SDG 2 PROGRESS REPORT

Zero Hunger

What Universitas Negeri Surabaya did against hunger in 2025 and 2026: free meals for students and staff, food grown on campus, and know-how shared with farmers and fish farmers.

Staff and volunteers serve rice and curry at UNESA's free Ramadan iftar, shared with students and local residents, March 2026.

SDG 2 AT A GLANCE

A university that feeds its people and teaches the farmers around it

SDG 2 asks universities to help end hunger: to make sure their own students and staff can eat well, to produce food responsibly, and to share what they know with farmers and food producers. This report covers what UNESA did on each strand in 2025 and 2026. It starts with how the work is organised, then follows the food from the campus kitchen to the farmers' fields.

HOW UNESA WORKS ON SDG 2

The Faculty of Food Security, created on 13 January 2025, leads UNESA's work on food and farming. The free meals are run by the university: Boganesa, the catering unit of the Faculty of Engineering, and Kanvanesa of the Faculty of Vocational Studies prepare them, each faculty and Campus 5 in Magetan hands them to its own students, and the Mitigation and Crisis Center sub-directorate (SMCC) monitors the programme. The Business Management Agency runs the campus poultry farm, and the Institute for Research and Community Service (LPPM) funds community-service projects.

This report is one of seventeen: UNESA reports on each SDG separately, and each report lists the evidence pages and their sources at sdgscenter.unesa.ac.id.

GOVERNANCE AND ORGANISATION

A new faculty and a shared kitchen: how UNESA organises its work on hunger

UNESA built a faculty for food security in 2025 and runs its free meals as one programme: central teams cook and monitor, and every faculty hands the food to its own students.

A FACULTY FOR FOOD SECURITY

On 13 January 2025 UNESA created the Faculty of Food Security with four undergraduate programmes: Digital Agribusiness, Aquaculture, Animal Biosciences, and Food Technology and Agricultural Products. It marked its first anniversary on 13 January 2026 with an event for all four programmes. The faculty works on Campus 3 with its own garden, fish ponds, poultry and a Smart Agriculture Techno Park, and its Laboratory of Business and Sustainable Food Development runs the Agrinesa Mart.

ONE PROGRAMME, SHARED BY EVERY FACULTY

The free exam breakfast began on 2 January 2025 as a trial. UNESA set up three teams: production, distribution, and monitoring and evaluation. Boganesa and Kanvanesa produce the meals, each faculty appoints its own distribution team, and the SMCC monitors and evaluates. Vice-Rector II said the evaluation would guide how the programme continues and could inform the government's free meal programme for universities.

CHECKS THAT THE FOOD REACHES STUDENTS

In December 2025 the Faculty of Food Security collected the meals at dawn, under its Vice-Dean II, and its finance staff issued receipts, photographed each distribution and wrote a daily report. The Faculty of Languages and Arts asked students for their student card and an attendance list. Campus 5 in Magetan runs the same programme for its own students.

PARTNERS AND FUNDING FOR THE FIELD

UNESA's Institute for Research and Community Service funded the 2026 fish-farming training in Trepan village from its community-service grant. SENTRA, a network of schools for food security, works with the faculty on organic fertiliser and soybean plots. The campus poultry farm is run by the Business Management Agency.

HOW A FREE EXAM BREAKFAST REACHES A STUDENT

1. Cook
Boganesa and Kanvanesa prepare the meals; in June 2025 the campus kitchen started cooking at midnight.

2. Deliver
Each faculty collects its share at dawn, 30 to 60 minutes before the 07.00 exam.

3. Hand out
From 06.30 to 07.30 students collect a package at their own faculty with a student card.

4. Check
The SMCC monitors, faculties keep receipts and reports, and Vice-Rector II evaluates.

A student collects a free breakfast package at the Faculty of Food Security during the end-of-semester exams, December 2025.

STUDENT HUNGER

A free breakfast in every examination period

Since January 2025 UNESA has given students sitting the first examination of the day a free nutritious breakfast at their own faculty. It has grown from about 2,000 portions a day to tens of thousands of packages in a round.

11,000
packages, 10 to 13 June 2025: 6,000 from UNESA and 5,000 from partners

39,000
packages, 15 to 24 December 2025, for UNESA students at every faculty

35,000
portions, 2 to 12 June 2026

3,000+
packages at Campus 5 in Magetan in June 2026, one for each student

FROM A TRIAL TO A ROUTINE

On 2 January 2025 students sitting first-session examinations received a free breakfast at their own faculty, about 2,000 portions a day until 10 January, on Campus 1 Ketintang and Campus 2 Lidah Wetan. Campus 5 in Magetan served it from 6 to 9 January with 1,500 portions each morning. The menu changed every day; on the first day it was rice, chicken serundeng, tempeh, cucumber and basil, chilli sauce and a carton of milk. In June 2025 UNESA prepared 11,000 packages for all faculties. The Rector explained the reason: not every student sitting a morning examination has time to eat breakfast before rushing to campus.

