ENDORSEMENT PAGE

Declaring that the 2021 Learning Monitoring Report for Lecturers in the Undergraduate Study Program in the Department of Mechanical Engineering, Electrical Engineering, Civil Engineering, Informatics Engineering and Family Welfare Education of the Faculty of Engineering is actually made.

Surabaya, December 20, 2021
Head of Quality Assurance Cluster,

Dra. Suhartiningsih, M.Pd.
NIP.195711221984032001

FOREWORD

Praise be to Allah SWT, for all His abundant grace, so that the learning monitoring and evaluation report can be completed properly. The preparation of this report could not be separated from the help and support from various parties. The highest gratitude and appreciation goes to:

1. Chancellor, Vice Chancellor for Academic Affairs, Vice Chancellor for Finance at the State University of Surabaya.
2. The Unesa PPM team which has provided guidance, input, and advice regarding the monitoring and evaluation of learning.
3. Dean, Deputy Dean for Academic Affairs, and Deputy Dean for Finance, Faculty of Engineering, State University of Surabaya who have supported the implementation and implementation of learning monitoring and evaluation.
4. The Faculty of Engineering GPM team which has helped assist, monitor, and participate in monitoring and evaluation of learning activities at the Faculty of Engineering Unesa.
5. The UPM team has provided information and carried out monitoring in their respective study programs.

Constructive criticism and suggestions from readers are highly expected for the perfection of the monitoring activity report and subsequent learning evaluation. Hopefully this report can be useful for readers.

Surabaya, December, 30 2021

Team GPM FT Unesa

A. Results of Non-conformance Recapitulation of Lecturer Learning Monitoring at the Faculty of Engineering 2021

The implementation of learning activities at the State University of Surabaya in the even semester of 2021/2022 is carried out online, this is done to prevent the spread of the Covid-19 virus according to the applicable circular. Learning monitoring activities are also carried out online, then the auditor fills out and uploads the monitoring results file using a google form. The results of the recapitulation of learning monitoring activities are based on the results of data filling out google forms that have been carried out by the UPM team and auditors in each study program at the Faculty of Engineering, State University of Surabaya. Consists of 13 undergraduate study programs (S1) from the Department of Electrical Engineering, Mechanical Engineering, Civil Engineering, PKK Engineering, and Informatics Engineering. According to the schedule that has been proposed, each course will be monitored by 2 supervisors. Each study program takes 3 courses as representatives to be monitored. The recapitulation data related to the presence or absence of learning monitoring discrepancies is more clearly presented in Table 1.

A. Non-conformance of Learning Monitoring and Evaluation

The implementation of learning monitoring and evaluation (Monev) activities for the Faculty of Engineering, State University of Surabaya (Unesa) was carried out on the 9th meeting to the 12th meeting in Odd Semester 2021/2022 at the Department of Mechanical Engineering (TM), Department of Electrical Engineering (TE), Department of Civil Engineering (TS), Department of Informatics Engineering (TIF), and Department of Family Welfare Education Engineering (PKK). The monitoring and evaluation is carried out using instruments that have been provided by the Unesa Quality Assurance Unit (SPM). GPM makes a monitoring and evaluation system using google forms, the results of which can be directly accessed by UPM and GPM. With the following address:

Table 1. Links for the monitoring and evaluation form for undergraduate study programs (S1) at the Faculty of Engineering, Unesa

No	Departments and Study Programs	Learning Monitoring Form	E-mail
1	Department of Mechanical Engineering Study Program: a. Undergraduate Mechanical Engineering Education b. Undergraduate Mechanical Engineering	https://bit.ly/JTMMonevPMBJ	gpm_ft@unesa.ac.id akhmadrasyid@unesa.ac.id
2	Department of Electrical Engineering Study Program: a. Undergraduate Electrical Engineering b. Undergraduate Electrical Engineering	https://bit.ly/JTEMonevPMBJ	gpm_ft@unesa.ac.id lusiarakhmawati@unesa.ac.id
3	Department of Civil Engineering Study Program: a. Undergraduate Civil Engineering Education b. Undergraduate Civil Engineering	https://bit.ly/JTSMonevPMBJ	gpm_ft@unesa.ac.id danayantinusantara@unesa.ac.id
4	Family Welfare Education Engineering Study Program Department: a. Undergraduate Culinary art education b.	https://bit.ly/JPKKMonevPMBJ	gpm_ft@unesa.ac.id choirulanna@unesa.ac.id

	Undergraduate Fashion Education c. Undergraduate Cosmetic Education d. Undergraduate Nutrition		
5	Departments of Informatics Study Program : a. undergraduate Information Technology education b. undergraduate Informatics Engineering c. undergraduate Information System	https://bit.ly/JTIFMonevPMBJ	gpm_ft@unesa.ac.id paramithanerisafitra@unesa.ac.id

The implementation is like what other faculties in Unesa do, which is divided into 3 learning domains (preparation, implementation, and evaluation of learning).

