FACULTY OF ENGINEERING
UNIVERSITAS NEGERI SURABAYA
YEAR 2021

#### **ENDORSEMENT PAGE**

To declare that the 2020/2021 Even Semester Learning Monitoring and Evaluation Report in the Undergraduate Study Program in the Department of Mechanical Engineering, Electrical Engineering, Civil Engineering, Informatics Engineering and Family Welfare Education, Faculty of Engineering, is actually made.

Faculty of Engineering

04101990032013

Surabaya, June 11, 2020 Head of Quality Assurance Group,

> Dra. Suhartiningsih, M.Pd. NIP.195711221984032001

#### **FOREWORD**

Praise be to Allah SWT, for all His abundant grace, so that the learning monitoring and evaluation report can be completed properly. The preparation of this report could not be separated from the help and support from various parties. The highest gratitude and appreciation goes to:

- 1. Chancellor, Vice Chancellor for Academic Affairs, Vice Chancellor for Finance at the State University of Surabaya.
- 2. The Unesa PPM team which has provided guidance, input, and advice regarding the monitoring and evaluation of learning.
- 3. Dean, Deputy Dean for Academic Affairs, and Deputy Dean for Finance, Faculty of Engineering, State University of Surabaya who have supported the implementation and implementation of learning monitoring and evaluation.
- 4. The Faculty of Engineering GPM team which has helped assist, monitor, and participate in monitoring and evaluation of learning activities at the Faculty of Engineering Unesa.
- 5. The UPM team has provided information and carried out monitoring in their respective study programs. Constructive criticism and suggestions from readers are highly expected for the perfection of the monitoring activity report and subsequent learning evaluation. Hopefully this report can be useful for readers.

Surabaya, June, 11 2020

Team GPM FT Unesa

## A. Results of Non-conformance Recapitulation of Lecturer Learning Monitoring at the Faculty of Engineering 2020

The implementation of learning activities at the State University of Surabaya in the even semester of 2020/2021 is carried out online, this is done to prevent the spread of the Covid-19 virus according to the applicable circular. Learning monitoring activities are also carried out online, then the auditor fills out and uploads the monitoring results file using a google form. The results of the recapitulation of learning monitoring activities are based on the results of data filling out google forms that have been carried out by the UPM team and auditors in each study program at the Faculty of Engineering, State University of Surabaya. Consists of 13 undergraduate study programs (S1) from the Department of Electrical Engineering, Mechanical Engineering, Civil Engineering, PKK Engineering, and Informatics Engineering. According to the schedule that has been proposed, each course will be monitored by 2 supervisors. Each study program takes 3 courses as representatives to be monitored. The recapitulation data related to the presence or absence of learning monitoring discrepancies is more clearly presented in Table 1.

# B. Non-conformance of Learning Monitoring and Evaluation

The implementation of learning monitoring and evaluation (Monev) activities for the Faculty of Engineering, State University of Surabaya (Unesa) was carried out on the 9th meeting to the 12th meeting in the Even Semester 2020/2021 at the Department of Mechanical Engineering (TM), Department of Electrical Engineering (TE), Department of Civil Engineering (TS), Department of Informatics Engineering (TIF), and Department of Family Welfare Education Engineering (PKK). The monitoring and evaluation is carried out using instruments that have been provided by the Unesa Quality Assurance Unit (SPM). GPM makes a monitoring and evaluation system using google forms, the results of which can be directly accessed by UPM and GPM. With the following address:

**Tabel 2.** Link form for monitoring and evaluation of undergraduate study programs (S1) at the Faculty of Engineering, Unesa

No	Departments and Study	Learning Monitoring and	Email
	Programs	Evaluation Form	
1	Department of Mechanical Engineering Study Program: a. S1 Pend. Mechanical Engineering b. b. S1 Mechanical Engineering	http://bit.ly/MonevGenapJTM	gpm_ft@unesa.ac.id akhmadrasyid@unesa.ac.id

The implementation is like what other faculties in Unesa do, which is divided into 3 learning domains (preparation, implementation, and evaluation of learning).