EVERY FACULTY, EVERY CAMPUS

In December 2025 the central programme was channelled to all faculties. The Faculty of Medicine received it from 15 to 19 December with carbohydrate, protein, vegetables, fruit and milk. The Faculty of Languages and Arts handed packages out every morning in its Joglo hall from 15 to 23 December. In June 2026 the Faculty of Social and Political Sciences served breakfast at five points on campus, and the Special Education programme handed packages out inside the classroom on 2 June, with rice, side dishes, vegetables and milk. Campus 5 served its students in December 2025 and again in June 2026, each package hygienically packed, and in January 2025 its meals were made with milk from a local dairy business.

FREE BREAKFAST FOR STUDENTS, EXAMINATION BY EXAMINATION

EXAMINATION PERIOD	DATES	SCALE	WHO COULD COLLECT
Odd semester 2024/2025 (trial)	2 to 10 January 2025; Campus 5: 6 to 9 January	About 2,000 portions a day; Campus 5: 1,500 each morning	Students sitting first-session examinations
Even semester 2024/2025	10 to 13 June 2025	11,000 packages (6,000 from UNESA, 5,000 from partners)	Students with a student card, on the attendance list
Odd semester 2025/2026	15 to 24 December 2025	39,000 packages	All UNESA students, at their faculty
Even semester 2025/2026	2 to 12 June 2026	35,000 portions; Campus 5: more than 3,000 packages	Students of all faculties, one package each

FREE MEALS FOR THE CAMPUS COMMUNITY

Iftar for thousands, and food for staff

In Ramadan UNESA serves a free meal at sunset every day, open to students, staff and neighbours. Faculties and Campus 5 add their own, and in October 2026 the campus farm's first harvest reached staff tables.

99,000
free iftar portions in 22 days, 21 February to 14 March 2026

4,500
portions a day on average at the Campus 2 main gate

2,500
complete iftar packages funded by the Faculty of Food Security and LPSP on 23 February 2026

2,700
chickens from the campus farm shared with lecturers and education staff, October 2026

IFTAR AT THE CAMPUS GATE

In 2025 the iftar ran every day until 26 March at the main gate of Campus 2 Lidah Wetan and on Campus 1 Ketintang, with about 3,000 portions on the first day. On 5 March 2025 thousands of members of the academic community and residents broke the fast together with the Rector and his leadership team. In 2026 the programme ran from 21 February to 14 March, with every faculty, directorate and Vice-Rector's office taking a turn. It used 7.7 tonnes of rice and 3.3 tonnes of beef, with about 1,100 student volunteers, and partner small businesses prepared every dish. Vice-Rector II said the meals were meant for neighbours, travellers and students living in dormitories or boarding rooms.

FACULTIES AND CAMPUS 5 ADD THEIR OWN

On 23 February 2026 the Faculty of Food Security and the Institute for Education and Professional Certification (LPSP) funded 2,500 complete iftar packages for the public, students and street workers. The Faculty of Sport and Health Sciences handed out hundreds of takjil packages and held iftar with students and residents in March 2026. On 6 March 2026 Campus 5 in Magetan prepared at least 5,000 free takjil packages for students, the academic community and residents, with the Rector and the Regent of Magetan present. On 27 February 2026 the Faculty of Food Security held an iftar for all its employees.

FOOD FROM THE CAMPUS FARM FOR STAFF

The campus poultry farm, run by the Business Management Agency, harvested 60,000 chickens in its first harvest of 2026. In October 2026 about 2,700 frozen chickens went to lecturers and education staff in every faculty and 500 to orphans living near the campus.

FREE FOOD OPEN TO STAFF

FOOD	RUN BY	STAFF COVERED	SCALE	DATE
Chickens from the campus farm	Business Management Agency; Campus 5 for its own staff on 12 October	Lecturers and education staff	About 2,700 chickens	October 2026
Daily iftar at the Campus 2 gate	UNESA, daily turns by units	Academic community, including staff	About 3,000 portions on the first day in 2025; about 99,000 in 2026	Ramadan 2025 and 2026
Grand iftar, Campus 5	UNESA Campus 5	Academic community	At least 5,000 takjil packages	6 March 2026
Iftar for all employees	Faculty of Food Security	Leadership, lecturers and education staff		27 February 2026

FOOD FROM OUR OWN CAMPUS

A campus mart, hydroponic beds and a poultry farm

The Faculty of Food Security grows, rears and sells food on Campus 3, and the university's poultry farm supplies its community.

