**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Pendidikan Pancasila</i> (Pancasila)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	1000002020
Abbreviation, if applicable:	-
Courses included in the module, if applicable:	Not applicable
Semester/term	1/ first year (freshman)
Module coordinator(s):	Viky Dwi Wicaksono
Lecturer(s):	Viky Dwi Wicaksono
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**
Credit point:	2 <i>sks</i> (3.18 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b>                      After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Identify and resolve national and state development problems in the perspective of the basic values of Pancasila as the ideology and basis of Indonesian.</li> <li>2. Apply the basic values of Pancasila as the principles and guidelines for living in society, nation and state.</li> <li>3. Make the right decisions in dealing with problems in the life of the community, nation and state based on the values of Pancasila.</li> <li>4. Have responsible, caring, honest, cooperative attitudes, respecting opinions and having a love for the country in implementing and preserving the values of Pancasila in reality and everyday life.</li> </ol>
Content:	This course discusses the concept and essence of Pancasila as the basis and ideology of the nation, as well as the guide of life. This course also examines the Pancasila historically, juridically and philosophically and its actualization in the life of the nation. Pancasila as a foundation in Political Ethics and Development Paradigm and its implementation in the life of society and nation.
Attribute Soft skill:	Active communication
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:

	<table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Presentation, discussion, and case study.												
Form of Media:	Videos, PPT-based slides, Handouts and worksheet.												
Literature (primary references):	<ol style="list-style-type: none"> <li>1. Tim MKU Pendidikan Pancasila Unesa. 2019. <i>Pendidikan Pancasila</i>. Surabaya: Unesa University Press.</li> <li>2. Undergraduate Programme in Science Education

Module Handbook

Module Name:	<i>Bahasa Inggris</i> (English)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103012
Abbreviation, if applicable:	-
Courses included in the module, if applicable:	Not applicable
Semester/term	1/ first year (freshman)
Module coordinator(s):	An Nuril Maulida Fauziah, S.Pd., M.Pd.
Lecturer(s):	Wahyu Budi Sabtiawan, S.Si., M.Pd., M.Sc. Dhita Ayu Permata Sari, S.Pd., M.Pd. Aris Rudi Purnomo, S.Si., M.Pd., M.Sc. Enny Susiyawati, S.Si., M.Sc., M.Pd., Ph.D.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language as medium of instruction)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: 1. Apply English language skills and utilize ICT to understand written and oral information in everyday and general contexts. 2. Communicate using acceptable English orally or in written forms. 3. Make decisions in choosing the correct English language according to the acceptable rules. 4. Have responsibility to use English in daily conversation and to complete assignments related to the understanding of English.
Content:	This course equips students with the skills and knowledge of language components at the basic level (pre-intermediate). The courses also introduces standardized tests that include exercises for reading skills, listening comprehension) and structure and vocabulary which is directed to the preparation of the English test International standards.
Attribute Soft skill:	Active communication

Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1" data-bbox="683 338 1369 562"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Lecture and discussion.												
Form of Media:	Videos, PPT-based slides, Handouts and worksheet.

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Fisika Umum</i> General Physics
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103045
Abbreviation, if applicable:	FU
Courses included in the module, if applicable:	Not applicable
Semester/term	I / first year (freshman)
Module coordinator(s):	Dr. Mohammad Budiyanto, M.Pd.
Lecturer(s):	Dr. Mohammad Budiyanto, M.Pd. Tutut Nurita, S.Pd.,M.Pd. Muhamad Arif Mahdiannur, S.Pd., M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Utilizing science and technology to make representations of physical symptoms (mechanics and heat energy) in the form of graphs, data tables, mathematics, and information retrieval</li> <li>2. Analyze facts, concepts, principles, laws, theories and procedures in the field of mechanics and thermal energy for solving relevant problems.</li> <li>3. Able to make strategic decisions based on data and information in mechanics and heat energy.</li> <li>4. Responsible for self-learning, assignments, and agreements with colleagues.</li> </ol>
Content:	This course discusses the concepts and principles / laws of measurement, kinematics, dynamics, temperature, heat, and heat transfer.
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:

	Assessment Components	Percentage Contribution
	Participation	20%
	Assignment	30%
	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Student-centered approach, deductive learning, lecturing, discussion, and presentation (structured activities), and flip learning	
Form of Media:	LCD, PowerPoint, hand out, simulation, e-learning Vinesa, and whiteboard	
Literature (primary references):	<ol style="list-style-type: none"> <li>1. Giancoli, Douglas. 2016. <i>Physics: Principles with Applications II Global Edition</i>. **Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Matematika Dasar</i> Basic mathematic						
Module Level:	Bachelor degree/Undergraduate Programme						
Course Code:	8420103086						
Abbreviation, if applicable:							
Courses included in the module, if applicable:	Not applicable						
Semester/term	I / fourth year (senior)						
Module coordinator(s):	Dr. Rini Setianingsih, M.Kes.						
Lecturer(s):	Evangelista Lus Windyana Palupi., M.Pd.						
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)						
Classification within the curriculum:	Compulsory / <del>Elective</del>						
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)						
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**						
Credit point:	3 <i>sks</i> (4.77 ECTS)						
Requirements:	-						
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b></p> <ol style="list-style-type: none"> <li>1. Knowledge CLO-1: Explain the basic notions of mathematics as a deductive-axiomatic structure, structured thinking, reasoning, and rational-deductive logic, set, relationship, function, logic, quantor, conclusion, and validity of proof or conclusion.</li> <li>2. Skill CLO-2: Mathematically state a statement problem in the form of a mathematical relation, function, or statement and solve it</li> <li>3. Competency CLO-3: Prove mathematical statements using several suitable methods</li> </ol>						
Content:	System and deductive-axiomatic structure, logical operation, quantifier, making a conclusion, set theory, relation, function, and POSET.						
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting						
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: yellow;">Assessment Components</th> <th style="background-color: yellow;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td style="text-align: center;">20%</td> </tr> <tr> <td>Assignment</td> <td style="text-align: center;">30%</td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%
Assessment Components	Percentage Contribution						
Participation	20%						
Assignment	30%						

	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Constructivism, student-centered approach, project-based learning, lecturing, discussion, and presentation (structured activities), and flip learning

