Universities: Disruption Is Coming

by [Jim Clifton](#)

Do we need universities anymore? What if they ran out of customers?

Google announced it is hiring employees without college degrees, and Ernst & Young made a similar decision in the U.K. last fall. Both organizations see less value in a traditional college degree.

Are two of the most admired companies in the world wrong -- or ahead of their time?

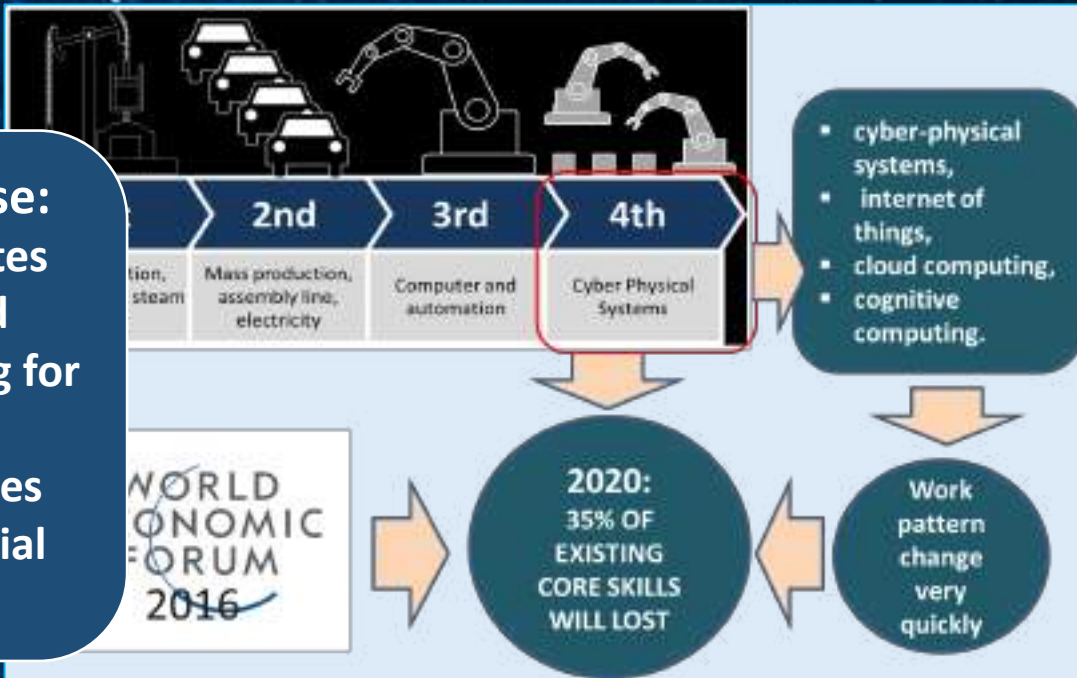

The value of universities could be hitting a wall as fast as the value of libraries, newspapers and brick-and-mortar retail stores. Our need for learning and filling our brains with exactly the right information at just the right time is changing faster than American universities are.

1

An Indonesian Case:

- Thousands graduates of high schools and universities looking for jobs at job fairs.
- Only 5 % candidates meet with industrial requirement.

EDUCATION IS LEFT BEHIND THE WORLD OF WORK

SHIFTING PARADIGM FROM COMPETENCE TO CAPACITY BASED

MERDEKA BELAJAR (INDEPENDENT LEARNING)

The most needed skills:

- Solving problems that have not yet existed now
- Using technology that has not been invented yet

with character

**MERDEKA
BELAJAR
(INDEPENDENT
LEARNING)**

**DEPARTMENT OF
MECHANICAL
ENGINEERING
(60% INTERNAL)
+(40% EXTERNAL)**

Comfort zone vs growth zone

**BOILED AND
DIED OR JUMP
OUT AND MOVE
ON**

**BLENDED-
HYBRID
LEARNING ->
NEW
LEARNING
MODEL**

**The greatest danger in
times of turbulence is
not the turbulence
itself, but to act with
yesterday's logic**

**Covid-19 forced
education to get
alternative ways
in developing
teaching-learning
model**

**MERDEKA
BELAJAR
(INDEPENDENT
LEARNING)**

**IMPLEMENTING THESE
2 CONCEPTS
INTEGRATIVELY IS A BIG
CHALLENGE**

**BLENDED-
HYBRID
LEARNING**
