: Strategies for teamwork using English.
8. Professional Ethics in a Multicultural Environment: Responsible and professional behavior in multicultural contexts.
9. Cultural Diversity Case Study Analysis: Real-life examples of respect for diversity in education.
10. Problem Solving Techniques with Technology: Utilizing digital information to address non-formal education challenges.
11. Improving Understanding of English Materials: Techniques for mastering English materials through relevant activities.
12. Reflection and Feedback in English Learning: The process of reflection to improve the use of English.
13. Application of English in Community Programs: Practical examples of using English in community-based education programs.

Learning goals and qualifications in this module students learn to:

PLO

Learning outcomes (PLO+CLO)

PLO 10

Able to communicate both written and verbally in accordance with academic values, norms and ethics.

PLO 11

Able to utilize technology and information in solving problems according to their field of expertise

PLO 12

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics

CLO

CLO 1

Able to have positive character, such as appreciate the diversity of cultures, views, religions and beliefs as well as other people's original opinions or findings (A5)

CLO 2

Have knowledge in accordance with learning outcomes (C2)

CLO 3

Have skills in Applying English material and practice (C3)

CLO 4

Be able to create innovative program and the use of English into the Non formal education program (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Core readings:

Module number 1000002104	Module name Final Project Proposal Seminar		
Type of course Core module		Semester / Rotation 7 th / Odd Semester	Student capacity: 37
Teaching methods Lecturing, Group Discussion, Project-based Learning		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Participation (40%) Product (60%) Duration of Examination: Product			CU (+Workload in hrs) 2 Credits x 16 meetings x 170 minutes /60 minutes = 90.6 hours/Semester (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours) ECTS (+Workload in hrs) 2 Credits x 1.59 = 3.18 ECTS (26.65 Hours in Class, 31.98 Hours in structured assignment, 31.98 Hours Self-Study (together 90.61 hours)
Module coordinator Prof.Dr. I Ketut Atmaja Johny Artha, M.Kes.			Semester week hours: 16 meetings (45.3 hours x 2 CU = 90,6 hours)
Additional teacher involved: Dr. Sjafiatul Mardiyah, S.Sos., M.A. Dr. Widodo, M.Pd. Dr. Wiwin Yulianingsih, S.Pd., M.Pd. Rivo Nugroho, S.Pd., M.Pd. Dr. Heryanto Susilo, S.Pd., M.Pd. Widya Nusantara, S.Pd., M.Pd. Dr. Rofik Jalal Rosyanafi, M.Pd.			
Syllabus This course is one of the courses in the UPNFE Unesa, which is designed to develop students' insight into actual NFE problems, improve their ability to organize and present problems and become active participants in seminars, and improve skills in holding seminars in the field of NFE. The scope of this course covers actual issues or problems in the field of NFE which are outlined in one complete paper, consisting of identification and formulation of problems, development of a framework for thinking, discussion, and recommendation conclusions. The objectives of the Proposal Seminar course in the Nonformal Education (PNF) Study Program usually include Developing and Sharpening Research Proposals, Developing Presentation Skills, Improving Analytical and Critical Skills, Understanding Research Methodology, Preparing for Thesis proposal or Thesis. Overall, the purpose of this course is to prepare students to be able to compile, present, and develop research proposals that are ready to be implemented			
Course Material Assist the students to create a research Advising the students in design their research using research method Advising the students in using theory related to their research design and research topics			

Learning goals and qualifications in this module students learn to:

PLO 1

The students master how to use research method (C2, C3)

PLO 2

The students ready and have skill in writing scientific article and research related to an academic purposes (P2)

PLO 3

The students have perception of academic skill and be able to create research proposal (C6)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus

This course provides knowledge for students to understand the nature and concept, and also practice in writing scientific papers, which makes them able to master the topics about scientific papers, preparation types and principles, and also able to develop one scientific paper that is based on research or conceptual writing. The success indicator of this course is that students can compile papers, papers, and compile simple research reports into writing with the correct format and under the specified rules. Examine and develop various theoretical concepts and practices related to scientific knowledge both through scientific thinking processes and scientific research to support the smooth preparation of scientific seminar papers and thesis research papers. The indicator of the success of this course is if students are able to implement theory into the practice of Non Formal Education.