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Pendidikan Agama Islam</i> (Islamic Religion)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	1000002026
Abbreviation, if applicable:	-
Courses included in the module, if applicable:	Not applicable
Semester/term	1/ first year (freshman)
Module coordinator(s):	Dr. HM. Turhan Yani, MA
Lecturer(s):	Dr. HM. Turhan Yani, MA Drs. HM. Husni Abdullah, M.Pd Dr. Khoirul Anwar, M.El Dr. Mutimmatul Faidah, M.Ag Ary Subagya, Lc., M. Fil. I Dr. Abidah S., M. Pd Nurul Hikmah, M. HI Ahmad Ajib Ridlwan, S. Pd., M. SEI. Ahmadun Najah, M. HI
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**
Credit point:	2 <i>sks</i> (3.18 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Explore data/information in the context of learning Islamic Religious Education including insight / knowledge about Islam, religious attitudes, skills in carrying out Islamic teachings, commitment to Islam, self-confidence as a Muslim, and proficiency in implementing religious teaching.</li> <li>2. Recognize theoretical concepts about Islamic knowledge according to references.</li> <li>3. Have mindset, attitude and behavior that reflects a good Muslim personality who has the ability to do religious teaching.</li> <li>4. Have responsible, caring, honest, and cooperative attitudes, respect others' opinions and love the country in implementing and preserving the values of Pancasila in reality and everyday life.</li> </ol>

Content:	This course provides provisions for the formation of students' personality as a whole by making Islamic teachings as a basis for thinking and behaving in scientific and professional development. A complete personality can only be realized if each student has faith and piety to Allah SWT. Faith and piety will only be realized if it is supported by the development of its elements, namely: insight / knowledge about Islam (Islamic knowledge), religious attitudes (religion dispositions), skills in carrying out Islamic teachings (Islamic skills), commitment to Islam, self-confidence as a Muslim (moslem confidence), and proficiency in implementing religious teachings (Islamic competence). In the psycho-social constellation, either as individuals, family members, community members, or as Indonesian citizens. This course upholds divine values, humanity, unity, deliberation and justice within the framework of Pancasila and NKRI. This course also integrates Anti-Corruption Education material and religious moderation.												
Attribute Soft skill:	Active communication												
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight: <table border="1" data-bbox="683 1055 1369 1272"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%

Lecturer(s):	Dr. Mohammad Budiyanto, M.Pd. Tutut Nurita, S.Pd., M.Pd. Muhamad Arif Mahdiannur, S.Pd., M.Pd.					
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)					
Classification within the curriculum:	Compulsory / Elective					
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)					
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**					
Credit point:	3 <i>sks</i> (4.77 ECTS)					
Requirements:	General Physics (8420103045) General Chemistry (8420103074) General Biology (8420103023)					
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: <ol style="list-style-type: none"> <li>1. Apply substantive and procedural concepts of linear algebra and vector calculus to solve the real-world problem related to science phenomena;</li> <li>2. Apply substantive and procedural concept of differential and integral to solve the real-world problem related to science phenomena; and</li> <li>3. Apply substantive and procedural concepts of ordinary differential equations (ODEs) to solve the real-world problem related to science phenomena.</li> </ol>					
Content:	Linear algebra, vector calculus, differential, integral, and ordinary differential equations					
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting					
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight: <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: yellow;">Assessment Components</th> <th style="background-color: yellow;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td style="text-align: center;">20%</td> </tr> </tbody> </table>		Assessment Components	Percentage Contribution	Participation	20%
Assessment Components	Percentage Contribution					
Participation	20%					

	Assignment	30%
	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Constructivism, student-centred approach, project-based learning, lecturing, discussion, and presentation (structured activities), and flip learning	
Form of Media:	LCD, PowerPoint slides, worksheets, software (Matlab/Octave/Scilab), and e-learning Vinesa ( <a href="https://vlearning.unesa.ac.id/course/view.php?id=3806">https://vlearning.unesa.ac.id/course/view.php?id=3806</a> )

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Psikologi Pendidikan</i> (Educational Psychology)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	100002039
Abbreviation, if applicable:	-
Courses included in the module, if applicable:	Not applicable
Semester/term	II/first year (freshman)
Module coordinator(s):	Ni Wayan Sukmawati Puspitadewi, S.Psi, M.Psi.
Lecturer(s):	Elizabeth Christiana, S.Pd., M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or sks*)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.3 total hours per semester ~ 3.18 ECTS**
Credit point:	2 sks (3.18 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b>            After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Mastering the basic concepts of educational psychology, student development, learning theory, and aspects of personality that affect learning, and class management</li> <li>2. Make decisions about concepts and theories within the scope of educational psychology that are relevant to solving specific learning cases or learning difficulties in the classroom.</li> <li>3. Responsible for the performance of learning individually and in groups, by showing active involvement in carrying out the tasks and roles given both individually and in groups during the learning process.</li> <li>4. Make use of learning resources and ICT-assisted learning media to support the implementation of learning.</li> </ol>
Content:	The basic concepts of educational psychology, the basic concepts of student development, the laws of student development, Piaget and Vygotsky's theory of cognitive development, Erikson's theory of social emotional development and Kohlberg's moral development, behavioral approaches to learning theories and Bandura's

	social learning theory, humanistic learning theory , the concept and role of intelligence in learning, emotions and self-concept of students, the role of emotions and self-concept of students on learning processes and outcomes, understanding of motivation, types of motivation, theories of motivation, understanding of giftedness and characteristics, special education for gifted children, concepts basic academic learning difficulties and their forms and characteristics, school guidance and counseling.												
Attribute Soft skill:	Good active communication												
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. Undergraduate Programme in Science Education

Module Handbook

Module Name:	<i>Teori Belajar</i> (Learning Theories)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103155
Abbreviation, if applicable:	TB
Courses included in the module, if applicable:	Not applicable
Semester/term	II/first year (freshman)
Module coordinator(s):	Enny Susiyawati, S.Si., M.Sc., M.Pd., Ph.D
Lecturer(s):	Prof. Dr. Erman, M.Pd. Enny Susiyawati, S.Si., M.Sc., M.Pd., Ph.D. Tutut Nurita, S.Pd., M.Pd. An Nuril Maulida, S.Pd., M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: 1. Explain learning theories that are relevant for integrated science teaching and learning. 2. Apply the knowledge of learning theories to various teaching and learning phenomena. 3. Apply substantive concepts in learning theories to solve relevant problems. 4. Design and simulate a learning activity based on a particular learning theory.
Content:	Behavioristic learning theories, Social learning theories, Cognitive learning theories, Constructivist learning theories, Motivational learning theories, and Humanistic learning theories.
Attribute Soft skill:	Discipline, collaboration, responsibility, and critical thinking.
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:

