A.4. MAPPING OF LEARNING OUTCOMES – COURSE OUTCOMES

A.4.1. The Expected Program Learning Outcomes (PLO) of Undergraduate Program of Chemistry (UPC)

NO	ASPECTS	PLO	CODE
1	KNOWLEDGE	1. Mastering the concepts of structure, dynamics and energy, as well as the basic principles of separation, analysis, synthesis and characterization of micromolecular compounds and their application	KNO-1
		2. Mastering the basic principles and knowledge of how to operationalize instruments for the analysis and characterization of chemical compounds, and utilize ICT for modeling more specific chemical molecules	KNO-2
2	SKILL	3. Mastering the principles of K3 (Occupational Safety and Security), managing laboratories and using their equipment and how to operate chemical instruments	SKI-1
		4. Applying science, technology, and art and having the initiative in making the right, honest and responsible decisions in solving chemical problems	SKI-2
3	COMPETENCIES	5. Applying logical, critical, systematic and innovative thinking in the context of developing or implementing science and technology by paying attention to and applying humanities values that are appropriate to the field of chemistry in solving problems	COM-1
		6. Mastering the basics of the scientific method, designing and carrying out research, compiling scientific reports and communicating them both orally and in writing by utilizing information and communication technology	COM-2
4	ATTITUDE AND SOCIAL	7. Build cooperation and have entrepreneurial skills that are environmentally insight	SOC-1
		8. Able to adapt to various developments in chemistry, continue to develop and learn lifelong to continue education, both formal and informal	SOC-2

A4.2. The Education Program Objectives (PEOs) of Career Development

PEO 1. Mastering chemical concepts, basic principles of chemical instruments, laboratory organization, K3, scientific methods and ICT and being able to apply them to solving problems in their work

PEO 2. Having the high-order thinking skills to communicate ideas verbally and in writing, able to take appropriate initiatives and decisions, and lead work groups in relevant fields (academics).

PEO 4. The ability to continue to develop and learn throughout life to continue education, both formal and informal

PEO 5. Able to develop and apply chemical competences in line with advances in science and technology and humanities values

B. COURSE ASSESSMENT

B.1. Assessment Rubric

Cognitive Criteria

1. The ability to give answers correctly
2. The ability to provide argumentation according to theory
3. The ability to provide systematic explanations
4. The ability to solve problems comprehensively

B.2. Assessment System

Final Assessment Course with practicum

Group/Individuals Assignment : 20%

Midterm examination : 30%

Final examination : 30%

Distribution of the weight of the ability of the test item

	PLO 6 (COM-2)	PLO 8 (SOC-2)	Total
Practicum	60%	40%	100%
Group/Individuals Assignment	80%	20%	100%
Midterm examination	70%	30%	100%
Final examination	70%	30%	100%

Success Criteria of Program Learning Outcomes (PLO)

Excellence	80
Good	70
Satisfy	55
Fail	> 0

Final index for undergraduate program defined as follow:

Final Index	Range
A	4 (85 - 100)
A ⁻	3,75 (80 - 85)
B ⁺	3,5 (75 - 80)
B	3 (70 - 75)
B ⁻	2,75 (65 - 75)
C ⁺	2,5 (60 - 65)
C	2 (55 - 60)
D	1 (40 - 55)
E	0 (0 - 40)

C. COURSE DEVELOPMENT

C.1. Academic Year 2019/2020 odd semester

Parameter	of person	Percentage
Number or students taking this subject	25	100%
Number of students who pass at first attempt (>C ⁺)	25	100%
Number of students who pass at first attempt (= C)	0	0%
Number of failed students after remedial (D & E)	0	0%

C.2. Problems Analysis

In 2019/2020 academic year in the Career Development course, there were 100 % students had passed the examination at the first attempt. At the end of the Semester Examination there is no remedial. There are not students that obtain the grade lower than C⁺. Therefore, learning strategies / methods need to be improved to achieve even better results.

