

MODULE HANDBOOK

Module Name	Industrial Chemistry
Module level	Bachelor
Abbreviation, if applicable	3074212043
Sub-heading, if applicable	-
Course included in the module, if applicable	-
Semester/term	6 th /Third Year
Module coordinator(s)	Dr. Nuniek Herdyastuti, M.Si
Lecturer(s)	Prof. Dr. Titik Taufikurrohmah, M.Si., Dr. Nuniek Herdyastuti, M.Si. Dian Novita, ST., M.Pd.
Language	Indonesian
Classification within the curriculum	Compulsory Course
Teaching format/class hours per week during the semester:	2 hours lecturers (50 min per hours)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79,33 total hours per semester ~ 3.18 ECTS**
Credit points:	2 CU = 2 x 1.59 = 3.18 ECTS
Prerequisite course(s):	<ul style="list-style-type: none"> • Spectroscopy and Chromatography Method • Structure and Function of Biomolecule • Chemical Kinetics
Targeted learning outcomes:	<ol style="list-style-type: none"> 1. Students have the ability to collaborate in carrying out the practicum process. 2. Skilled students use tools in carrying out the practicum process. 3. Students have knowledge of the principles, basic concepts, and chemical processes in the chemical industry, including industries: the petrochemical industry; oils including essential oils and oils from seeds; fermentation industries including tempeh, soy sauce, yogurt and wine, soap and detergent; paper industry including recycled paper; carbon industry from various raw materials; and the cosmetics industry, including facial soaps, various facial creams, shampoos and cosmetic dyes.
Content:	<ol style="list-style-type: none"> 1. Introduction: Understand contract studies, grading systems and some examples of types of chemical processes in industry 2. Industrial Chemistry in Petrochemicals: Chemical processes in the industry in petrochemicals and their applications 3. Chemical Processes in the Petroleum Industry: chemical processes in the oil industry, essential oil refining, oil isolation from seeds 4. Chemical Processes in the Fermentation Industry:

	<p>understand the fermentation process and the process of making products related to the fermentation industry (making soy sauce, soygurt, cheese, etc.)</p> <p>5. Chemical Processes in the Soap and Detergent Industry: understand the chemical processes in the soap and detergent industry and understand the process of making products related to the soap and detergent industry</p> <p>6. Chemical Processes in the paper industry: understand chemical processes in the paper industry and understand the process of making products related to the paper industry including recycled paper</p> <p>7. Chemical Processes in the cosmetic industry: understand chemical processes in the cosmetic industry and understand the process of making products related to the cosmetics industry</p>										
Study / exam achievements:	<p>Students are considered to complete the course and pass if they obtain at least 40% of maximum final grade. The final grade (NA) is calculated based on the following ratio:</p> <table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage of contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> </tbody> </table>	Assessment Components	Percentage of contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%
Assessment Components	Percentage of contribution										
Participation	20%										
Assignment	30%										
Mid-semester test	20%										
Final semester test	30%										
Media:	Computer, LCD, White board										
Learning Methods	Individuals assignment, group assignment, discussion, presentation, and practicum										
Literature:	<ol style="list-style-type: none"> 1. Austin, T. George. 1984. <i>Shreve's Chemical Process Industries</i> Fifth Edition. New York: Mc Graw-Hill. 2. Felder, R.M., Rousseau, R.W., and Bullard, L.G. 2016. <i>Elementary Principles of Chemical Processes</i>. USA: John Wiley & Sons, Inc. 3. Recent journals related to each topic 										
Notes:	<p>*1 CU in learning process = three periods consist of: (a) scheduled instruction in a classroom or laboratory (50 minutes); (b) structured activity (60 minutes); and (c) individual activity (60 minutes) according to the Regulation of Indonesia Ministry of Research, Technology, and Higher Education No. 44 Year 2015 jo. the Regulation of Indonesia Ministry of Research, Technology, and Higher Education No. 50 Year 2018.</p> <p>**1 CU = 1,59 ECTS according to Rector Decree Of Universitas Negeri Surabaya No. 598/Un38/Hk/Ak/2019</p>