	Assessment Components	Percentage Contribution
	Participation	20%
	Assignment	30%
	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Constructivist, student-centre approach, discussion, students' presentation, and simulation.	
Form of Media:	White Board, LCD projector, Laptop, internet, power point slides, and worksheet.	
Literature (primary references):	<ol style="list-style-type: none"> <li>1. Hergenhahn, B. R. &amp; Olson, Matthew H. 2012. <i>Theories of Learning (Teori Belajar)</i>. Edisi Ketujuh. **Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Telaah Kurikulum Sekolah</i> (Curriculum Review)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103154
Abbreviation, if applicable:	Not applicable
Courses included in the module, if applicable:	Not applicable
Semester/term	III/Second Year (sophomore)
Module coordinator(s):	Dr. Elok Sudiby, M.Pd.
Lecturer(s):	Dr. Elok Sudiby, M.Pd. Aris Rudi Purnomo, S.Si., M.Pd., M.Sc. Wahyu Budi Sabtiawan, S.Si., M.Pd., M.Sc.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	General Biology (8420103023) General Physics (8420103045) General Chemistry (8420103074) Learning Theory (8420103155) Introductory of Education Educational Psychology
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: 1. explain information regarding the rules, implementation, and issues related to Curriculum 2013; 2. analyze the components of Curriculum 2013; 3. analyze the scope of materials of basic competencies; and 4. design student worksheet related to basic competencies of Curriculum 2013.
Content:	Framework of Curriculum 2013, semester and year learning program, learning outcomes, student worksheet design, and concept-mapping.
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting.
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:

	<table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution

Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Ability to make a decision based on information and data analysis and able to give direction and to choose alternative solutions;</li> <li>2. Ability to mastery the theoretical concepts of matter and energy and able to formulate it to solve problem procedurally;</li> <li>3. Ability to utilize science and technology instruments in the field of matter and energy and ability to adapt toward current facing problem related to solving a problem;</li> <li>4. Ability to identify the state of matter (solid, liquid, and gas), analyze phase diagram (phases of matter and transitions), analyze the state of matter change process, describe temperature and heat, and identify form of energy that happens in everyday life;</li> <li>5. Ability to identify and to analyze the expansion of matter, describe the thermodynamics concepts and analyses it in everyday life phenomena, describe mechanical energy due to conservation of energy, solve a problem that related to the conservation of mechanical energy, describe the conservation law in</li> </ol>

	<p>energy and its application on simple machine's mechanical advantages;</p> <p>6. Ability to demonstrate responsibility in their conduct and behavior in the classroom and scientific investigation, especially on delivering the information.</p>												
Content:	State of matter; Phases diagram (phases of matter and transitions); Temperature and heat; Form of energy; History of energy concept; Conservation of energy; Mechanical energy; Simple machine; and Thermodynamics.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: yellow;">Assessment Components</th> <th style="background-color: yellow;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td style="text-align: center;"><b>Total</b></td> <td style="text-align: center;"><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Student-centered approach, deductive learning, lecturing, discussion, and presentation (structured activities), and flip learning												
Form of Media:	LCD, PowerPoint, hand out, simulation, and e-learning Vinesa <a href="https://vinesa.unesa.ac.id/course/view.php?id=374">https://vinesa.unesa.ac.id/course/view.php?id=374</a>

**Module Handbook**

Module Name:	<i>Pengelolaan Laboratorium dan Keselamatan Kerja</i> (Laboratory and Work Management and Safety)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103158
Abbreviation, if applicable:	Penglab
Courses included in the module, if applicable:	Not applicable
Semester/term	III/third year (junior)
Module coordinator(s):	Siti Nurul Hidayati, S.Pd., M.Pd.
Lecturer(s):	Siti Nurul Hidayati, S.Pd., M.Pd. Laily Rosdiana, S.Pd., M.Pd. Dr. Hasan Subekti, M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / Elective
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or sks*)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 sks (4.77 ECTS)
Requirements:	General Physics (8420103045) General Chemistry (8420103074) General Biology (8420103023)
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: 1. Analyzing about how to use laboratory tools and managerial functions in the laboratory; 2. Plan procedurally the construction of practical rooms in school laboratories and their distribution; 3. Analyzing manage procedurally the implementation of pactum in school laboratories in accordance with cognitive, affective and psycomotor aspects as well as work safety; and 4. Procedurally evaluate the implementation of practicum in a laboratory based on SOP that have been made
Content:	Laboratory management and administration, work planning and costs, laboatory safety and safety, making solutions, evaluating laboratory work, and developing SOP
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:

	<table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%

Able to realize independent character, and care for the environment through KSDAL lectures to develop ecopreneurship</li> </ol> <p>Sub CLO</p> <ol style="list-style-type: none"> <li>1. Propose creative ideas in solving environmental problems in general, by understanding the scope of conservation which includes: background, definition, goals, benefits and efforts to conserve natural resources and the environment (SDAL)</li> <li>2. Propose creative ideas in solving environmental problems in general, by understanding efforts to conserve natural resources and the environment (SDAL)</li> </ol>

	<ol style="list-style-type: none"> <li>3. Applying the principles of environmental ethics in life, by understanding environmental ethics which include: Definition, Paradigm, and Environmental Ethical Principles.</li> <li>4. Develop ideas that are effective in overcoming natural resources and environmental problems.</li> <li>5. Developing systematic ideas to preserve local wisdom of the community</li> <li>6. Develop ideas that are effective in accordance with the principles of natural resource management and the environment</li> <li>7. Understand the principles of conservation globally and locally.</li> <li>8. Take an active role in the Unesa eco campus movement</li> <li>9. Take an active role in efforts to overcome the environment in the area of origin through conservation activities.</li> </ol> <ol style="list-style-type: none"> <li>1. Mengusulkan gagasan kreatif dalam memecahkan masalah lingkungan secara umum, dg memahami Ruang lingkup konservasi yang meliputi: Latar belakang, Pengertian, tujuan, manfaat dan upaya-upaya konservasi sumber daya alam dan lingkungan (SDAL)</li> <li>2. Mengusulkan gagasan kreatif dalam memecahkan masalah lingkungan secara umum, dengan memahami Upaya-upaya konservasi sumber daya alam dan lingkungan (SDAL)</li> <li>3. Menerapkan prinsip-prinsip etika lingkungan dalam kehidupan, dengan memahami Etika lingkungan yang meliputi: Pengertian, Paradigma, dan Prinsip-prinsip Etika Lingkungan.</li> <li>4. Mengembang-kan gagasan yang efektif untuk mengatasi permasalahan SDA dan lingkungan.</li> <li>5. Mengembang-kan gagasan yang sistematis untuk melestarikan kearifan lokal masyarakat</li> <li>6. Mengembang-kan gagasan yang efektif sesuai dengan prinsip pengelolaan SDA dan lingkungan</li> <li>7. Memahami prinsip-prinsip konservasi secara global dan lokal.</li> <li>8. Berperan aktif dalam gerakan <i>eco campus</i> Unesa</li> <li>9. Berperan aktif dalam usaha mengatasi lingkungan di daerah asal melalui kegiatan konservasi.</li> </ol>
Content:	Discusses: 1) The scope of conservation which includes: Definition, objectives, benefits and efforts to conserve natural resources and the environment (SDAL); 2) Environmental ethics which includes: Definition, Paradigm, and Environmental Ethical Principles; 3) Natural resources which include: Definition, types and benefits of Natural Resources; 4) Local wisdom which includes: Definition, approach, challenges and local wisdom in people's lives in