C.3. Solutive Strategy

New teaching and learning methods should be developed for the next academic years, consisting of:

1. There needs to be a group study in understanding the career development, so that students teach each other, and peer tutors occur.
2. Enhance the cooperative skills of students with exchange the methods and models of learning

D.1.1. Lecture's journal and student's attendance form siakadu.uneca.ac.id for Chemistry Class-2017

THE MIDDLE TEST OF EVEN SEMESTER 2019/2020

Subject : Career Development
Department/Faculty : Chemistry/ Mathematics and Natural Sciences
Class : S1/ Chemistry of 2017
Day/ Date : Wednesday/ 26 March 2020
Time allocation : 1 (0/ 00) – 08.40/ 100 minutes)
Lectures : Prof.Dr. Suyatno, M.Si + Team

Direction: Answer the following questions correctly!

- PT Sawit Indonesia Industry which is engaged in the Vegetable Oil sector opens Quality Control (QC) staff vacancies with the following requirements:
 - Male, maximum age 26 years
 - S1 Chemistry / Chemical Engineering / Industrial Engineering
 - Willing to work shift system
 - Minimum GPA of 3.0 on a 4.0 scale

D.2.2. Sample of Student's Work from Chemistry Class-20017

Name : Dimas Ayu Yulianti
Registration number : 17030234012
Class: KA-2017

$$\frac{2.3}{3} = 77$$

The Answer of the the Middle Test of Career Development

1. a. Abilities that are included in hard skills are: S1 Chemistry / Chemical Engineering / Industrial Engineering; Minimum GPA of 3.0 on a 4.0 scale; Have the ability to analyze food chemistry and microbiology (preferably); not color blind. Abilities included in soft skills are: Able to work in teams and individually; Able to communicate well, be disciplined, and have high motivation; Willing to work shift system.
 - b. The ability of hard skills and soft skills is needed by a company, because the ability of hard skills is a technical and academic competence in accordance with the scientific background being studied so that the knowledge gained will be useful for carrying out their work. Meanwhile, soft skills are basically personal skills, special skills that are non-technical in nature, and include skills interpersonal such as the ability to communicate and work together in a group. So that soft skills are needed in order to complement the hard skills that you already have.
2. In carrying out life's activities, it would be better if we manage everything well. To do this task, we must be clever to manage time as effectively as possible so that we can achieve goals or be able to complete a job faster and with better results. Must be able to schedule activities so that all activities to be carried out can be well organized. To win a company presentation, we must be confident in giving a presentation in front of bidders. In order to have high self-confidence, we have to do affirmations and visualizations before the presentation, master the material, prepare for our physical appearance by appearing neat and polite, standing aloud, and speaking out loud. To promote a product, of course, you must also have a high creative level to produce innovative ideas, something unique and attract attention. The last one is worshipping and praying to God Almighty. Always think positively, because positive action comes from positive thoughts. Nobody is successful in life if they always think negatively about themselves and others. By mastering it all, God willing, everything will work well and the company will win the competition.

3. To produce a new product, of course, requires the ability to think creatively within oneself. Developing a product can be done by applying one of the 9 techniques of developing a product consisting of Enlarge or Minimize, Modify, Invert, Eliminate, Reorganize, Combine, Adopt or Adapt, Substitution, Other Applications. Developing new types of traditional herbal medicine products can be done by modifying them, initially the herbal medicine is available in liquid form, and then new types can be developed, namely powder, tablet, and effervescent tablets. By modifying the dosage form of herbal medicine, the dosage and its properties must be maintained and should not be worse than before. So that the ability to think creatively is needed in this case.

