STUDY PLAN GUIDEBOOK

UNDERGRADUATE PROGRAM IN SCIENCE EDUCATION
FACULTY OF MATHEMATICS AND NATURAL SCIENCES
UNIVERSITAS NEGERI SURABABAYA
2020

General Remarks

The Undergraduate Program in Science Education (UPSE), Faculty of Mathematics and Natural Sciences, Universitas Negeri Surabaya is four-year bachelor program and designed to enable students to directly change over to a science education-oriented occupational field or to begin the Master program in science education. In particular, students are to acquaint themselves with the modern theoretical and experimental developments in the field of study in its entire breadth and moreover be enabled to develop strategies for solving complex issues individually and in teams and to act with scientific and social responsibility.

To make it easier for students to prepare their study plans, the UPSE has developed a Study Plan Guidebook. This Study Plan (curricular map) include the compulsory courses, elective courses, internship (in the UPSE the internship through the **Internship I and Internship II Course**), and the awarded Credit Semester Unit (in CU and ECTS).

Students can see the description of the Program Educational Objectives (PEOs) and Program Learning Outcomes (PLOs), that they will have after completing their undergraduate studies in the UPSE, Faculty of Mathematics and Natural Sciences, Universitas Negeri Surabaya. Students can also see in detail about their workload each semester, both in Credit Units (*sks*) and in ECTS. In addition, this Study Plan Guidebook can also direct academic advisor in monitoring students' study progress and students' achievement index achievement while studying in the UPSE, Faculty of Mathematics and Natural Sciences, Universitas Negeri Surabaya.

Hopefully this study plan can help students, especially in planning their studies as well as possible. In addition, it is hoped that this study plan will also help the improvement of the continuing higher education quality.

List of Tables

Chapter I. Introduction

The Undergraduate Program of Science Education (UPSE) belongs to the Department of Natural Science at Faculty of Mathematics and Natural Sciences (FMNS) in Universitas Negeri Surabaya (Unesa). The UPSE was established on December 21st, 2006 based on the Decree of General Director of Higher Education of the Department of National Education of the Republic of Indonesia No. 4905/D/T/2006. The first stage of the implementation of the Outcomes based Education (OBE) requires the UPSE to formulate the objectives and outcomes. The UPSE established the current Program Educational Objectives (PEOs) and developed PEO into Program Learning Outcomes (PLOs). PEOs are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve and are measured 3 to 5 years after graduation. PEOs are formulated based on inputs from various stake holders. PLOs are graduates attributes that students shall attain after completing the program.

Program Educational Objectives

As a consequence of the vision and mission of the Unesa and FMNS in accordance with the Rector's Decree no. 466/UN38/HK/DT/2016 on Curriculum development based on the Indonesian National Qualification Framework (INQF) for the undergraduate program, the Program Educational Objectives (PEOs) of the UPSE focus on producing graduates who are capable of becoming science educators particularly at middle school level, researchers of science education, and entrepreneurs in the fields of applied science or science education. In detail, the PEOs of UPSE are as follows:

1. Mastering knowledge/skills in the field of pedagogical integrated science (physics, chemistry, and biology) to carry out their professional or entrepreneurial tasks (PEO 1);
2. Having responsibility in carrying out his professional duties based on professional ethics (PEO 2);
3. Having a strong and tough personality and be able to compete globally in carrying out the tasks of his profession or entrepreneurship (PEO 3);
4. Having capability to communicate and work together in carrying out professional tasks (PEO 4);
5. Having capability to do self-development and innovations sustainably based on the situation and challenges in their professional duties (PEO 5).

The PEOs were formulated by considering the input from alumni and science education experts, curriculum for middle school students, evaluation results of tracer studies, and National Science Education Standards (NSES) 1996. These PEOs also have significant relevancies with the INQF. Table 1 indicates the relationship between PEO(s) of the UPSE and the 6th level (the level for undergraduate program) of the INQF. Through these PEOs, the graduates of the UPSE are expected to have capability to compete locally and globally. The relationship between the PEOs of the UPSE and the INQF shown in Table 1.