	<p>the future; 5) Management and problems of natural resources and the environment which include: issues, problems and management of natural resources and the environment; 6) Awareness of conservation which includes awareness of the importance of conserving natural resources and the environment, an eco campus and a conservation campus. Lecture activities are carried out in a student center with discussions, observations, project assignments, and presentations by developing ecopreneurship characteristics.</p> <p>Membahas tentang: 1) Ruang lingkup konservasi yang meliputi: Pengertian, tujuan, manfaat dan upaya-upaya konservasi sumber daya alam dan lingkungan (SDAL); 2) Etika lingkungan yang meliputi: Pengertian, Paradigma, dan Prinsip-prinsip Etika Lingkungan; 3) Sumber daya alam yang meliputi: Pengertian, jenis-jenis dan manfaat Sumber Daya Alam; 4) Kearifan lokal yang meliputi: Pengertian, pendekatan, tantangan dan kearifan lokal dalam kehidupan masyarakat di masa yang akan datang; 5) Pengelolaan dan permasalahan sumber daya alam dan lingkungan yang meliputi: isu-isu, permasalahan dan pengelolaan sumber daya alam dan lingkungan; 6) Sadar konservasi yang meliputi, kesadaran pentingnya konservasi sumber daya alam dan lingkungan, <i>eco campus</i> dan kampus konservasi. Kegiatan perkuliahan dilakukan secara <i>student center</i> dengan diskusi, observasi, tugas proyek, dan presentasi dengan mengembangkan karakteristik <i>ecopreneurship</i>.</p>												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1" data-bbox="667 1576 1358 1800"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Constructivism, student-centred approach, project-based learning, lecturing, discussion, and presentation (structured activities), and flip learning

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Dasar-dasar Biokimia</i> (Introduction to Biochemistry)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103163
Abbreviation, if applicable:	-
Courses included in the module, if applicable:	Not applicable
Semester/term	IV/second year (sophomore)
Module coordinator(s):	Prof. Dr. Erman, M.Pd.
Lecturer(s):	Prof. Dr. Erman, M.Pd. Dra. Martini, M.Pd. Siti Nurul Hidayati, S.Pd., M.Pd. Wahyu Budi Sabtiawan, S.Si., M.Pd., M.Sc.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / Elective
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	– General Chemistry
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: <ol style="list-style-type: none"> <li>1. Utilizing science and technology to understand the role of nutrients as an energy source;</li> <li>2. Mastering the structure, function, and biochemical reactions of nutrients;</li> <li>3. Be able to write down ideas for preventing metabolic disorders.</li> </ol>
Content:	Structure and function of carbohydrates, lipids and proteins; The chemical composition of the protoplasm; Energy metabolism; Carbohydrate metabolism; Lipid metabolism; and Protein metabolism.
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:

	Assessment Components	Percentage Contribution
	Participation	20%
	Assignment	30%
	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Problem-based learning, lecturing, discussion, and presentation (structured activities).	
Form of Media:	LCD, PowerPoint slides, worksheets.

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Ekologi</i> Ecology
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103033
Abbreviation, if applicable:	
Courses included in the module, if applicable:	Not applicable
Semester/term	V/third year (junior)
Module coordinator(s):	Ahmad Qosyim, S.Si., M.Pd
Lecturer(s):	Prof. Dr. Fida Rahmadiarti, M.Kes. Dra. Herlina Fitrihidajati, M.Si. Dr. Tarsan Purnomo, M.Si. Dr. Hasan Subekti, M.Pd. Ahmad Qosyim, S.Si., M.Pd
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	General Biology (8420103023)
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b>                      After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Mastering the basic concepts of Ecology science about the principles and concepts of ecosystems</li> <li>2. Utilizing Information and communications technology (ICT) to communicate ideas, ideas and findings in Ecological concepts</li> <li>3. Make strategic decisions based on the data and information that has been done, to apply the concepts of theory and practice</li> <li>4. Able to work independently, work together in collaborative teams</li> </ol> <p><b>Sub-CLO:</b></p> <ol style="list-style-type: none"> <li>1. Introduction: Scope of Ecology: Relationship of Ecology with other sciences, Division of Ecology, Units of living things in ecosystems</li> <li>2. Principles and Concept of Ecosystem: Concept of ecosystem, concept of productivity</li> <li>3. Principles and Concepts of Energy: Basic concepts of energy, Concept of productivity</li> <li>4. The process of eating eating: food chains, food webs, relationships</li> </ol>

	<p>of metabolism and individual size, trophic structures and ecological pyramids</p> <ol style="list-style-type: none"> <li>5. Principles and Concepts of the biogeochemical cycle: Types and basic patterns of biogeochemistry, sediment cycle, organic nutrient cycle</li> <li>6. Limiting Factors: Liebig's Minimum Law, Shelford's Law of Tolerance, Physical-Chemical Factors as Limiting factors, Ecological Indicators</li> <li>7. Community: the concept of community, intra-community classification, diversity of species, patterns in the community, ecotone</li> <li>8. Population growth, interaction and regulation: Basic concept of population, characteristics of population, population growth, basic concept of population rate, population interaction, environmental carrying capacity</li> <li>9. Species and Individuals: Concept of species, Habitat, Ecological niche, Speciation and Adaptation</li> <li>10. Eco-energetics and ecosystem development: Energy flows, dispersion, aggregation, isolation and territoriality, group selection, the concept of climax, ecosystem development</li> <li>11. Biome: Terrestrial environment, vegetation, types of biomes</li> <li>12. Conservation History</li> </ol>												
Content:	Understand, and communicate the basic concepts of Ecology regarding: understanding and application of the principles and concepts of individuals, populations, communities, ecosystems; vegetation: productivity, succession, environmental factors, biomes, tropical terrestrial vegetation; tolerance range, time-temperature concept, feeding-eating relationships, ecological niches, growth parameters, interaction and regulation, population interaction and regulation, and conservation. Presented in the form of theory and practice.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: yellow;">Assessment Components</th> <th style="background-color: yellow;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>