Course Material

1. Basic Concepts of Research in Non-Formal Education: Understanding of the principles and objectives of research.
2. Non-Formal Education Research Procedures: Steps in designing effective research.
3. Creative and Critical Research Design: Strategies in designing innovative and relevant research.
4. Collaboration in Research: Techniques for working together in a non-formal education-based research team.
5. Technology Utilization in Research: The use of digital tools and applications to support research.
6. Communication in Research: Techniques to convey research results orally and in writing in accordance with academic norms.
7. Research Data Collection: Techniques and tools for collecting qualitative and quantitative data.
8. Research Data Analysis: Methods for analyzing data in the context of non-formal education.
9. Research Report Preparation: Guidelines for preparing a clear and systematic research report.

10. Research Ethics in Non-Formal Education: Professional and ethical principles in conducting research.
11. Case Studies of Non-Formal Education Research: Analysis of real examples of the application of research in the non-formal field.
12. Research Reflection and Evaluation: Reflection process to improve the quality of research.
13. Positive Attitude in the Research Process: Develop characters that support the implementation of research responsibly and with integrity.

Learning goals and qualifications in this module students learn to:

PLO

PLO 6

Able to organize themselves in communicate both in writing and orally in accordance with academic values, norms and ethics (A4)

PLO 7

Able to utilise technology and information in problem solving efforts according to their field of expertise (C3)

PLO 8

Able to show (Having positive character) a responsible and collaborative attitude in accordance with professional norms (A5) and ethics

CLO

CLO 1

Mastering research concepts and procedures so as to be able to design and implement research in the field of Non-formal Education critically, creatively, collaboratively, communicatively, literate in information technology (IT), and have integrity and character (A5)

CLO 2

Have the skills to analyze and implement the steps of conducting research in a research design (C4, C3).

CLO 3

Have a skill to assess the social norm and have positive attitude to follow learning well (A3, A5)

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus This course is designed for students to have an understanding of the basic concepts of social workers, the profession of social workers, the characteristics of social workers, methods and techniques in social work, as well as the ability to link social problems with social work efforts from a Non-formal and Informal Education perspective, linking social work methods (individual, group, community) to be able to play a role as Non-formal and Informal Education program managers and community empowerment. Lectures are conducted through lectures, discussions, field trips, practice and assignments. Indicators of success in this course are that students are able to understand the basic concepts of social workers, the profession of social workers, the characteristics of social workers, methods and techniques in social work. The purpose of the Social Work course is to provide basic understanding and skills to students who will become professional social workers, and enable students to have the skills of Conceptual Understanding, Practical Skills, Application of Theory to Practice, Analysis of Social Problems, Professional Ethics, Involvement in Social Policy, Teamwork and Collaboration. By achieving these objectives, it is expected that graduates of the Social Work course can play an effective role in assisting individuals, families, and communities in overcoming social problems and improving their quality of life.			
Course Material 1. Basic Concepts of Problem Solving in Non-Formal Education: Principles and approaches in overcoming challenges in non-formal education. 2. Non-Formal Program Planning Procedure: Steps to design an andragogy-based program. 3. Implementation of Problem Solving Strategies in the Community: Techniques for practical application of solutions in the community. 4. Non-Formal Education Program Evaluation: Methods to evaluate the success of the designed			

program.

5. Technology in Problem Solving: Utilization of digital tools and applications to support solution implementation.
6. Andragogy in Problem Solving: An andragogy-based approach in designing solutions for communities.
7. Effective Communication in Non-Formal Programs: Communication techniques to deliver solutions collaboratively.
8. Collaboration in Problem Solving: Strategies for cooperation in solving community problems.
9. Development of Follow-up Plan: Designing steps to implement solutions in a sustainable manner.
10. Professional Ethics in Problem Solving: Ethical principles in managing challenges and solutions in the community.
11. Community Problem Solving Case Study: Analyze real-life examples of implementing problem solving strategies.
12. Reflection and Improvement of Problem Solving Strategies: Reflection process to improve the effectiveness of solution implementation.
13. Strengthening Positive Attitudes in the Problem Solving Process: Character development that supports creative, critical, and collaborative work.