Table 1 The relationship between PEOs of UPSE and the INQF

PEOs of the UPSE	INQF 6th Level Competences			
	Capable of apply science, technology, and art within his/her expertise and adaptable to various situations faced during solving a problem	Mastering in-depth general and specific theoretical concepts of certain knowledge and capable of formulating problem-solving procedure	Capable of taking strategic decision based on information and data analysis as well as providing direction in choosing several alternative solutions	Responsible for his/her own jobs and can be assigned to take responsibility of the attainment of organization's performances
PEO 1	S	S	S	M
PEO 2	S	S	S	S
PEO 3	S	S	S	S
PEO 4	M	S	M	S
PEO 5	S	S	S	S

Note: S = Strong; M = Moderate

Program Learning Objectives

Derived from the PEOs, the UPSE have 11 Program Learning Outcomes (PLOs). This PLOs consist of knowledge (cognitive), skills (psychomotor), and attitude (affective) as shown in Table 2.

Table 2 PLOs of the UPSE

ASPECTS	PLOs	DESCRIPTION
Knowledge (K)	PLO 1	Demonstrate basic knowledge of physics, chemistry, and biology.
	PLO 2	Demonstrate knowledge of integrated science (physics, chemistry, and biology).
	PLO 3	Demonstrate pedagogical knowledge of designing, implementing, and evaluating integrated science learning.
	PLO 4	Demonstrate knowledge related to science education research.
Special Skills (SS)	PLO 5	Design, implement, and evaluate science learning using ICT.
	PLO 6	Design and conduct research about learning of integrated science, and acquire, analyze, and interpret the research data.
General Skills (GS)	PLO 7	Communicate ideas and research results effectively both in oral and written forms.
	PLO 8	Make decisions based on data / information in order to complete tasks and evaluate the performance that has been done.
	PLO 9	Work effectively both individually and in groups, and have entrepreneurial spirits and environmental awareness.
Attitude (A)	PLO 10	Demonstrate scientific, critical, and innovative attitudes in integrated science learning, laboratory activities, and professional-related tasks.
	PLO 11	Demonstrate religious and cultural values as well as academic ethics in carrying out their professional-related duties.

Regard to the aspects of connection between the PLO and PEO, Table 3 gives an overview how strong each of PLOs supports the PEOs.

Table 3 Correlation between the PEOs and PLOs of the UPSE

PLO	PEO

Mapping of Subject-Specific Criteria of ASIIN with PLOs of the UPSE

The subject-specific criteria (SSC) of ASIIN that similar to the PEOs and PLOs of the UPSE is the SSC-10 Life Sciences. For the quality assurance of degree programs, the SSC provide an orientation aid for the subject-specific design of degree programs in the respective area. In this way they contribute to the harmonization of similar study programs in a vertical and horizontal way. The result of the mapping of the SSC of ASIIN with PLOs of the UPSE shown in Table 4.

Table 4 Mapping of SSC of ASIIN with the PLOs

SSC 10 ASIIN for Life Sciences	PLOs										
	1	2	3	4	5	6	7	8	9	10	11
	K	K	K	K	SS	SS	GS	GS	GS	A	A
Specialist competences											
1 Have acquired sound **fundamental biology-relevant knowledge of mathematics and the natural sciences**	✓	✓									
2 **Knowledge of the fundamentals** of molecular, cell and organismic biology	✓	✓									
3 Have gained **methodological competence** in Life Sciences and are also able to apply this in other contexts				✓		✓					
4 Are capable of independent **practical work in laboratories and in the field** as well as handling organisms						✓					
5 Have relevant knowledge of **safety and environmental issues as well as the associated legal fundamentals**						✓					
6 Have acquired sound knowledge in **at least one special area** of Life Sciences			✓	✓	✓						

