4. Claims, Evidence and Reasoning – Scientific Explanations Rubric Linked to Argumentative Writing

Criteria	4	3	2	1	0
-----------------	----------	----------	----------	----------	----------

Claim – a conclusion that answers the original question	<ul style="list-style-type: none"> Scientifically accurate Completely answers the question Common inaccurate claim(s) are clearly addressed. 	<ul style="list-style-type: none"> Scientifically accurate Nearly completely answers the question Inaccurate claim(s) are only generally addressed, no specifics 	<ul style="list-style-type: none"> Partially scientifically accurate Partially answers the question Inaccurate claim(s) are not addressed 	<ul style="list-style-type: none"> Is not scientifically accurate overall Does not adequately answer the question 	No claim
Evidence – scientific data that supports the claim	<ul style="list-style-type: none"> The data are scientifically appropriate to support the claim. The data are thorough and convincing – enough details and evidence provided. Proper units are used in data Shows with evidence why alternate claims do not work 	<ul style="list-style-type: none"> The data are scientifically appropriate to support the claim The data are basically sufficient and convincing, but tend to be more general and not as specific and in depth Does not address why alternate claims do not work Evidence may be repetitive 	<ul style="list-style-type: none"> The data relate to the claim, but are not entirely scientifically appropriate The data are not sufficient, though generally support the claim 	<ul style="list-style-type: none"> There is some evidence provided, but it is not logically linked to the claim or scientifically appropriate 	No evidence provided
Reasoning – a justification that links the claim and evidence	<ul style="list-style-type: none"> Reasoning clearly links evidence to claim Shows why the data count as evidence by using appropriate scientific principles There are sufficient scientific principles to make links clear between claim and evidence 	<ul style="list-style-type: none"> Reasoning adequately links claim to evidence Includes related scientific principles, but only passably clarifies why this data count as evidence Reasoning tends to be more general and shows only partial depth of content understanding 	<ul style="list-style-type: none"> Reasoning does not adequately link claim to evidence, or clarify why data count as evidence Includes related and non-related scientific principles, and shows little depth of content understanding 	<ul style="list-style-type: none"> Reasoning is clearly insufficient and relates only tangentially to question and claim at hand Scientific understanding is very limited 	Does not provide reasoning
Language and Vocabulary	<ul style="list-style-type: none"> Response clearly and effectively expresses ideas using precise, scientifically appropriate descriptions and vocabulary 	<ul style="list-style-type: none"> Response adequately expresses ideas and scientifically appropriate descriptions and vocabulary, but they are more general than specific 	<ul style="list-style-type: none"> Response inconsistently and sometimes inappropriately expresses ideas or scientific descriptions and vocabulary 	<ul style="list-style-type: none"> Scientific language and vocabulary are not precise or appropriate 	Not understandable
Focus and Organization	<ul style="list-style-type: none"> Focus only on question at hand Logical progression of ideas Clearly stated and focused claim that is strongly maintained 	<ul style="list-style-type: none"> Focus mainly on question at hand, some loosely connected material present Logical progression of ideas Clearly stated and focused claim that is adequately maintained 	<ul style="list-style-type: none"> Focus not consistent on question at hand Progression of ideas not entirely logical Have a claim, but it's not entirely clear or maintained 	<ul style="list-style-type: none"> Focus not at all consistent Progression of ideas not logical Have an unclear claim that is not maintained 	No clear focus or organization