**Module Handbook**

Module Name:	<i>Metodologi Penelitian</i> (Research Methodology)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103094
Abbreviation, if applicable:	Metpen
Courses included in the module, if applicable:	Not applicable
Semester/term	V/third year (junior)
Module coordinator(s):	Dr. Wahono Widodo, M.Si.
Lecturer(s):	Dr. Wahono Widodo, M.Si. Dr. Elok Sudiby, M.Pd. Siti Nurul Hidayati, S.Pd., M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / Elective
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Apply research methods to solve educational problems according to related fields of study;</li> <li>2. Master the concepts of educational research including research paradigms, types of research, studies of current research articles, variables, research designs, research instruments, research techniques, data analysis and interpretation of research results, as well as steps for preparing proposals. and research reports;</li> <li>3. Have skills in compiling educational research proposals according to the field of study; and</li> <li>4. Having a responsible attitude towards the process and results of the research that has been done.</li> </ol>
Content:	This course examines research paradigms, research approaches, types of research, studies of recent research articles, hypotheses, variables, research designs, research instruments, research techniques, data analysis and interpretation of research results, as well as steps for preparing proposals and research report. This course is presented in theory and an assignment for the preparation

	of an educational research proposal as the final product of the course.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods:	Constructivist, student-centred approach, lecturing, discussion, and presentation (structured activities)												
Form of Media:	LCD, PowerPoint slides, and worksheets

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Statistik Pendidikan</i> (Statistics of Education)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103168
Abbreviation, if applicable:	Statpen
Courses included in the module, if applicable:	Not applicable
Semester/term	V/third year (junior)
Module coordinator(s):	Dr. Elok Sudibyو, M.Pd.
Lecturer(s):	Dr. Elok Sudibyو, M.Pd. Dra. Martini, M.Pd. Muhamad Arif Mahdiannur, S.Pd., M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / Elective
Teaching format/class hours per week during the semester:	3 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	3 x 50 minutes lectures, 3 x 60 minutes structured activity, 3 x 60 minutes individual activity, 14 weeks per semester, 119 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b>  After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Explain dan apply descriptive statistics concepts and formulation to analyse data from science education research;</li> <li>2. Explain dan apply inferential statistics basic concept and formulation to analyse and evaluate based-on data obtained from science education research;</li> <li>3. Explain and apply the formulation to evaluate the effectiveness of an intervention in science education research based-on pre-test and post-test results (gain score analysis, normalized gain, normalized change, loss score analysis, normalized loss, Cohen's d, and weighted linear regression index); and</li> <li>4. Explain and apply the basic concept and formulation of minimal completeness criteria in science education research practices in Indonesia.</li> </ol>
Content:	Descriptive statistics (maximum, minimum, mean, mode, median, standard deviation, and standard error); inferential statistics: parametric and non-parametric (normal distribution, hypothesis testing, regression, ANOVA, and multivariate statistics); the formulation to evaluate the effectiveness of an intervention in science

	education research based-on pre-test and post-test results (gain score analysis, normalized gain, normalized change, loss score analysis, normalized loss, Cohen's d, and weighted linear regression index); and science education research practices in Indonesia.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight: <table border="1" data-bbox="683 589 1370 813"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Seminar</i> (Seminar)	
Module Level:	Bachelor degree/Undergraduate Programme	
Course Code:	8420102142	
Abbreviation, if applicable:	-	
Courses included in the module, if applicable:	Not applicable	
Semester/term	VI/third year (junior)	
Module coordinator(s):	Dr. Wahono Widodo, M.Si.	
Lecturer(s):	All lecturers	
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)	
Classification within the curriculum:	Compulsory / Elective	
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or sks*)	
Workload:	2 x 100 minutes lectures, 2 x 70 minutes structured activity, 14 weeks per semester, 79 total hours per semester ~ 3.18 ECTS**	
Credit point:	2 sks (3.18 ECTS)	
Requirements:	Research Method	
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Master the basics of making research proposals/articles in science education that reflect the ability of reasoning to formulate procedural problem solving in science education.</li> <li>2. Make strategic decisions based on data and information. Including the results of input, ideas, ideas, colleagues, colleagues, references, and provide ideas for choosing various alternative solutions.</li> <li>3. Responsible for the task of making and presenting research proposals and / or articles.</li> </ol>	
Content:	This course discusses the role of seminars in science education, library / field / laboratory studies on a topic in science education, writing study results in the form of papers (research proposal) and / or articles, and presenting them orally in seminars.	
Attribute Soft skill:	Collaboration and argumentation in the natural classroom setting.	
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:	
	<b>Assessment Components</b>	<b>Percentage Contribution</b>
	Participation	20%

	Assignment	30%
	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Discussion, project-based learning and presentation (structured activities)

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Pembelajaran Mikro</i> (Microteaching)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420102181
Abbreviation, if applicable:	Not applicable
Courses included in the module, if applicable:	Not applicable
Semester/term	VI/third year (junior)
Module coordinator(s):	Prof. Dr. Erman, M.Pd.
Lecturer(s):	All lectures
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / <del>Elective</del>
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 90 total hours per semester ~ 3.18 ECTS**
Credit point:	2 <i>sks</i> (3.18 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Have knowledge of the concept, scope, and examples of observation, analysis and evaluation activities on activities related to school culture, school management, formal, curricular, co-curricular and extracurricular activities;</li> <li>2. Have the ability to utilize information technology and multimedia in practicing developing clinical supervision, school-based management, planning, implementation and evaluation of learning taking into account the diversity of students based on the guidance of the Civil Service Teacher and Supervisor;</li> <li>3. Have an understanding of concepts in decision-making to develop approaches/methods, designs (syllabus), procedures (techniques in the classroom), learning materials and media based on observations at school; and</li> <li>4. Responsible for communicating the results of observations in developing planning, implementation and evaluation of learning through teaching exercises.</li> </ol>
Content:	This course provides an understanding of the activities of observation, analysis and direct appreciation of activities related to school culture, school management, planning, implementation and evaluation of learning by taking into