1 Apr 2026
the Agrinesa Mart opens on Campus 3

2.5 to 3
months from stocking to the first biofloc catfish harvest by Aquaculture students, 10 June 2026

60,000
chickens in the campus poultry farm's first 2026 harvest

AGRINESA MART

The faculty's Vice-Deans reviewed the design of the Agrinesa Mart on 6 January 2026: racks for fresh fruit, a chiller for hydroponic vegetables from the faculty garden, a freezer for frozen food processed to food-safety standards, a rack of seeds and seedlings, and a shelf for products by lecturers and students, such as ready-to-brew herbal drinks and omega-enriched eggs from the faculty's own poultry. The mart opened on 1 April 2026 for the faculty's students and staff, with fresh farm and livestock produce, fresh aquaculture products and home-made snacks. Its manager said every product carries a message about sustainability.

HYDROPONICS AND GARDENS

On 23 April 2026 students of the Digital Agribusiness programme harvested hydroponic water spinach at the faculty's open green laboratory, sowed the next crop the same day, packed the harvest and sold it directly to customers through online orders. On 8 May 2026 faculty staff harvested eggplant, chilli and tomato at the Smart Agriculture Techno Park, grown in soil enriched with organic fertiliser, and shared the produce. On 10 June 2026 the Aquaculture programme's 2025 cohort completed its first catfish harvest from biofloc ponds at the Techno Park, after about two and a half to three months of student-run cultivation.

THE POULTRY FARM

The poultry farm, run by the university's Business Management Agency, harvested 60,000 chickens in its first harvest of 2026. The agency's director said the farm aims to meet the campus's own needs and also to supply outside markets. In October 2026 about 2,700 chickens went to lecturers and education staff and 500 to orphans near the campus.

Faculty staff harvest eggplant at the Smart Agriculture Techno Park of the Faculty of Food Security, Campus 3, Surabaya, May 2026.

KNOWLEDGE FOR FARMERS AND FISH FARMERS

Silage, biofloc and soybean plots taken to the field

Lecturers of the Faculty of Food Security and its study programmes go to farms and village halls in Lamongan, Jombang, Madiun and Surabaya to share technology and skills with farmers.

FISH FARMERS IN TREPAN

On 24 May 2026 lecturers of the Aquaculture programme trained village officials, farmer groups, fish farmers and residents of Trepan village, Lamongan, in the village hall and at a farming site. They learnt to prepare an eel-farming medium from chopped banana stems, rice straw, compost and paddy mud fermented with an EM4 starter for 20 to 30 days, and to raise catfish in a biofloc system that saves water and allows higher stocking density. UNESA's 2026 community-service grant funded the training.

MAIZE AND SOYBEAN FARMERS

On 21 December 2025 the faculty's Vice-Deans joined maize farmers in Bluluk village, Lamongan, to trial a grinder that turns maize stalks and leaves into livestock feed, then fermented the ground waste into silage, a feed reserve for the dry season. On 14 August 2026 faculty leaders and SENTRA ran a workshop and extension session on soybean cultivation at a mosque in Tebluru village, Solokuro, with the mosque yard as the demonstration plot.

PROCESSING AND ORGANIC INPUTS

In Kromong village, Jombang, a UNESA team with Politeknik Negeri Jember trained a farmer group to turn maize into tortilla chips and sell them online, after the maize price at harvest fell to Rp3,000 per kilogram (reported 10 August 2026). On 23 September 2026 lecturers of the S1 Management programme at Campus 5 taught the Lestari Farmer Group of Suluk village, Madiun, to make organic fertiliser for durian and to brand their product.

ADVICE ON THE SPOT

On 22 June 2026 the faculty's Vice-Dean for Academic Affairs joined the East Java Regional Police in Mojotrisno village, Jombang, to judge a home-yard food garden competition, walked the beds with local farmers and gave advice on plant care, biological pest control and organic fertilising. On 19 June 2026 the faculty and a charity foundation visited a community poultry business in Surabaya whose keepers the faculty's lecturers have coached in coop sanitation, local-ingredient feed and food safety.

FARMER TRAINING AND FIELD DAYS, 2025 AND 2026

DATE	PLACE	WHAT FARMERS LEARNT	UNESA UNIT
21 Dec 2025	Bluluk, Lamongan	Maize waste ground into silage feed; organic fertiliser forum	Faculty of Food Security
24 May 2026	Trepan, Lamongan	Fermented eel-farming medium; biofloc catfish farming	S1 Aquaculture
19 Jun 2026	Karah, Surabaya	Coop sanitation, local-ingredient poultry feed, food safety	Faculty of Food Security
22 Jun 2026	Mojotrisno, Jombang	Home-yard garden care, biological pest control, organic fertiliser	Faculty of Food Security
Reported 10 Aug 2026	Kromong, Jombang	Tortilla chip production, packing and online selling	UNESA with Politeknik Negeri Jember
14 Aug 2026	Tebluru, Lamongan	Healthy, environmentally friendly soybean cultivation	Faculty of Food Security with SENTRA
23 Sep 2026	Suluk, Madiun	Organic fertiliser for durian and product branding	S1 Management, Campus 5

COMMUNITY AND LOCAL BUSINESS

Yards, schools, mosques and a market day for small food businesses

UNESA teaches households and schools to grow their own food and opens its gates to local food producers.

