MODULE HANDBOOK

Module Name	Creative Media Development
Module level	Bachelor
Abbreviation, if applicable	8420402224
Sub-heading, if applicable	-
Course included in the	_
module, if applicable	
Semester/term	5 th /Third Year
Module coordinator(s)	Dian Novita, ST., M.Pd.
Lecturer(s)	Dian Novita, ST., M.Pd.
	Bertha Yonata, S.Pd., M.Pd.
Language	Indonesian
Classification within the	Compulsory Course
Curriculum	compulsory course
Teaching format/class	2 hours lecturers (50 min per hours)
hours per week during the	
semester:	
Workload:	1 CU for bachelor degree equals to 3 workhours per
	week or 170 minutes (50' face to face learning, 60'
	structured learning, and 60' independent learning).
	In one semester, courses are conducted in 14 weeks
	(excluding mid and end-term exam). Thus, 1 CU
	equals to 39.67 workhours per semester. One CU
	equals to 1.59 ECTS.*
Credit points:	2 CU = 2 x 1,59 = 3,17 ECTS
Prerequisites course(s):	Learning Media
_	
Prerequisites course(s):	Learning Media
Prerequisites course(s):	Learning Media1. Having the ability to determine creative
Prerequisites course(s):	Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics
Prerequisites course(s):	Learning Media1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics2. Have the ability to design and create creative
Prerequisites course(s):	Learning Media1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics2. Have the ability to design and create creative creative learning media prototypes as
Prerequisites course(s):	Learning Media1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with
Prerequisites course(s):	Learning Media1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship
Prerequisites course(s):	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting
Prerequisites course(s):	Learning Media1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship
Prerequisites course(s):	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting
Prerequisites course(s):	 Learning Media Having the ability to determine creative learning media in accordance with chemistry material and student characteristics Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship Make decisions in choosing and presenting creative learning media in chemistry lessons
Prerequisites course(s):	 Learning Media Having the ability to determine creative learning media in accordance with chemistry material and student characteristics Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship Have the accordance with ecopreneurship
Prerequisites course(s):	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting media in
Prerequisites course(s):	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in accordance with ecopreneurship
Prerequisites course(s): Targeted learning outcomes:	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in chemistry lessons in accordance with ecopreneurship
Prerequisites course(s):	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in chemistry lessons in accordance with eco-commitment 1. Characteristics of graduate competence
Prerequisites course(s): Targeted learning outcomes:	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in chemistry lessons in accordance with ecoprementiation of the comparison of the comparison
Prerequisites course(s): Targeted learning outcomes:	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in chemistry lessons in accordance with eco- commitment 1. Characteristics of graduate competence standard of Chemistry in senior high school and vocational school
Prerequisites course(s): Targeted learning outcomes:	 Learning Media 1. Having the ability to determine creative learning media in accordance with chemistry material and student characteristics 2. Have the ability to design and create creative creative learning media prototypes as learning media in accordance with ecopreneurship 3. Make decisions in choosing and presenting creative learning media in chemistry lessons in accordance with ecopreneurship 4. Having a responsible attitude in selecting and presenting creative learning media in chemistry lessons in accordance with ecoprementiation of the complexity lessons in accordance with ecoprementiation of the complexity of the complexity lessons in accordance with ecocommitment 1. Characteristics of graduate complexity lessons

	A The maletien shine hereas (1)
	4. The relationship between student
	characteristics, creative learning media, and
	chemical materials
	5. Storyboard development
	6. Creative media development
Study / exam achievements:	Students are considered to be competent and pass if at least get 55
	Final score is calculated as follows: 20%
	participation + 30% assignment + 20% middle
	exam (UTS) & 30% final exam (UAS)
	Table index of graduation
	• A = $4(85 \le 100)$
	• A- = $3,75(80 \le -85)$
	• $B + = 3,5 (75 \le -80)$
	• B = 3 (70 $\leq -<$ 75)
	• B- = $2,75(65 \le -(75))$
	• $C + = 2.5 (60 \le - <65)$
	• $C = 2(55 \le -(60))^{-1}$
	• D = 1 (40 $\leq - < 55$)
	• $E = 0 (0 \le -40)^{-1}$
Media:	Computer, LCD, White board
Learning Methods	Individuals assignment, group assignment,
	discussion, presentation, and project based learning
