MODULE HANDBOOK

GENERAL GEOMORPHOLOGY								
Module/Course		Student Workload	Credits	Semester	Frequency	Duration		
Title 8720203067		3 CU X 14 X 170' = 135,993	3 CU 4.77 ECTS	1 TH SEMESTER	ONCE YEAR	1 SEMESTER		
1	Types of LECTURE PRACTIC	ES	Contact hours	Independent Study	Structured Study	Class size		
	TRACTIC	VOIVI	(3CU X 1,59 ECTS) X{(50:170')X 28,51 Workhours= 39,99	(3CU X 1,59 ECTS) X{(60:170')X 28,51 Workhours= 47,99	(3CU X 1,59 ECTS) X{(60:170')X 28,51 Workhours= 47,99	MAX 35 STUDENT		
2	Prerequisites for participation (if applicable) none							
3	Program Learning outcomes PLO 2 Able to analyze regional and zoning characteristics (regionalization) in the context of resources and disasters based on the principles and approach of Geography to support sustainable development. PLO 6 Able to make appropriate decisions in the context of solving problems in the field of geography and geography education, based on the results of analysis of information and data. PLO 9 Able to apply regional theory for sustainable regional planning and development PLO 11 Demonstrate a responsible attitude towards work in their field of expertise independently							
	 COURSE LEARNING OUTCOME (CLO) Ability to analyze regional characteristics and zoning (regionalization) in the context of resource geomorphology and disaster geomorphology based on the principles and approaches of geography to support sustainable development. The ability to make the right decisions in the context of solving geomorphological problems in the field of geography and geography education, based on the results of information and data analysis. Ability to apply regional geomorphological theory for sustainable regional planning and development Demonstrate a responsible attitude towards work in his field of expertise, namely geomorphology independently 							

4	Subject aims/Content					
	(tujuan pembelajaran mata kuliah/materi pokok)					
	1. The role of geomorphology in life					
	2. The development of geomorphology and its relation to other sciences					
	3. How to study geomorphology					
	4. Landform factor					
	5. Geomorphological data sources					
	6. Geomorphological survey and mapping					
	7. Volcanic landforms					
	8. Fluvial landforms					
	9. Marine landforms 10. Eolin landform 11. Organic Formations					
	12. Structural Landform					
	13. Danudational landforms					
	14. Anthropogenic landforms					
	15. Karst landforms					
5	Teaching methods					
	Project Base Learning, Self Direction Learning, Small Group Discussion					
6	Assessment methods					
	Portofolio, paper test					
7	This module/course is used in the following study programme/s as well					
	-					
8	Responsibility for module/course					
O	COMPULSORY/ ELECTIVE */