Bagian A

(1) Karena guru mengajarkan model pengajaran, ada beberapa yang tidak termasuk tersebut.
Menurut teori komunikasi **James Paul Jay (Lubiano, 1990)** mengutarakan bahwa seorang

20 guru harus memiliki keterampilan berkomunikasi dalam kegiatan pembelajaran, ada 4 keterampilan pokok yaitu:

A) Guru mampu menyampaikan pesan positif dalam kegiatan pembelajaran

Salah satunya harus mampu mengolah perasaan dan keinginan diri sendiri dalam

menyampaikan pesan dan perasaan sehingga dapat dipahami orang lain dapat
berikutnya pesan dalam pembelajaran

B) Kemampuan guru untuk bekerja keras dan tekun dalam kegiatan pembelajaran

C) Kemampuan guru untuk tampil berprestasi-sungguh.

D) Kemampuan guru untuk mengelola situasi dalam kegiatan pembelajaran.

Salah satu tidak mengaham materi yang disampaikan oleh guru. Seorang guru
harus dapat mengaham komunikasi yang lebih efektif. Menurut **Mulyono (2000)**, ke

berhasilan berkomunikasi itu salah satunya komunikator dapat memahami

orang yang diarahkan sebagai komunikan. Jadi guru tersebut harus memperhatikan diri

terlebih dahulu **kebutuhan dan keinginan muridnya**.

(2) Berkomunikasi dapat menimbulkan keberanian, tetapi juga dapat menimbulkan ketegangan.

10 Komunikasi dapat menimbulkan keberanian karena dengan komunikasi akan terdapat

kepercayaan bahwa komunikasi tersebut tidak menimbulkan dari ancaman berkomunikasi

yang baik serta dapat diterima oleh sesama komunikasi.

Namun, komunikasi juga dapat menimbulkan ketegangan, karena komunikasi tersebut menga-

lami gangguan ketika diterima oleh sasaran komunikasi. **Karena adanya gangguan,**

komunikasi dapat menjadi sebuah informasi yang tidak sehingga **penyakit komunikasi**.

➤ **belum dijelaskan gangguan yg bagaiman?**

(3) Masih adanya kesalahan, sedangkan ada pihak lain yang menyantuni anak yatim,

hal ini berakibat pada diri mereka. Menurut **Abdullah Mawardi**, bahwa

terdapat beberapa bentuk dari ilmu kebiduan, yaitu:

20 - Fisiologi; Rasa aman; Seksual; Penghargaan; dan aktualisasi diri.

Adanya perasaan hanya bergantung pada kebutuhan fisiologi saja yang meliputi

rasa haus, lapar, berakut, seksual dan kebutuhan fisik lainnya tanpa melihat

kebutuhan rasa aman. Mereka melakukan apa saja yang penting mereka rasakan.

Sedangkan orang yang menyantuni anak yatim, mereka telah **kepuasan kebutuhan**

fisiologi dan rasa aman, sehingga termotivasi untuk kebutuhan sosial. (Lub)

4) 2 cara memotivasi :

1. **Motivasi langsung** = motivasi yang diberikan secara langsung kepada karyawan untuk memenuhi kebutuhan dan keinginan.

Contoh : memberikan pinjol kepada karyawan. Memberikan bonus kepada karyawan.

2. **Motivasi tidak langsung** = motivasi yang diberikan melalui pemberian fasilitas-fasilitas yang mendukung growth kerja / kelancaran kerja.

Contoh : Menyediakan fasilitas yang lengkap terhadap pekerjaan kepada karyawan → pemasangan air untuk bekerja.

5) dua cara membangun tim kerja produktif dan efektif :

1) **Membangun tim kerja tujuan** yang akan dicapai, dalam organisasi target ditetapkan

tersebut terutama dalam tujuan yang sama karena komponen pengikutnya adalah sesama anggota.

2) **Membangun pembinaan kerja hubungan kerja**. Pembinaan hubungan kerja yang

dilakukan oleh pemimpin perusahaan dengan anggota yang lain. Sehingga

pembinaan hubungan kerja dikatakan berhasil apabila tercapai adanya kerjasama

antar anggota organisasi perusahaan tersebut. Sehingga kerja sama akan tercapai dengan baik.
