Demonstrate a responsible attitude towards work in their field of expertise independently</td></tr>
<tr><td></td><td colspan="6">COURSE LEARNING OUTCOME (CLO)
1. Ability to process, analyze, present geosphere data and information as a basis for geography by using geospatial technology for geography learning and research.
2. Ability to demonstrate independent and collaborative performance of basic geography work that produces quality and measurable results
3. Ability to apply regional theory as a basis for geography for sustainable regional planning and development
4. Demonstrate a responsible attitude towards basic geography work independently</td></tr>
<tr><td>4</td><td colspan="6">Subject aims/Content</td></tr>
</table>

	1. The history of the development of geographical thought 2. The context of space in geography 3. The phenomenon of the geosphere as a material object 4. Spatial approach 5. Ecological approach 6. Complex approach to the territory 7. Production space 8. Current and future space dynamics 9. Current and future geography
5	**Teaching methods** *Project Base Learning, Self Direction Learning, Small Group Discussion*
6	**Assessment methods** *Portofolio, paper test*
7	**This module/course is used in the following study programme/s as well** -
8	**Responsibility for module/course** COMPULSORY/~~ELECTIVE~~*/