B. Discrepancy Based on Domain Teaching Preparation, Teaching Implementation, and Teaching Evaluation

The three learning domains at the Unesa Faculty of Engineering as a whole have been carried out well. Findings from the results of monitoring and evaluation of learning From the three domains, there is a discrepancy. The findings of a discrepancy are shown in Table 1.

Table 1. List of levels of conformity and non-conformance of learning monitoring results

No	Activity	not in accordance	in accordance	Total
1	Preparation	1,3%	98.7%	100%
2	Implementation	1,5%	98.5%	100%
3	Evaluation	15,7%	84.3%	100%

Figure 2. Average Discrepancy Diagram based on Learning Domain (teaching preparation, teaching implementation, and teaching evaluation)

To find out whether there is a learning discrepancy, the Faculty of Engineering Quality Assurance Group uses an instrument from the Unesa SPM which consists of 32 statement items. Monitoring and evaluating at the learning preparation stage consists of 12 statement items, the learning implementation stage consists of 16 statement items, the learning evaluation stage consists of 4 statement items. The recapitulation of the results of the lecturer's learning monitoring and evaluation based on the instrument items is shown in Figure 3.

There is a discrepancy in the learning preparation stage, the percentage value in the TS Department is 4.2% and the PKK Department is 2.3%. The mean value of non-conformance in the preparation domain is more clearly presented in Figure 2.

Figure 3. Diagram of the Percentage of Non-conformance in the Learning Preparation Stage

The results of monitoring at the learning implementation stage showed a discrepancy with the percentage value in the PKK Department of 2.5% and the TM Department of 1.6%. This is because some lecturers in the FT study program have implemented each item in the implementation of learning at the previous meeting, then students have understood the stages of delivering material from the beginning to the end in one unit. The average value of non-conformance in the implementation domain is more clearly presented in Figure 4.

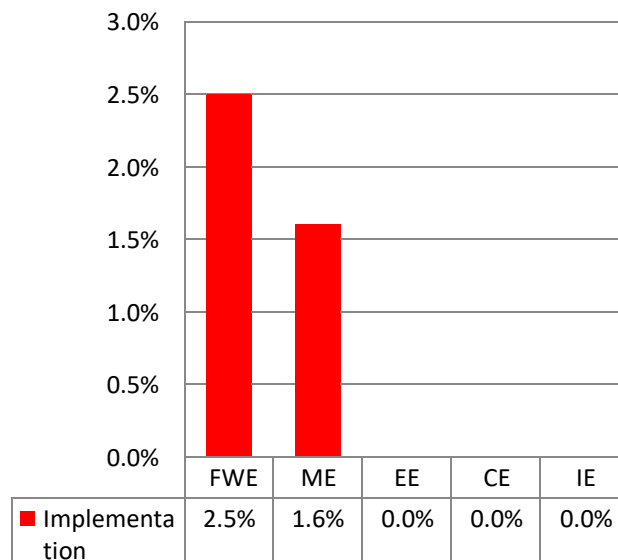

Figure 4. Diagram of the Percentage of Non-conformance in the Learning Implementation Stage

The results of monitoring at the learning evaluation stage show a discrepancy with the percentage value in the TIF Department of 19%, the PKK Department by 18.8%, TM Department by 3.6%, and TS Department by 3.6%. The mean value of non-conformance in the evaluation domain is more clearly presented in Figure 5.

Figure 5. Diagram of the Percentage of Non-conformance in the Learning Evaluation Stage

C. Follow Up Plan

The value of the largest percentage discrepancy lies in the evaluation of learning based on Figure 2. After we look more deeply, especially by using Table 1 Recapitulation of Non-conformance Monitoring of Lecturer learning at the Faculty of Engineering, we get the largest percentage value for each domain based on the items of the instrument, so that an action plan is given. further presented in Table 2.

Table 2. Follow-up plan

No	Item	Finding	Percentage of Non-conformance	Follow up plan
1	31	Lecturers have not made any assessments/measurements for each CPL/CPMK/Sub CPMK	31.3	The lecturer completes according to the assessment / measurement of each CPL/CPMK/Sub CPMK
2	32	Lecturers have not assessed UTS in accordance with time.	20.0	Lecturers conduct UTS assessments.
3	15	Lecturers have not carried out lectures according to the schedule	10.8	Lecturers who are unable to teach must replace the lecture day on current semester
4	2	The RPS that has been developed has not been approved by the head of the study program	7.5	Lecturer do RPS validation that has been developed
5	30	Lecturer has not given	6.7	Lecturer completes and