	account the diversity of students, formal, curricular, cocurricular, and extracurricular activities as well as school dynamics as a educational and learning development institutions.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and public speaking for teaching in the natural classroom setting												
Study/exam achievements:	Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight: <table border="1" data-bbox="683 555 1369 779"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Kuliah Kerja Nyata (KKN)</i> (Community Service)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103178
Abbreviation, if applicable:	
Courses included in the module, if applicable:	Not applicable
Semester/term	VII/fourth year (senior)
Module coordinator(s):	Institute for Research and Community Services (LPPM), Universitas Negeri Surabaya
Lecturer(s):	Team
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Compulsory / Elective
Teaching format/class hours per week during the semester:	<ul style="list-style-type: none"> <li>• Field Work</li> <li>• 3 contact hours of lectures (Indonesia credit semester or <i>sks</i>*)</li> </ul>
Workload:	3 x 170 minutes activities, 16 weeks per semester, 136 total hours per semester ~ 4.77 ECTS**
Credit point:	3 <i>sks</i> (4.77 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Demonstrate collaborative attitude and independence in carrying out individual task and group assignment;</li> <li>2. Directly communicate with social community;</li> <li>3. Observe, analyse and find potential challenges that exist in the community as a basis for making community service program;</li> <li>4. Planning community service program in order to improve the life quality of the community; and</li> <li>5. Carried out the community service program and evaluate it comprehensively.</li> </ol>
Content:	This field course is to develop competence in understanding and applying the principles of interaction and communication in the environment of community life, and in helping the community both through ideas and skills in efforts to advance the community in their environment by planning the community service program, disseminating the program, evaluation of the program.
Attribute Soft skill:	Discipline, honesty, responsibility, communication, and cooperation/collaboration
Study/exam achievements:	The final mark will be weight as follow: (1) individual assignment; (2) team assignment; and (3) program assessment.

Learning Methods	-

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Pengenalan Lapangan Persekolahan</i> (Teaching Internship)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420104182
Abbreviation, if applicable:	PLP
Courses included in the module, if applicable:	Not applicable
Semester/term	7/ fourth year (senior)
Module coordinator(s):	LPPPM
Lecturer(s):	Tim
Language:	Bahasa Indonesia (Indonesian language)
Classification within the curriculum:	Compulsory Course/ <del>Elective Studies</del>
Teaching format/class hours per week during the semester:	4 contact hours of lecturer (Indonesia credit semester or sks*)
Workload:	4 x 50 minutes lectures, 4 x 60 minutes structured activity, 4 x 60 minutes individual activity, 16 weeks per semester, 119 total hours per semester ~ 6.36 ECTS**
Credit point:	4 sks (6.36 ECTS)
Requirements:	-
Learning goals/competencies:	<p><b>General Competencies (Knowledge):</b>          Students can explain concepts, coverage, and examples of activities of observation, analysis and evaluation of activities related to school culture, school management, formal activities, curricular, co-curricular, and extracurricular activities.</p> <p><b>Specific Competence:</b></p> <ol style="list-style-type: none"> <li>1. Manifesting an honest and independent character related to duties.</li> <li>2. Have knowledge of the concept, scope, and example of the activities of observation, analysis and evaluation of activities related to school culture, school management, formal activities, curricular, co-curricular, and extracurricular activities.</li> <li>3. Have the ability to utilize information and multimedia technology in practicing developing clinical supervision, school-based management, planning, implementing and evaluating learning by paying attention to the diversity of students based on the guidance of the Pamong Teacher and Supervisor.</li> <li>4. Have an understanding of the concepts in decision making to develop approaches / methods, designs (syllabus), procedures (techniques in the classroom), materials and learning media based on observations in school.</li> </ol>

	5. Responsible for communicating the results of observations in developing planning, implementing and evaluating learning through teaching training.												
Content:	This course provides an understanding of the activities of observation, analysis and direct appreciation of activities related to school culture, school management, planning, implementation and evaluation of learning by taking into account the diversity of students, formal, curricular, co-curricular and extracurricular activities as well as school dynamics as an educational and learning development institution.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	University students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on following weight: <table border="1" data-bbox="667 768 1356 992"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Student-centered approach, deductive learning, lecturing, discussion, and presentation (structured activities), and flip learning												
Form of Media:	LCD, PowerPoint, hand out, simulation, e-learning Vinesa, and whiteboard												
Literature:	<ol style="list-style-type: none"> <li>1. Arend, R.I., 2012. <i>Learning to Teach</i>. New York: Mc Grow-Hill International Edition.</li> <li>2. Hyland, Ken., &amp; Wong, Lilian L. **Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Skripsi</i> (Thesis)				
Module Level:	Bachelor degree/Undergraduate Programme				
Course Code:	8420106146				
Abbreviation, if applicable:					
Courses included in the module, if applicable:	Not applicable				
Semester/term	VIII/fourth year (senior)				
Module coordinator(s):	Prof. Dr. Erman, M.Pd.				
Lecturer(s):	Team from the UPSE				
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)				
Classification within the curriculum:	Compulsory / Elective				
Teaching format/class hours per week during the semester:	6 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)				
Workload:	6 x 100 minutes lectures (consultation/discussion with advisors), 6 x 70 minutes structured activity, 16 weeks per semester, 272 total hours per semester ~ 9.54 ECTS**				
Credit point:	6 <i>sks</i> (9.54 ECTS)				
Requirements:	-				
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b>            After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Conducting science education research as a formulation of ideas, concepts, thinking patterns, and creativity under the advisors' direction;</li> <li>2. Disseminate science learning ideas both written and orally based on honesty and research ethics; and</li> <li>3. Take responsibility for the results of research and conduct its evaluation.</li> </ol>				
Content:	This course is intended to develop competence in conducting science education research as a formulation of ideas, concepts, thinking patterns, and creativity that is packaged in an integrated and comprehensive manner, and communicated in a scientific format, scientific packaging in the form of a final thesis arranged in several rational ways - empirical starts from submitting a research proposal to taking responsibility for it in front of the board of examiners.				
Attribute Soft skill:	Discipline, honesty, responsibility, communication, and cooperation				
Study/exam achievements:	The final mark will be weight as follow: <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: yellow;">Assessment Components</th> <th style="background-color: yellow;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Proposal</td> <td style="text-align: center;">50%</td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Proposal	50%
Assessment Components	Percentage Contribution				
Proposal	50%				

	Defending thesis (Performance, ability to answer the questions, and knowledge or ideas)	50%
	<b>Total</b>	<b>100%</b>
Learning Methods	-	
Form of Media:	-	
Literature (primary references):	1. Thesis Writing Guideline 2. Other relevant sources (journals, books, proceedings, etc.)	
Notes:	<p><b>*1 sks in learning process = three contact hours that consist of: (a) scheduled instruction in a classroom or laboratory (50 minutes); (b) structured activity (60 minutes); and (c) individual activity (60 minutes)</b> according to the Regulation of Indonesia Ministry of Research, Technology, and Higher Education No. 44 Year 2015 jo. the Regulation of Indonesia Ministry of Research, Technology, and Higher Education No. 50 Year 2018.</p> <p><b>**1 sks = 1,59 ECTS</b></p>

