Does the environment affects human? or human affects the environment? what are your bases? tell me what is in your mind. brief, short and original answer.

### Class comments

**John Christian** Aug 31

I think it's us who affect the environment the reason is we have done a lot of abhorrent things like deforestation, pollution etc that causes global warming and not so clean air to breath which is timely because we are experiencing now the pandemic.

**Eunice Andrea Ramales** Aug 31

For me, humans and the environment affect each other. One example for each is Humans cause pollution, we slowly destroying the ozone layer by burning plastics and chemicals while the sudden change of climate in the environment causes diseases and destroys the farmer's crops that only grow at a certain temperature.

**Kenneth Fernandez** Aug 31

The way I see things we manipulate our environment more than any species. Thus, our environment influence us and had a
