Faculty	: Faculty of Languages and Arts
Study Program	: English Education
Subject	: Educational Research Methodology
Code	: 8820303146
Credit Hours	: 3 credits
Semester	: 5
Pre-requisite	:-
Lecturer(s)	: Team

# **Learning Outcomes:**

- 1. Demonstrate thorough understanding about concepts on educational research methodology.
- 2. Conduct research on the teaching and learning of English as a foreign language.
- 3. Perform critical thinking and use analytical skills to solve problems in the teaching and learning of English as a foreign language.
- 4. Demonstrate the awareness of the values, ethical issues and norms in conducting.

# **Description:**

This subject explores types and characteristics of various research methods for education filed. This covers: (1) the nature of quantitative and qualitative approaches: process of conducting research and the difference between quantitative and qualitative approaches; (2) the steps in the process of research: from collecting data up until reporting and evaluating data; (3) research design: types and their characteristics. The classroom activities are conducted through presentation, discussion, question-answer, and assignment.

16	End-of-term Exam						

### **Requirements for passing the course:**

Class Participation	:	20%
Assignments	:	30%
Mid-term exam	:	20%
End-of-term exam	:	30%

Notes:

- Attendance must be more than 75% of the total meetings. Students who are absent 4 (four) times or more will fail this course.
- The assignment should be submitted on time. Late submission will cause a 5-point deduction.

#### Assessment

### 1. Rubric for Assignment

No	Descriptions	Scores
1	The content is relevant to the assigned topic.	0-5
2	The concepts are comprehensively discussed.	0-5
3	The sentence structures are correct, with sophisticated use of grammar.	0-3
4	The diction is appropriate for a particular context.	0-3
5	The mechanics are accurately used.	0-3
6	Plagarism is kept to a minimum as shown by the similarity index in Turnitin.	0-3

The above raw scores are converted into a score that ranges from 0 to 100. The following formula is used to compute the converted score:

#### 2. Rubric for Mid-term and End-of-term Exams

Descriptions	Scores
The answer is correct; the explanation is comprehensive; an accurate example of the concept is provided.	3
The answer is almost correct; the explanation is sufficient but some aspects are not discussed; a quite good example of the concept is provided.	2
The answer is a little bit correct; the explanation only includes a few aspects of the concept; the example is not relevant to the concept.	1
The answer is incorrect; the explanation is inaccurate; no example is provided.	0

The above raw scores are converted into a score ranging from 0 to 100 by using the following formula:

 $Converted \ score = \frac{Total \ Score}{Maximum \ Score} \ x \ 100$