Undergraduate Programme in Science Education

Module Handbook

Module Name:	<i>Dasar-dasar Bioteknologi</i> (Introductory of Biotechnology)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420102029
Abbreviation, if applicable:	Biotech
Courses included in the module, if applicable:	Not applicable
Semester/term	Elective
Module coordinator(s):	Hasan Subekti, M.Pd.
Lecturer(s):	Dra. Evie Ratnasari, M.Si.; Hasan Subekti, M.Pd.; Aris Rudi Purnomo, S.Pd., M.Pd., M.Sc.
Language:	<i>Dasar-dasar Bioteknologi</i> (Fundamentals of Biotechnology)
Classification within the curriculum:	Elective
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**
Credit point:	2 <i>sks</i> (3.18 ECTS)
Requirements:	General Biology (Code: 8420103023)
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, university students have ability to; <ol style="list-style-type: none"> <li>1. Applying its field of expertise in the pedagogical field of Integrated Science and utilizing IPTEKS to explore, collect, and evaluate (data and/or information) to solve learning literature professionally according to the situations and challenges faced.</li> <li>2. Mastering the carrying, BKPM, and methods related to food engineering (fermentation techniques, agricultural engineering, engineering techniques), and bioethics, as well as how to teach research-based techniques to support their profession and solve the literature of learning Knowledge Integrated (professional).</li> <li>3. Able to make appropriate decisions based on analysis of information and data to solve literature related to food techniques, both independently and in groups.</li> <li>4. Products attitudes are able to cooperate and have social sensitivity (caring) as well as an attitude of responsibility in carrying out their professional duties.</li> </ol>

Content:	Biotechnology in the context of the 21st century, bioinformatics, the principles of biotechnology (food) involves fermenting biotechnology, agricultural biotechnology, biotechnology engineering, and bioethics, as well as how to teach biotechnology with Integrating entrepreneurial perspectives.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Constructivism, student-centered approach, project-based learning, lecturing, discussion, and presentation (structured activities), and flip learning												
Form of Media:	LCD, PowerPoint slides, worksheets, and e-learning Vinesa ( <a href="https://vinesa.unesa.ac.id">https://vinesa.unesa.ac.id</a> )

Module Name:	<i>Atom dan Radioaktivitas</i> (Atom and Radioactivity)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103171
Abbreviation, if applicable:	
Courses included in the module, if applicable:	Not applicable
Semester/term	Elective
Module coordinator(s):	Wahono Widodo
Lecturer(s):	Wahono Widodo Ernita Vika Aulia
Language:	Bahasa Indonesia (Indonesian language)
Classification within the curriculum:	Elective
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or sks*)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**
Credit point:	2 sks (3.18 ECTS)
Requirements:	- General Physics - General Chemistry
Learning goals/competencies:	<b>General Competencies (Knowledge):</b> Students can explain Dalton's atomic model, Thomson's atomic model, Rutherford's experiments on scattering alpha particles, Rutherford's atomic model, Bohr's atomic model, Bohr's hydrogen energy level and spectrum, modern atomic model (wave mechanics), radioactivity symptoms, decay, half-life, binding energy, reactions fission and fusion, and elementary particles. <b>Specific Competence:</b> 1. Mendeskripsikan konsep atom menurut Dalton, Thomson, Rutherford, Bohr, dan model atom menurut Teori Atom Modern. 2. Melakukan analisis keterkaitan sifat-sifat komponen penyusun inti atom dengan radioaktivitas. 3. Menganalisis sifat-sifat sinar radioaktif berdasarkan interaksinya dengan bahan yang dapat diobservasi. 4. Menganalisis model matematis peluruhan radioaktif. 5. Menganalisis energi yang dihasilkan atau yang diperlukan pada suatu reaksi inti. 6. Mendeskripsikan karakteristik utama partikel-partikel kosmik. 7. Mendeskripsikan partikel-partikel elementer dan interaksinya.

	8. Menjelaskan pemanfaatan sinar radioaktif. 9. Menjelaskan konstruksi PLTN												
Content:	This course examines the Dalton atomic model, Thomson atomic model, Rutherford experiment on alpha particle scattering, Rutherford atomic model, Bohr atomic model, energy levels and the spectrum of the Bohr hydrogen atom, modern atomic models (wave mechanics), radioactivity symptoms, decay, time. beaks, binding energy, fission and fusion reactions, and elementary particles.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	University students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on following weight: <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="background-color: yellow;">Assessment Components</th> <th style="background-color: yellow;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td style="text-align: center;"><b>Total</b></td> <td style="text-align: center;"><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Student-centered approach, deductive learning, lecturing, discussion, and presentation (structured activities), and flip learning

Module coordinator(s):	Prof. Dr. Erman, M.Pd.				
Lecturer(s):	Dra. Martini, M.Pd. Dr. Mohammad Budiyanto, M.Pd.				
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)				
Classification within the curriculum:	<del>Compulsory</del> / Elective				
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)				
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**				
Credit point:	2 <i>sks</i> (3.18 ECTS)				
Requirements:	Research Methodology, Statistics of Education.				
Learning goals/competencies:	<p><b>Course Learning Outcomes (CLOs):</b></p> <p>After taking this course, students will be able to:</p> <ol style="list-style-type: none"> <li>1. Explore articles in international journals and nationally accredited journals in the category of science education from various sources by utilizing science and technology results</li> <li>2. Conduct an analysis of articles on science education research results</li> <li>3. Presenting the results of the analysis of science education research articles</li> </ol>				
Content:	Discussion of at least 5 recent articles (last 5 years) published through international journals (4 articles) and those published through nationally accredited journals (1 article) that are relevant to student thesis research ideas through search, analysis, summary, preparation, and presentation activities.				
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting				
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1" style="width: 100%; margin-top: 10px;"> <thead> <tr style="background-color: yellow;"> <th style="text-align: left;">Assessment Components</th> <th style="text-align: left;">Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%
Assessment Components	Percentage Contribution				
Participation	20%				