SSC 10 ASIIN for Life Sciences		PLOs										
		1	2	3	4	5	6	7	8	9	10	11
		K	K	K	K	SS	SS	GS	GS	GS	A	A
7	Are capable of **recognizing** and **solving subject-specific problems**			✓		✓	✓					
8	Are capable of **solving Life Science problems** and **presenting the results**	✓	✓				✓	✓				
Social Competences												
9	Have trained **conceptual**, **analytical** and **logical** thinking,								✓		✓	
10	Have an **awareness of** possible social, ethical and environment-related **effects of their actions**									✓	✓	✓
11	Have acquired **communication skills**–also in a foreign language–and can communicate scientific information to experts and laypersons in a suitable manner							✓				
12	Have a capacity for **teamwork**, also on an intercultural basis								✓			
13	have acquired **lifelong learning** strategies							✓	✓	✓	✓	✓

Note: K = Knowledge; SS = Specific Skill; GS = General Skill; and A = Attitude

Conversion Factor between Indonesian Credit Unit (*sks*) and ECTS

According to the Regulation from the Ministry of Education and Culture of the Republic of Indonesia on National Education Standards. **1 Credit Unit or 1 *sks* equal to the 170 minutes**. *One semester consists of 14 weeks of lecturing activities and two weeks for mid-semester test and final semester test*. **Total hours (workload) for 1 Credit Unit or sks equal to 14 weeks × 170 minutes = 2,380 minutes or 39.67 hours**. In Unesa, based on the Rector's Decree **1 ECTS equal to 25 hours** (The Decree of Rector Unesa No. **598/UN38/HK/AK/2019 dated June 6th, 2020**). So, conversion factor from **1 Credit Unit (CU) or 1 *sks* = 1.59 ECTS**.

Chapter II. Study Plan Description

The curriculum lays the foundation for teaching and the planning (individual study plans) and implementation of studies. The objectives of degree programs and courses are defined as learning outcomes. The learning outcomes courses are based on the mission of a given degree program. Descriptions regarding instruction (e.g. Learning outcomes and number of ECTS credits) follow regulations and are realistic.

Classification of Compulsory and Elective Requisites in the UPSE

Table 5 Compulsory and elective requisites courses

Requisite	Type of Requisite	Credit Unit (in *sks*)	ECTS	Percentage
University	Compulsory	23	36.57	15.97%
	Elective	-	-	-
FMNS	Compulsory (Common First Year)	12	19.08	8.33%
	Elective	-	-	-
UPSE	Compulsory	94	149.46	65.28%
	Elective	15	23.85	10.42%
Total		**144**	**228.96**	**100%**

The minimum workload of Undergraduate Program at Unesa, especially in the UPSE is 144 Credit Units (CU) which correspond to 5,712.48 hours or 228.96 ECTS, and are generally distributed in 8 regular semesters. On average, the total hour per semester is 714.06 hours. According to the Higher Education National Standards, the maximum workload for each regular semester is limited to 952.08 hours, corresponds to 24 CU or 24 *sks* (38.16 ECTS).

The UPSE Curriculum Structure

The student should successfully pass 144 Credit Unit (CU) before graduation and all the study plan courses are compulsory. This can be achieved through eight semesters distributed on the following levels in Table 6 (Compulsory Courses) and Table 7 (Elective Courses).

Table 6 Mapping of the UPSE compulsory course into the PLOs

Note: L = Theory; P = Practicum/experiment

Students can choose the Elective Course from the list in Table 7. In addition, the students' internship can take in the Semester IV (Internship I Course) and in the Semester VII (Internship II Course). These internship process take place in the Junior High School. The student also mandatory to involve in the society development project that initiated and implemented by the students with the supervision from the Institute of Research and Community Service (LPPM) Unesa (Community Service or *KKN* Course).

The Detailed Study Plan in the UPSE for Each Semester

The UPSE students can programming their course based on the current study plan. This detailed study plan also provided a guided for the students' academic advisor to monitor the study and the student's achievement to meet the PLOs indicators. The detailed study plan shown in tables below.