No	Butir	Temuan	Persentase Ketidaksesuaian	Rencana Tindak Lanjut
		assessment of assignments given to students		provide an assessment of the tasks assigned to college student
6	29	Lecturers have not provided an assessment of student participation (attendance, activity and behavior) in learning	5.0	The lecturer completes and provides an assessment of student participation (attendance, activity and behavior) in learning
7	17	Lecturers have not provided lecture materials as stated in the RPS	4.8	Lecturers complete and provide lecture materials as stated in RPS
8	12	Lecturers and students have not done agreement with teaching contract	4.2	Lecturers of courses and students do agreement with teaching contract
9	28	Lecturers start and end lectures not according to schedule	3.3	Lecturers start and end lectures according to the study time schedule
10	5	RPS does not contain learning strategies that reflect the student learning center	2.5	RPS is equipped and contains learning strategies that reflect student learning center
11	23	Lecturers have not applied the student center learning approach	2.5	Lecturers complete and apply student learning approaches learning center
12	13	Lecturers and students have not agreed on a lecture contract at the beginning of the lecture	1.7	Lecturers and students agree on a lecture contract at the beginning study
13	26	Lecturers have not given assignments to students	1.7	Lecturer completes and gives assignments to students
14	11	Do not have teaching materials in the form of hand-outs, power point slides, diktat, modules, or textbooks written by lecturers	1.3	Completing teaching materials in the form of hand-outs, power point slides, diktat, modules, or textbooks written by lecturers support

Therefore, in the future the Faculty of Engineering, Unesa Academic Affairs, SPM, GPM, UPM, curriculum teams, and PPTI must make every effort to disseminate information related to the preparation, implementation, and evaluation of learning in 2022.

A. Generic Description

The Faculty of Engineering, State University of Surabaya has five departments, namely the Electrical Engineering Department, the Mechanical Engineering Department, the Civil Engineering Department, the PKK Department and the Informatics Engineering Department. The total number of study programs at the engineering faculty was originally 20 study programs, then in 2021 there will be a separation into vocational faculties so that only 13 applied undergraduate courses remain. The implementation of the curriculum that has been carried out has made learning preparations, made lesson plans, currently has also implemented these plans into a process of learning activities to accommodate the latest curriculum and has used a student center approach. By applying this approach, almost all students are actively involved in all courses, thus creating a conducive climate for teaching and learning. Based on the results of the M&E implementation, several discrepancies were found, but they did not affect the overall learning process. Monitoring and evaluation of learning (MONEV) is carried out routinely and is driven by the Quality Assurance Group (GPM) of the Faculty of Engineering. Most of the lecturers have been monitored and evaluated. This is due to good cooperation and coordination between study programs through UPM and GPM, Faculty of Engineering, and PPM Unesa.

B. Conclusions from the Implementation of Learning Monitoring and Evaluation at the Faculty of Engineering

1. Execution

Monev in FT generally runs smoothly, although some study programs are not on time according to a predetermined schedule. The platforms used in learning vary, for example whats App, google classroom, zoom, meet, etc. The choice of this platform is adjusted to the type of course and has been communicated with students. Some of the challenges are for courses that have practicals. The Covid-19 pandemic has become an obstacle for several courses that require materials/tools that are not easily available today. To overcome this, lecturers use audio-visual media by making video tutorials and assigning students to analyze them. However, some lecturers have carried out limited laboratory practice as a solution.

2. Mechanism of implementation of learning monev

The mechanism for implementing learning monev in the Faculty of Engineering (FT) is as follows:

- a. the Study Program together with the Head of the Department proposed an online Learning Monev Schedule which includes courses, auditions, lecture times and the names of prospective supervisors to be addressed to GPM.
- b. GPM held a coordination meeting with UPM, Kajur and Deputy Dean 1 regarding the mechanism and implementation of learning monitoring and evaluation.
- c. The schedule for monitoring and evaluation of the Faculty of Engineering that has been prepared is socialized to UPM, supervisors, and auditees.

- d. Evaluator communicates with auditees about the timing and mechanism for monitoring and evaluation of learning.
- e. The implementation of online learning monev is carried out in accordance with the instruments socialized by BPM.
- f. Pemonev reports online learning monitoring and evaluation results to UPM and GPM.
- g. GPM makes a report on the implementation of learning monev based on data from the monev.

3. Obstacles faced

- a. The obstacle faced was the lecturer's delay in sending the evidence (screenshot) to the supervisor via the google form link, this caused the preparation of the monitoring and evaluation report at GPM, late
- b. There are concurrent activities, namely national accreditation activities and curriculum meeting activities.
- c. he delay in filling out the monitoring results on the googleform link carried out by several monitoring teams.

4. The impact of online learning monev

- a. **Positive impact: with the Monev Learning during the Covid 19 pandemic, namely improving the quality of learning by forcing lecturers to be more creative to achieve successful learning outcomes. Especially some courses that require practice (cannot be done by students) so that lecturers make video tutorials for students. In addition, lecturers are more skilled in using/choosing platforms and making learning media according to the type of subject.**
- b. Negative impact: This online learning has received complaints from students about conditions in some areas where internet conditions are not smooth, especially when there is heavy rain. Some students are tired of being at home and propose to hold lectures offline on campus.