# C. Discrepancy Based on Domain Teaching Preparation, Teaching Implementation, and Teaching Evaluation

The three learning domains at the Unesa Faculty of Engineering as a whole have been carried out well. Findings from the results of the monitoring and evaluation of learning from the three domains showed discrepancies. The findings of a discrepancy are shown in Table 3.

	, , , , , , , , , , , , , , , , , , , ,								
No	Activities	Not Appropriate	Appropriate	Total					
1	Preparation	1,8%	98,2%	100%					
2	Implementation	1,8%	98,2%	100%					
3	Evaluation	17,0%	83,0%	100%					
4	OBE & its	46,2%	53,8%	100%					
	implementation								

Table 3. List of levels of conformity and non-conformance of learning monitoring results

OBE and its implementation based on the data collected, has a discrepancy rate of 46.2% this is because there are several study programs that have not implemented the OBE curriculum, especially the PKK Department because they use the KKNI curriculum, Lamkes and the TIF Department are still in the process of being proposed to follow the international curriculum. In addition, along with the international curriculum, the evaluation of the implementation of the OBE-based curriculum and its implementation is also added for checking.

**Figure 1.** Diagram of the Average Discrepancy by Learning Domain (teaching preparation, teaching implementation, and teaching evaluation along with OBE implementation)

To find out whether or not there is a learning discrepancy, the Quality Assurance Group of the Faculty of Engineering uses an instrument from the Unesa SPM which consists of 25 statement items and added 3 statement items related to the Outcome Based Education (OBE) curriculum and its implementation in FT Unesa. Monitoring and evaluation at the learning preparation stage consists of 7 statements, the learning implementation phase consists of 10 statements, the learning evaluation phase consists of 8 statements, and 3 statements relating to the Outcome Based Education (OBE) curriculum and its implementation. The recapitulation of the results of the lecturer's learning monitoring and evaluation based on the instrument items is shown in Figure 2.

There is a discrepancy in the learning preparation stage, the percentage value in the TS Department is 7.1% and the PKK Department is 1.8%. The mean value of non-conformance in the preparation domain is more clearly presented in Figure 2.

Figure 2. Diagram of the Percentage of Non-conformance in the Learning Preparation Stage

The results of monitoring at the learning implementation stage showed a discrepancy with the percentage value in the TIF Department of 7.6% and the TM Department of 1.5%. This is because some lecturers in the FT study program have implemented each item in the implementation of learning at the previous meeting, then students have understood the stages of delivering material from beginning to end in one unit. The average value of non-conformance in the implementation domain is more clearly presented in Figure 3.

Figure 3. Diagram of the Percentage of Non-conformance in the Learning Implementation Stage

The results of monitoring at the learning evaluation stage showed a discrepancy with the percentage value in the TIF Department of 42.1%, the TS Department at 35.7%, the TM Department at 4.8%, and the PKK Department at 4.2%. The mean value of non-conformance in the evaluation domain is more clearly presented in Figure 4.

Figure 4. Diagram of the Percentage of Non-conformance in the Learning Evaluation Stage

The results of monitoring at the OBE curriculum stage and its implementation showed a discrepancy with the percentage value in the PKK Department of 84.7%, the TS Department at 55.6%, the TIF Department at 40.7%, the TM Department at 25%, and the TM Department at 25. %. The mean value of non-conformance at the OBE curriculum stage and its implementation is more clearly presented in Figure 5.

**Figure 5.** Diagram of the Percentage of Non-conformance of the OBE Curriculum Stage and its implementation

### D. Follow Up Plan

The percentage value of the largest discrepancy is based on Figure 1 of 5 learning domains, namely the learning evaluation domain, the learning implementation domain, and the learning preparation domain. After we take a closer look, especially based on the results of the non-conformance recapitulation of Lecturer learning monitoring at the Faculty of Engineering, we get the largest percentage value for each domain based on the instrument items, so that a follow-up plan is given which is presented in Table 4.