	Assignment	30%
	Mid-semester test	20%
	Final semester test	30%
	<b>Total</b>	<b>100%</b>
Learning Methods	Student-centered approach, deductive learning, lecturing, discussion, and presentation (structured activities)	
Form of Media:	LCD, PowerPoint, hand out, simulation, e-learning Vinesa, and whiteboard	
Literature (primary references):	<ol style="list-style-type: none"> <li>1. Journal of Research in Science Teaching, Vol 54, No. 4 April, 2017, Wiley &amp; Son</li> <li>2. Journal of Teaching Science, 56 (1), March 2010, ASTA</li> <li>3. Journal of Teaching Science, 56 (2), June 2010, ASTA</li> <li>4. Journal of Teaching Science, 56 (3), June 2010, ASTA</li> <li>5. Jurnal Penelitian Pendidikan IPA Indonesia, PPII &amp; Unnes</li> <li>6. Jurnal Ilmu Pendidikan (JIP), Ikatan Sarjana Pendidikan Indonesia, UM</li> <li>7. Jurnal lain yang relevan</li> </ol>	
Notes:	<p><b>*1 sks in learning process = three contact hours that consist of: (a) scheduled instruction in a classroom or laboratory (50 minutes); (b) structured activity (60 minutes); and (c) individual activity (60 minutes)</b> according to the Regulation of Indonesia Ministry of Research, Technology, and Higher Education No. 44 Year 2015 jo. the Regulation of Indonesia Ministry of Research, Technology, and Higher Education No. 50 Year 2018.</p> <p><b>**1 sks = 1,59 ECTS</b></p>

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Dasar-Dasar Elektronika</i> (Introductory of Electronics)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103170
Abbreviation, if applicable:	
Courses included in the module, if applicable:	Not applicable
Semester/term	Elective
Module coordinator(s):	Wahono Widodo
Lecturer(s):	Wahono Widodo Laily Rosdiana An Nuril Maulida Fauziah
Language:	Bahasa Indonesia (Indonesian language)
Classification within the curriculum:	Elective
Teaching format/class hours per week during the semester:	2 contact hours of lecturer (Indonesia credit semester or sks*)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**
Credit point:	2 sks (3.18 ECTS)
Requirements:	- General Physics - Electricity and Magnetism
Learning goals/competencies:	<p><b>General Competencies (Knowledge):</b> Students can explain the theory of semi-conductors, extrinsic p and n types and p and n connections, diodes, transistors as resistance and switching, power amplifiers, op-amps, oscillators, digital electronics, and logic circuits.</p> <p><b>Specific Competence:</b></p> <ol style="list-style-type: none"> <li>Utilizing science and technology in the theoretical fields of semi-conductor, p and n type extrinsics and p and n connections, diodes, transistors, and able to adapt to the situation at hand in problem solving.</li> <li>Mastering theoretical concepts in the theoretical fields of semi-conductor in an in-depth manner, extrinsic types p and n and p and n connections, diodes, transistors, and formulate them in procedural problem solving.</li> <li>Make decisions based on analysis of information and data and provide guidance in choosing alternative solutions.</li> <li>Responsible for informing the results of analysis of information and data both orally and in writing.</li> </ol>
Content:	This course discusses the theory of the semi-conductor of the electrical, extrinsic types p and n and the connection of

	p and n, diodes, transistors as resistances and switches, power amplifiers, op-amps, oscillators, digital electronics, and logic circuits. Lectures are carried out with modeling, presentations, discussions, and practicum.												
Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>University students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on following weight:</p> <table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Student-centered approach, deductive learning, lecturing, discussion, and presentation (structured activities), and flip learning

**Undergraduate Programme in Science Education**

**Module Handbook**

Module Name:	<i>Pengetahuan Bumi dan Antariksa</i> (Earth and Planetary Science)
Module Level:	Bachelor degree/Undergraduate Programme
Course Code:	8420103123
Abbreviation, if applicable:	PBA
Courses included in the module, if applicable:	Not applicable
Semester/term	Elective
Module coordinator(s):	Dr. Wahono Widodo, M.Si.
Lecturer(s):	Dr. Wahono Widodo, M.Si. An Nuril Maulida Fauziah, S.Pd., M.Pd. Muhamad Arif Mahdiannur, S.Pd., M.Pd.
Language:	<i>Bahasa Indonesia</i> (Indonesian Language)
Classification within the curriculum:	Elective
Teaching format/class hours per week during the semester:	2 contact hours of lectures (Indonesia credit semester or <i>sks</i> *)
Workload:	2 x 50 minutes lectures, 2 x 60 minutes structured activity, 2 x 60 minutes individual activity, 14 weeks per semester, 79.33 total hours per semester ~ 3.18 ECTS**
Credit point:	2 <i>sks</i> (3.18 ECTS)
Requirements:	General Physics (8420103045) General Chemistry (8420103074) General Biology (8420103023) Biodiversity (8420103065) Introductory of Biochemistry (8420103163) Wave and Optics (8420103049) Atom and Radioactivity (8420103171)
Learning goals/competencies:	<b>Course Learning Outcomes (CLOs):</b> After taking this course, students will be able to: 1. Apply principles/laws/theories to various the Earth physical phenomena; 2. Apply principles/laws/theories to various physical phenomena in the solar system and universe; 3. Applying substantive concepts (principles/laws/theories) in the field of the Earth and space science in making science learning media; and 4. Design and conduct the Moon observation experiments based-on substantive and procedural concepts.
Content:	Lithosphere, Volcanoes, Earthquakes, Hydrosphere and Its Pollution, the Atmosphere and the Factors that Influence It, the Solar system, the Earth, the Revolutions and Rotation of the Earth and Moon and their Effects on Humans and Culture, Star Evolution, and Cosmology.

Attribute Soft skill:	Discipline, collaboration, responsibility, and argumentation in the natural classroom setting												
Study/exam achievements:	<p>Students are considered to be competent and pass if at least get 40% of the maximum final grade. The final grade (NA) is calculated based on the following weight:</p> <table border="1"> <thead> <tr> <th>Assessment Components</th> <th>Percentage Contribution</th> </tr> </thead> <tbody> <tr> <td>Participation</td> <td>20%</td> </tr> <tr> <td>Assignment</td> <td>30%</td> </tr> <tr> <td>Mid-semester test</td> <td>20%</td> </tr> <tr> <td>Final semester test</td> <td>30%</td> </tr> <tr> <td><b>Total</b></td> <td><b>100%</b></td> </tr> </tbody> </table>	Assessment Components	Percentage Contribution	Participation	20%	Assignment	30%	Mid-semester test	20%	Final semester test	30%	<b>Total</b>	<b>100%</b>
Assessment Components	Percentage Contribution												
Participation	20%												
Assignment	30%												
Mid-semester test	20%												
Final semester test	30%												
<b>Total</b>	<b>100%</b>												
Learning Methods	Constructivist, student-centred approach, project-based learning, lecturing, discussion, and presentation (structured activities), and flip learning