Learning goals and qualifications in this module students learn to:

PLO

PLO 7

Mastering the process of planning, implementing and evaluating Non-Formal Education and Community Education programmes

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

PLO 12

Able to show a responsible and collaborative attitude in accordance with professional norms and ethics

CLO

CLO 1

Mastering problem-solving concepts and procedures so as to be able to design and implement them in the field of Non-formal Education critically, creatively, cooperatively, communicatively, information technology (IT) literacy, and have integrity and character (C2).

CLO 2

Have the skills to implement problem-solving strategies in the community (C3).

CLO 3

Have a positive attitude to follow learning well (A5).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Syllabus

This course provides an understanding and ability of the basis, purpose and function of site laboratories, basic criteria for lab. sites, identification of community learning needs and resources, preparation of Lab. site programs from planning, implementation to evaluation of PNFI programs, through explanation, discussion and practicum with a Project Base Learning (PjBL) approach. this course focuses on realizing the practice of activity programs learned during lectures. Off-campus non-formal education laboratories are Kawi Farm and Edu Farm. Kawi Farm and Edu Farm are oriented to create activity programs that involve the community to participate in agricultural activities from planning to distributing crops. From here students learn the management of non-formal education activities and programs such as identifying community needs, processing educational potential in the community, to community empowerment.

Course Material

1. Fundamentals of Non-Formal Education: Understanding of the basic concepts and principles of non-formal education.
2. Non-Formal Education Laboratory Management: Lab site management strategies as a realization of lifelong learning.
3. Theory and Concept of Community Development: Non-formal education approaches in community development.
4. Non-Formal Education Program Planning: Steps to design an education program based on community needs.
5. Implementation of Andragogy-Based Learning: Teaching strategies relevant for adult learners.
6. Non-Formal Education Program Evaluation: Techniques to effectively evaluate program success.

7. Social Entrepreneurship Development in Education: Applying entrepreneurial principles to support the sustainability of education programs.
8. Data Analysis for Problem Solving: Utilizing data and information to support decisions in non-formal education.
9. Principles of Lifelong Learning in Non-Formal Education: Actualization of lifelong learning in program management.
10. Creativity and Innovation in Program Management: Encouraging new approaches to improve the quality of education.
11. Collaboration in Program Development: Strategies for cooperation with the community and other stakeholders.
12. Information Technology in Non-Formal Education Management: The use of IT to support program planning, implementation and evaluation.
13. Reflection and Improvement of Non-Formal Education Programs: The use of reflection results to improve the quality of program management.

Learning goals and qualifications in this module students learn to:

PLO

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education and community education programs.

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs and community education

PLO 8

Able to design and implement Andragogy-based Learning in Non-Formal Education and Community Education

CLO

CLO 1

Understand and master theories and concepts about managing non-formal education field laboratories (lab sites) as a whole and contextually as an actualization of the principles of innovative, creative, and quality lifelong learning (C2).

CLO 2

Analyze and Able to make appropriate decisions in the context of problem solving through the scientific development of Nonformal Education based on the results of information and data analysis (C4) .

CLO 3

Mastering the concepts and procedures of community development through the Nonformal Education approach critically, creatively, cooperatively, communicatively, literate in information technology (IT), and have integrity and character (A5).

CLO 4

Able to manage (organize) the Nonformal Education programs based on devotion, independence, and social entrepreneurship (A4) .

