

MODULE HANDBOOK

DEMOGRAPHY AND POPULATION GEOGRAPHY					
Module/Course Title	Student Workload	Credits	Semester	Frequency	Duration
8720202021	90,5664	2 CU / 3.18 ECTS	2 ND	ONCE YEAR	1 SEMESTER
1	Types of courses LECTURES PRACTICUM	Contact hours (2CU X 1,59 ECTS) X{(50:170')X 28,51 Workhours= 26,64	Independent Study (2CU X 1,59 ECTS) X{(60:170')X 28,51 Workhours= 31,96	Structured Study (2CU X 1,59 ECTS) X{(60:170')X 28,51 Workhours= 31,96	Class size MAX 120 STUDENT
2	Prerequisites for participation (if applicable) -				
3	Program Learning outcomes				
	PLO-3 Able to process, analyze, present geosphere data and information using geospatial technology for geography learning and research				
	PLO-4 Able to apply logical, critical, systematic, and innovative thinking in the fields of geography and geography education				
	PLO-6 Able to make appropriate decisions in the context of solving problems in the field of geography and geography education, based on the results of the analysis of information and data				
	PLO-9 Able to apply regional theory for sustainable regional planning and development				
	PLO-11 Able to demonstrate a responsible attitude towards work in the field of expertise independently				
	Course Learning Outcome (CLO)				
	CLO-3				

	Able to process, analyze, present anthroposphere data and information using geospatial technology for geography learning and research
	CLO-4 Able to apply logical, critical, systematic, and innovative thinking in the fields of human geography and geography education
	CLO-6 Able to make appropriate decisions in the context of solving problems in the field of human geography and geography education, based on the results of the analysis of information and data
	CLO-9 Able to apply demography and human geography theory in sustainable regional planning and development
	CLO-11 Demonstrate a responsible attitude towards work in the field of in calculations and concepts in the study of demography and population geography independently
4	Learning materials 1. The concept, scope and benefits of studying Demographics and Population Geography 2. Population theory 3. Basic demographic measurements and population data sources 4. The concept of mortality in demography with various types of mortality rates, factors that cause death, patterns of distribution and its application in real data 5. The concept of fertility in demography with various types of mortality rates and factors that cause fertility, and its application in real data 6. Population migration, including scope, data sources, push and pull factors of migration and analysis of population data, as well as its application in real data 7. Population issues and population policies 8. Composition of the population, how to assess the composition of the population according to age and sex, and tidying up population data 9. Life Table 10. Standardization of death 11. Population Projection
5	Teaching methods <i>Small Group Discussion , Project Base Learning</i>
6	Assessment methods <i>paper test, Portofolio</i>
7	This module/course is used in the following study programme/s as well -
8	Responsibility for module/course COMPULSORY/ELECTIVE*/