153
urban villages of Surabaya whose community-welfare cadres received seed and seedlings, 14 July 2026

100
local food businesses at the Campus 5 bazaar, 6 March 2026

Apr 2026
school-yard agreement with SMP Negeri 29 Surabaya for crops, small livestock and aquaculture

JARAN KEPANG: TURNING YARDS INTO FOOD SECURITY

The Faculty of Food Security's Jaran Kepang programme (Jadikan Pekarangan Ketahanan Pangan) teaches communities to grow food where they live. On 22 April 2026 the faculty signed an agreement with SMP Negeri 29 Surabaya to guide crops, small livestock and aquaculture in the school yard. On 14 July 2026 it gave the community-welfare (PKK) cadres of Surabaya's 153 urban villages hydroponic lettuce grown by its Aquaculture students and a pack of purple eggplant seed, so that households can start growing food. On 5 August 2026 it opened the programme to mosque administrators from Lamongan and mapped their land to choose between crops, livestock and aquaculture.

A MARKET DAY FOR LOCAL FOOD BUSINESSES

On 6 March 2026 UNESA Campus 5 held a Ramadan iftar with a Student Entrepreneurship and small business bazaar, organised with the Magetan Regency Government. One hundred local food and other small businesses sold drinks, main dishes, snacks, traditional sweets and processed and frozen foods next to student stalls, giving local producers a real market.

LOCAL PRODUCERS BEHIND UNESA'S OWN MEALS

When the free breakfast started at Campus 5 in January 2025, its meals were made with a local small business supplying pure cow's milk, so that the campus brings economic benefit to its neighbours. In Ramadan 2026 every one of the 99,000 iftar portions was prepared by partner small businesses.

FIELD FORUMS WITH SCHOOL HEADS

On 21 December 2025 the faculty also met the heads of SENTRA schools in Bluluk village for a forum on organic fertiliser products the schools developed under its guidance, so that the fertiliser can reach maize farmers as an alternative to costly chemical fertiliser.

Farmers and school heads meet the Faculty of Food Security in a field forum on organic fertiliser, Bluluk village, Lamongan, 21 December 2025.

Programmes, patents and partners for food security

The new faculty has moved from the classroom to working ponds and farms, a patented food product and partnerships in Indonesia and abroad.

HANDS-ON TEACHING

The Aquaculture programme trains students and outside groups in food production technology. Reported on 30 June 2025, it ran a training in biofloc catfish farming for biology teachers from Islamic senior high schools across East Java, held at MAN 2 Lamongan with the provincial office for religious-affairs education. On 10 June 2026 its 2025 student cohort completed its first catfish harvest at the Smart Agriculture Techno Park.

RESEARCH THAT REACHES THE MARKET

On 27 November 2025 the faculty's Deputy Dean and her research team received an Indonesian patent (No. 1DP000102376) from the Ministry of Law for a herbal yoghurt ice cream made with blue pea flower. The Agrinesa Mart, opened on 1 April 2026, puts products developed by lecturers and students on the shelf beside fresh produce.

PARTNERS IN INDONESIA AND ABROAD

On 18 December 2025 the faculty signed a cooperation agreement with the Instituto Profissional Sao Joao Batista of Timor-Leste. On 20 January 2026 it signed agreements with zakat (Islamic almsgiving) institutions, applying its expertise in bioscience and food technology to their welfare programmes. On 21 January 2026 its dean led a benchmarking visit to the Faculty of Agriculture at Okayama University in Japan to discuss cooperation on agricultural technology and biological resource management.

MILESTONES OF THE FACULTY OF FOOD SECURITY, 2025 AND 2026

DATE	MILESTONE
13 Jan 2025	Faculty created with four undergraduate programmes
30 Jun 2025 (reported)	Biofloc catfish training for biology teachers of Islamic senior high schools, MAN 2 Lamongan
27 Nov 2025	Indonesian patent for a herbal yoghurt ice cream with blue pea flower
18 Dec 2025	Cooperation agreement with the Instituto Profissional Sao Joao Batista, Timor-Leste
20 Jan 2026	Cooperation agreements with zakat institutions
21 Jan 2026	Benchmarking visit to Okayama University, Japan
1 Apr 2026	Agrinesa Mart opens on Campus 3
10 Jun 2026	First catfish harvest from biofloc ponds by the 2025 Aquaculture cohort