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating

something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

Core readings:

1. Sudjana. 2004. Manajemen Program Pendidikan . Bandung: Falah.
2. TIM. 2012. Pedoman Pelaksanaan Pengelolaan Laboaratorium Site. Surabaya: Unipress
3. **Müller, M., & Williams, L. (2021).** *Managing Non-Formal Education Laboratories: Approaches and Strategies for Effective Site Management.* Journal of Non-Formal Education, 33(2), 115-128.
4. **Smith, A., & Brown, J. (2020).** *Best Practices in Laboratory Site Management in Non-Formal Education Settings.* Journal of Educational Facility Management, 22(4), 211-225.
5. **Taylor, R., & Khan, H. (2022).** *Effective Management of NFE Laboratories: Ensuring Educational Impact and Sustainability.* International Journal of Educational Management, 37(6), 45-59.

Syllabus The objectives of the Human Resource Development (HR) course usually include several important things that focus on learning and applying concepts in the management and development of employees in organizations, Understanding HR Concepts, Developing HR Competencies, Improving Managerial Capabilities, Analyzing Training and Development Needs, Developing Leadership and Individual Potential, Overcoming Challenges in HR Development, Applying Ethics in HR Development. This course as a whole aims to prepare students to become professionals who are able to manage and develop HR effectively for the success of the organization. Learning methods for Human Resource Development (HRD) courses are structured to provide an in depth understanding of workforce development strategies, concepts, and practices. learning methods that are often used: Lectures, case studies, group discussions, individual and group assignments. With a combination of these methods, students are expected to understand the theory and practice of HR development, as well as develop analytical, communication, and problem solving skills that are relevant for the world of work. Course Material 1. Fundamentals of Non-Formal Education: An understanding of the concepts and principles of non-formal education. 2. Human Resource Development (HRD): Theories and concepts of human resource development in non-formal education programs. 3. Principles of Andragogy-Based Learning: Learning strategies for adult learners. 4. Non-Formal Education Program Planning: Steps to design a program based on community needs. 5. Non-Formal Education Program Implementation: Effective and sustainable program implementation techniques.		

6. Non-Formal Education Program Evaluation: Methods to assess the success of the program and its impact.
7. Community Development through Non-Formal Education: Critical and creative approaches to increase community capacity.
8. Social Entrepreneurship in Non-Formal Education: Application of entrepreneurial principles to empower communities.
9. Data-Based Decision Making: Information analysis techniques for decision support in non-formal programs.
10. Collaboration in Program Management: Collaboration strategies that are in accordance with professional norms and ethics.
11. Information Technology in Non-Formal Education: Utilization of digital tools to support program implementation.
12. Principles of Lifelong Learning: Actualization of lifelong learning values in non-formal education.
13. Reflection and Innovation in Program Management: Using the results of reflection to improve the quality of education programs.

Learning goals and qualifications in this module students learn to:

PLO

PLO 1

Master the basic concepts of Non-Formal Education to manage non-formal education and community education programs

PLO 4

Able to design and implement Andragogy-based learning in Non-Formal Education and Community Education.

PLO 5

Able to empower the community and apply social entrepreneurship in the management of NonFormal Education unit institutions.

PLO 8

Able to demonstrate a responsible and collaborative attitude in accordance with professional norms and ethics.

CLO

CLO 1

Understand and master the theories and concepts regarding Human Resource Development (PSDM) in Non-formal Education programs completely and contextually as the actualization of innovative, creative and quality lifelong learning principles(C2).

CLO 2

Able to analyze and make appropriate decisions in the context of problem solving through scientific development of Non-formal Education based on the results of information and data analysis (C4).

CLO 3

Mastering the assessment of concepts and procedures of community development through a non-formal education approach that is critical, creative, cooperative, communicative, literate in information technology (IT), and has integrity and character (A3).

CLO 4

Able to manage Non-formal Education programs that are based on devotion, independence and social entrepreneurship (A4).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.