**Table 4.** Follow-up plan

No	Item	Findings	Percentage of Non- conformance	Follow Up Plan
Lea	rning Preparation			
1	3	RPS has been validated by a team in the science family	11,7	UPM coordinates with the department

2	2	0,8	management team
			so that lecturers
			immediately
			validate and
			RPS approval

No	Item	Findings	Percentage of Non- conformance	Follow Up Plan
Lea	rning Preparation			
3	3	Lecturers register/initiate on the platform used	3,9	Actually, lecturers have carried out registration/initiation on the platform used, but at every meeting it is not always done because students are used to it.
4	6	Lecturers are able to motivate students to participate actively during learning	3,9	The form of motivation in its implementation is sometimes different from lecturers to students, so it has actually been done

5	10	Lecturers start and end according to the lecture schedule	3,3	Amount Meeting activities can have an impact on the implementation of lectures conducted by lecturers, so that sometimes lecturers are not able to start and end according to the schedule in each lesson. The solution is that meetings are expected or conditioned on certain days, for example every Tuesday or Friday only
6	9	Lecturer does reflection at the end learning/meeting	2,2	Every time before a new teaching there should always be socialization so that the lecturer can give

No	Item	Findings	Percentage of Non- conformance	Follow Up Plan
				reflection in every learning and not missed
7	4	Lecturers conduct online learning apperceptions	2,2	Every time before a new teaching there should always be socialization so that lecturers can provide apperception in every lesson learning and not missed

8	8	Lecturers give assignments to students	2,2	There should always be socialization so that lecturers can give assignments to students in every class learning and not missed
9	2	Lecturers carry out lectures according to the schedule marked by the contents of the online journal Siakadu	2,2	The number of lecturers' activities sometimes causes delays in filling out online journals, it is better to fill in each meeting directly
Lea	rning Preparation			
10	7	The results of UTS scores are announced back to students	27,5	Socialization is needed to MK lecturers so that they are willing to immediately announce the results of USS scores
11	2	Lecturers return assignments that have been assessed to students	27,2	After the correction of assignments has been completed, the results should be returned to students immediately
12	4	Lecturers compile UTS assessment rubrics	25,8	MK supporting lecturers need to compile a Draft
No	Item	Findings	Percentage of Non- conformance	Follow Up Plan
				assessment rubric for UTS questions with the curriculum team
13	1	The lecturer gives an assessment of the assignments given to students	19,7	After being given an assignment, corrections should be

14	3	The questions in UTS*) have been validated	14,4	made immediately  The UPM team and its members should
15	5	UTS is held according to the	4,4	socialize and carry out UTS validation simultaneously With red
		schedule stated in the RPS		dates/automatic holidays UTS implementation can not be on time. The solution is UTS is expected to be implemented at the 8th meeting of learning, not the 8th meeting of the class schedule
Kur	ikulum <i>Outcome Ba</i>	used Education (OBE) dan im	plementasinya	
18	3	Has carried out OBE based tests / quizzes / exams	48,1	Immediately carry out OBE based tests / quizzes / exams as a whole Have implemented
17	2	OBE curriculum	45,6	Immediately implement the OBE curriculum as a whole
16	1	Have made the OBE	45	handbook module (RPS) Immediately make the OBE handbook module (RPS) as a whole

Therefore, in the future the Faculty of Engineering, Academic Affairs, Unesa, SPM, GPM, UPM, the curriculum team, and PPTI must make every effort to disseminate information regarding the preparation, implementation, and evaluation of learning along with mentoring on the OBE curriculum and its implementation in the 2021/ academic year. 2022.