UNDERGRADUATE PROGRAM OF
NON FORMAL EDUCATION

SEMESTER 8

TABLE OF CONTENTS

1. Final Project

Module number 1000004105	Module name Final Project		
Type of course Core Module		Semester / Rotation 8th / Even Semester	Student capacity: 37
Teaching methods Project-based Learning, Survey, Problem-based Learning		Prerequisites for attendance None	Language Bahasa Indonesia/English for International Class
Type of examination (Final Grade Composition) Product (100%) Duration of Examination: Performance Product			CU (+Workload in hrs) 4 Credits x 16 meetings x 170 /60 = 181,33 hours/Semester (181.20 Practicum (together 181,3)) ECTS (+Workload in hrs) 4 Credits x 1.59 = 6,36 ECTS (181.20 Practicum (together 181,3))
Module coordinator Dr. I Ketut Atmaja Johny Artha, M.Kes. Prof. Dr. yatim Riyanto,M.Pd.			Semester week hours: 16 meetings (45.3 hours x 4 CU=181 hours)
Additional teacher involved: -			
Syllabus The final thesis assignment course is a course aimed at making students understand and able to apply basic research concepts. In this final assignment, students are directed to prepare a research proposal by examining a problem (background), identifying the problem, problem limitations, problem formulation and research objectives. Then proceed with a literature review, conceptual framework for thinking, and preparation of temporary hypotheses. Next, data collection and technical data analysis are carried out which are adjusted to the determined problem formulation. As a result, data analysis will be carried out, providing an explanation of the results of data analysis, making conclusions and compiling a research report according to correct writing techniques and free from plagiarism. After passing plagiarism, students are scheduled to conduct a thesis examination session by the examining lecturer before being declared a graduate. By completing a thesis, students demonstrate their ability to conduct structured and scientific research, and are ready to face professional challenges in their field.			
Course Material 1. Fundamentals of Research in Non-Formal Education: Understanding the basic concepts of research to prepare the final project. 2. Problem Identification and Analysis in Non-Formal Education: Techniques for recognizing and evaluating research issues. 3. Non-Formal Education Research Methodology: Strategies in choosing appropriate research methods. 4. Final Project Planning: Steps to develop a final project proposal systematically. 5. Utilization of Information Technology in Research: Tools and applications that support data collection and analysis. 6. Effective Academic Writing: Techniques for writing research reports in a scientific format. 7. Academic Ethics in Research: Principles of avoiding plagiarism and maintaining integrity in research.			

8. Collaboration in Final Project Completion: Strategies for cooperation in team research projects.
9. Time Management in Research Projects: Techniques for managing time to complete the final project efficiently.
10. Final Project Evaluation and Validation: The process of reviewing and improving the quality of research.
11. Use of Technology for Presentation of Research Results: How to create engaging presentations using digital tools.
12. Reflection and Self-Development in Research: The process of learning from the experience of completing the final project.
13. Responsibility in Final Project Completion: Developing an independent and responsible attitude in completing the final project.

Learning goals and qualifications in this module students learn to:

PLO

PLO 3

Develop logical, critical, systematic, and creative thinking in doing specific work in their field of expertise and in accordance with the work competency standards of the field concerned. **PLO 4**

Continuous self-development and collaboration.

PLO 5

Mastering the basic concepts of Non Formal Education to manage non-formal education programs

PLO 7

Mastering the process of planning, implementing and evaluating non-formal education programs

PLO 11

Able to utilize technology and information in problem solving efforts according to their field of expertise

CLO

CLO-1

Students are able to compile and analyze problems in research in the field of non formal education (C4)

CLO-2

Students are able to apply various information technologies in preparing their final thesis assignment (C3).

CLO-3

Students are able to organize and collaborate on the performance of preparing their final assignment independently both theoretically and practically (A4).

CLO-4

Students are able to create a research design, also be able to do research and develop an attitude of responsibility in completing the final assignment and prove it with plagiarism-free final assignment results (C6).

Classification of cognitive skills following Bloom (1956):

1 = *Knowledge*: recalling facts, terms, basic concepts and answers; 2 = *Comprehension*: understanding something; 3 = *Application*: using a general concept to solve problems in a particular situation; 4 = *Analysis*: breaking something down into its parts; 5 = *Synthesis*: creating something new by putting parts of different ideas together to make a whole; 6 = *Evaluation*: judging the value of material or methods.