### E. Generic Description

The Faculty of Engineering, State University of Surabaya has five departments, namely the Electrical Engineering Department, the Mechanical Engineering Department, the Civil Engineering Department, the PKK Department and the Informatics Engineering Department. The total number of study programs at the engineering faculty was originally 20 study programs, then in the 2021/2022 academic year there will be a separation into vocational faculties so that undergraduate undergraduate study programs are 13 study programs. The implementation of the current curriculum has been carried out starting with learning preparation, making semester learning plans (RPS), at this time the lesson plans have also been implemented into a process of learning activities by accommodating the latest curriculum and using the student center approach, and applying problem-based learning models and Project based learning. By applying this approach, almost all students are actively involved in all subjects, thus creating a conducive climate for teaching and learning. Based on the results of the M&E implementation, several discrepancies were found, but they did not affect the overall learning process. In the PKK majors, the majority have not implemented the OBE curriculum because they are still using the KKNI curriculum and are guided by the Lamkes. For the TIF department for the 2021/2022 academic year, there are still plans to be proposed to participate in international accreditation so that the OBE curriculum is still in the process of being drafted.

Monitoring and evaluation of learning (MONEV) is carried out regularly every semester and is driven by the Quality Assurance Group (GPM) of the Faculty of Engineering. Almost all lecturers have been monitored and evaluated. This is due to good cooperation and coordination between study programs through UPM and GPM, Faculty of Engineering, and SPM Unesa.

# F. Conclusions from the Implementation of Learning Monitoring and Evaluation at the Faculty of Engineering 1. Implementation

Money in FT generally runs smoothly although some study programs are not on time according to a predetermined schedule, this is because at the same time the monitoring and evaluation is carried out, the auditee and supervisor are carrying out very important tasks, namely the activity of making ASIIN International accreditation videos, management meetings in the departments, and several Pemonev as a team of national accreditation task force. But all money has been done well.

The platforms used in learning vary, for example whats App, google classroom, zoom, meet, etc. The choice of this platform is adjusted to the type of course and has been communicated with students. Some of the challenges are for courses that have practicals. The Covid-19 pandemic has become an obstacle for several courses that require materials/tools that are not easily available today. To overcome this, lecturers use audiovisual media by making video tutorials and assigning students to analyze them. However, several lecturers have carried out limited laboratory practices with strict procedures as a solution.

## 2. Mechanism of implementation of learning money

The mechanism for implementing learning money in the Faculty of Engineering (FT) is as follows:

- a. The Study Program together with the Head of the Department propose an online Learning Monitoring and Evaluation Schedule which includes courses, auditees, lecture times and names of supervisors 1 and 2 then sent to GPM.
- b. GPM held a coordination meeting with UPM, Kajur and Deputy Dean 1 regarding the mechanism and implementation of learning monitoring and evaluation.
- c. The schedule for monitoring and evaluation of the Faculty of Engineering that has been prepared is socialized to UPM, supervisors, and auditees.
- d. Pemonev communicates with auditees about the timing and mechanism for monitoring and evaluation of learning.
- e. The implementation of online learning money is carried out in accordance with the instruments socialized by BPM.
- f. Pemonev reports online learning monitoring and evaluation results to UPM and GPM
- g. GPM makes a report on the implementation of learning money based on data from the money.

#### 3. Obstacles faced

- a. The obstacle faced was the lecturer's delay in sending the evidence (screenshot) to the supervisor via the google form link, this caused the preparation of the monitoring and evaluation report at GPM, late
- b. There are concurrent activities, namely national accreditation activities and curriculum meeting activities.

### 4. The impact of online learning money

- a. Positive impact: with the Money Learning during the Covid 19 pandemic, namely improving the quality of learning by being forced to be more creative lecturers to achieve successful learning outcomes. Especially some courses that require practice (cannot be done by students) so that lecturers make video tutorials for students. In addition, lecturers are more skilled in using/choosing platforms and making learning media according to the type of subject.
- b. Negative impact: This online learning has received complaints from students about conditions in some areas due to poor internet conditions, especially when it rains heavily.
